opportunities for creative exploration of form materials and the body in space Drawing on original research in the STEAM subjects the book highlights how artists engineers and theorists have begun working in close collaboration to reconsider practices that have been taken for granted throughout the history of art practice demonstrating how ideas about orientation weight balance and the familiar behaviours of art and craft materials are all radically altered in the microgravity of orbital space The research presented is supplemented by 9 original case studies from sculpture craft performance and land art together with exclusive interviews with artists who have produced work for space Taking an original critical approach to the spaceflight sector Art in Orbit sets out to define a new field of artistic practice and the real world impact of art sci collaboration It provides a template for developing new narrative strategies for space projects which will engage artists scientists and collaborative teams from across disciplines
