Oxford,1995-01-01 **Cultural Identity, on a Daily Basis** Lisette A. García,2001 The current series of studies set out to investigate the relationship between cultural membership an individual s self concept and preferences particularly in regard to her or his collective identity It was found that culture effected preference patterns in two ways First consistent with the Kim and Markus s 2000 findings when a link between the object of choice and the individual is made explicit culture effected the type of pencil choice an individual made In this situation participants from individualistic cultures tended to make a unique pencil choice while participants from collectivistic cultures did not Secondly culture also appears to have moderated the effects of the in group out group distinction on preference patterns when no link between individual and the object of choice existed This is exemplified by the fact that only the choice patterns of the participants from the collectivistic culture type varied as a function of whether the choice had been offered by someone sharing their culture type or not The implications of these results for current models of cultural preference patterns and collective identity are discussed

Ethnonationalism is a phenomenon of great importance in many parts of the world today In this collection of papers nine distinguished anthropologists focus on Canadian and international case studies to show how ethnonational claims of cultural groups have been expressed and developed in specific historical and political situations from observations of Quebec to the former Soviet Union through problems of the Australian aborigines Malay identity the Avaglogoli in Western Kenya and ethnic cultures in Nigeria the essays reflect the complexity of the claims and aspirations of different groups Some deal with intractable demand for sovereignty others with solutions that attempt to achieve a level of autonomy and recognition short of sovereignty The intellectual history of the right of self determination is little more than 200 years old It is only since that time that the ideal of popular sovereignty by any group that views itself as a people became an accepted view These writers have used a paper by Walker Connor The Politics of Ethnonationalism as a foil against which to develop their own theses Connor argues that claims to self determination based on ethnic identity present problems to all but a few states and since these claims are unlikely to be satisfied ethnonationalism is disruptive of political order The papers in this volume do not accept his negative conclusions although they share a sense of secession and division are less worthy outcomes than pluralist structures Nevertheless in Valery Tishkov s discussion of the former Soviet Union secession appears to be the only solution Since ethnonationalism will continue to be a political issue for some time these papers form a significant base for future political debate **Reflections of Our Past** John H. Relethford,Deborah A. Bolnick,2018-03-26

The rise of the multi billion dollar ancestry testing industry points to one immutable truth about us as human beings we want to know where we come from and who our ancestors were John H Relethford and Deborah A Bolnick explore this topic and many more in this second edition of Reflections of Our Past Where did modern humans come from and how important are the biological differences among us Are we descended from Neandertals How should we understand the connections between genetic ancestry race and identity Were Native Americans the first to inhabit the Americas Can we see evidence of the Viking invasions of Ireland a millennium ago even in the Irish of today Through engaging examination of issues such as these and using non technical language Reflections of Our Past shows how anthropologists use genetic information to suggest answers to fundamental questions about human history By looking at genetic variation in the world today and in the past we can reconstruct the recent and remote events and processes that have created the variation we see providing a fascinating reflection of our genetic past
