David B. H. Denoon, 2017-05-16 Distinguished experts explain the economic trends and varied political goals at work in Southeast Asia. With China's emergence as a powerful entity in Southeast Asia, the region has become an unlikely site of conflict between two of the world's great powers. The United States, historically regarded as the protector of Pacific Southeast Asia, consisting of nations such as Vietnam, the Philippines, Myanmar, and Malaysia, is now called upon to respond to what many would consider bullying on the part of the Chinese. These and other countries have become the economic and political engine of China. While certainly inclined to help the country's former allies, the United States has grown undeniably closer to China in the recent decades of global interconnected economic growth. China, the United States, and the Future of Southeast Asia uncovers and delves into the complicated dynamics of this situation. Covering topics such as the controversial response to human rights violations, the effects of global economic interconnectedness, and contested sovereignty over resource-rich islands, this volume provides a modern and nuanced perspective on the state of the region. For anyone interested in understanding the evolving global balance of power, China, the United States, and the Future of Southeast Asia illuminates how countries as different as Thailand and Indonesia see the growing competition between Beijing and Washington.

The Future of NATO Expansion Zoltan Barany,2003-07-21 In 1999 three East Central European states Poland Hungary and the Czech Republic gained membership in the North Atlantic Treaty Organization Professor Barany argues that once it began the Alliance should continue the enlargement process Nevertheless he maintains that only states that satisfy NATO s membership criteria should be allowed to join Through an extensive analysis of four countries Bulgaria Romania Slovakia and Slovenia who at the time of the book s original publication in 2003 were NATO aspirants Barany demonstrates that they were in several important respects unprepared for membership and that there was no pressing reason for NATO s haste Barany argues that while NATO should be clear that its doors remain open to qualified candidates the Alliance should hold off further expansion until prospective members will become assets rather than liabilities *The Future of Just War* Caron E. Gentry,Amy E. Eckert,2014-01-15 Just War scholarship has adapted to contemporary crises and situations But its adaptation has spurned debate and conversation a method and means of pushing its thinking forward Now the Just War tradition risks becoming marginalized This concern may seem out of place as Just War literature is proliferating yet this literature remains welded to traditional conceptualizations of Just War Caron E Gentry and Amy E Eckert argue that the tradition needs to be updated to deal with substate actors within the realm of legitimate authority private military companies and the questionable moral difference between the use of conventional and nuclear weapons Additionally as recent policy makers and scholars have tried to make the Just War criteria legalistic they have weakened the tradition s ability to draw from and adjust to its contemporaneous setting The essays in *The Future of Just War* seek to reorient the tradition around its core concerns of preventing the unjust use of force by states and limiting the harm inflicted on vulnerable populations such as civilian noncombatants The pursuit of these challenges involves both a reclaiming of traditional Just War principles from those who would push it toward greater permissiveness with respect to war as well as the application of Just War principles to emerging issues such as the growing use of robotics in war or the privatization of force These essays share a commitment to the idea that the tradition is more about a rigorous application of Just War principles than the satisfaction of a checklist of criteria to be met before waging just war in the service of national interest **The Future of U.S.-Soviet Relations** United States. Congress. Senate. Committee on Foreign Relations,1990 Environmental Challenges in the Mediterranean 2000-2050

Antonio Marquina, 2012-12-06 This book collects most of the contributions prepared for the NATO Advanced Research Workshop ARW on Environmental Challenges in the Mediterranean 2000-2050. The ARW took place in Madrid from 2 to 5 of October 2002. Scholars and researchers from North and South of the Mediterranean and other countries from NATO gathered in Madrid for discussing several important factors that could affect Mediterranean security in the next 50 years. In this regard, the first chapter presents the different debates regarding environmental security that took place in the last decade. This chapter is an introductory chapter and takes into account the possible audience in the Southern Mediterranean and the wishes of some contributors. For this reason, the chapter deals in extenso with the question of human security and the different approaches. The ARW dealt with issues that may affect the supply of fundamental goods for human living. To this end, the complex question of climate change, its impact in the Mediterranean, the predicted increase in temperatures and predictions about rainfall are analysed. As part of this approach, a chapter about solar variability and climate change is also added.
