Colonial Trade and International Exchange Richard Anthony Johns,2013-11-07 International trade theory implicitly assumes that countries participating in external trade each have sovereign status Its failure to recognise the pervasive importance of colonial trade as an intermediate stage of external trade development interposed between autarky and international trade narrowly defined creates a serious gap In its explanatory structure and direct applicability Anthony John s book is an attempt to examine the properties of colonial resource management on the process of territorial specialisation He considers the implications of such foreign involvement for the trade patterns which may ensue after political independence when formal international trade entry is effected **The Economics of UN Peacekeeping** Nadège Sheehan,2011-07-25

Peacekeeping is a security concept that is very representative of the current interventionism multilateralism human rights and humanitarian ideas UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN armed forces e g humanitarian aid election supervision disarmament mine clearance civilian protection and peacebuilding The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of an economic globalization process Although UN peacekeeping has shortcomings it must be considered essential for organizing and defending the world politico economic order UN peacekeeping is a political activity but its production strongly depends on nations economic considerations Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission With low means and inadequate strategies to meet the challenges UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner s dilemma in contributions that delay deployments and create significant financial problems Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential This book believes that regional organizations can ease the UN s financial responsibility by managing conflicts in their regions But to be most effective they must involve the UN in their interventions This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high ranking team of international specialists in peacekeeping issues This research should be of interest to students and researchers looking at international and political economics as well as international relations defence security and peace studies *Manchester Royal Exchange Library ...
