Pavlov's Typology J. A. Gray, H. J. Eysenck, 2017-01-31 International Series of Monographs on Experimental Psychology Volume 1 Pavlov's Typology presents problems of personality and the theoretical framework done in the U S S R Part 1 of this book deals with the development of Pavlov's theory of personality on experiments conducted on dogs and the problems encountered in studies of higher nervous activity in man and animals These tests include investigation into the capacity of cortical cells of the test subject the speed of movement and termination of the nervous process and the speed of formation of positive and negative conditioned connections Part 2 is the application of Pavlov's theory of types to individual differences in human beings This part emphasizes that when using data from Pavlov's studies of animals typological differences are considered when applied in man that experimental methods are to be improved and that operations definitions and concepts can change Part 3 concerns experiments from Pavlov's laboratory on the dimension of strength of the nervous systems in human beings This strength is shown from the working capacity of nerve cells as 1 the strength of excitation the nerve cell can endure when a stimulus acts on it in a single time and 2 the time that the nerve cell can endure prolonged stimulus or at shorter but frequent intervals The conclusions observed in strong subjects and weak subjects are then analyzed This book can be appreciated by psychiatrists psychologists behavioral scientists and students and professors in psychology **The Causes and Cures of Neurosis (Psychology Revivals)** H. J. Eysenck, S. Rachman, 2013-11-26 Originally published in 1965 this book was an introduction to post Freudian methods of diagnosing and treating neurotics of the time These methods were known collectively as behaviour therapy a term indicating their derivation from modern behaviourism learning theory and conditioning principles In the early twentieth century John B Watson pointed out that psychology as the behaviourist views it is a purely objective experimental branch of natural science Its theoretical goal is the prediction and control of behaviour Behaviour therapy attempts to extend this control to the field of neurotic disorders and in doing so it makes use of experimental laboratory findings and of theories based on these It was seen as the very opposite of the position taken by psychoanalysis The authors believed that by the late twentieth century behaviour therapy would be firmly established as one of the most important if not the most important weapon in the hands of psychiatrists and clinical psychologists **Playing with Fire** Roderick D. Buchanan, 2010-05-06 Playing with Fire is a biography of psychologist Hans J. Eysenck's career It looks to describe the contradictions in Eysenck's public and professional image and explain how one fed the other It documents his boyhood in Berlin and the origins of his key ideas about personality learning and the biogenetics of behaviour **The Social Dog** Juliane Kaminski, Sarah Marshall-Pescini, 2014-05-20 Dogs have become the subject of increasing scientific study over the past two decades chiefly due to their development of specialized social skills seemingly a result of selection pressures during domestication to help them adapt to the human environment The Social Dog Behaviour and Cognition includes chapters from leading researchers in the fields of social cognition and behavior vocalization evolution and more focusing on

topics including dog dog and dog human interaction bonding with humans social behavior and learning and more Dogs are being studied in comparative cognitive sciences as well as genetics ethology and many more areas As the number of published studies increases this book aims to give the reader an overview of the state of the art on dog research with an emphasis on social behavior and socio cognitive skills It represents a valuable resource for students veterinarians dog specialists or anyone who wants deeper knowledge of his or her canine companion Reviews the state of the art of research on dog social interactions and cognition Includes topics on dog dog as well as dog human interactions Features contributions from leading experts in the field which examine current studies while highlighting the potential for future research

Drugs and the Inheritance of Behavior P. Broadhurst, 2012-12-06 The title of any monograph must necessarily be a compromise between brevity and precision and the needs of this compromise are particularly pressing in a newly emerging area of scientific interest one that is not only inter or bidisciplinary but tridisciplinary involving as it does psychology pharmacology and genetics The temptation to call this work psychopharmacogenetics tout court if the phrase can be applied to so polysyllabic a construction was removed by the timely appearance of the book under that title edited by Eleftheriou 1975b Accordingly something less novel has been chosen It might be thought to promise more than it delivers and to delineate a wider field than it covers but I have sought to add a corrective degree of precision in the subtitle which accurately defines what is intended even at the cost of further polysyllabification The survey of a disparate field of this kind entrains difficulties that go beyond what to call it The claims of the parent disciplines for methodological supremacy are strong and difficult to resist What I have done is to seek to impose a degree of coherence on the chosen area by always inquiring to what extent a particular methodology derived from one part of one of them only can be applied to the whole

The Spiral After-Effect Harry C. Holland, 2016-07-29 The Spiral After Effect presents the visual phenomenon of the spiral after effect in clinical investigations This book explains how and under what conditions the illusion happens or can be modified Organized into eight chapters this book begins with an overview of the features of illusion that are similar to many of the characteristics of other movement perceptions including vividness velocity and persistence This text then examines the complex structure and the geometric function of the inducing stimulus Other chapters consider the effects of drugs on the spiral illusion which is rather strange when one considers the wide use of the phenomenon in patient groups who may be receiving substantial admixtures of compound for therapeutic purposes This book discusses as well the relationship between intelligence and perception of the spiral after effect The final chapter deals with the conditioned after effect Clinical psychologists and readers who are interested in personality research will find this book useful

Ivan Pavlov Daniel P. Todes, 2014-10-15 Winner of the Pfizer Award from the History of Science Society Contrary to legend Ivan Pavlov 1849 1936 never trained a dog to salivate to

the sound of a bell So begins this definitive deeply researched biography of Ivan Pavlov Daniel P Todes fundamentally reinterprets the Russian physiologist s famous research on conditional reflexes and weaves his life values and science into the tumultuous century of Russian history particularly that of its intelligentsia from the reign of tsar Nicholas I to Stalin s time Ivan Pavlov was born to a family of priests in provincial Riazan before the serfs were emancipated and made his home and professional success in the booming capital of St Petersburg in late imperial Russia He suffered the cataclysmic destruction of his world during the Bolshevik seizure of power and civil war of 1917 21 rebuilt his life in his seventies as a prosperous dissident during the Leninist 1920s and flourished professionally as never before in the 1930s industrialization revolution and terror of Stalin times Using a wide variety of previously unavailable archival materials Todes tells a vivid story of that life and redefines Pavlov s legacy Pavlov was not in fact a behaviorist who believed that psychology should address only external behaviors rather he sought to explain the emotional and intellectual life of animals and humans the torments of our consciousness This iconic objectivist was actually a profoundly anthropomorphic thinker whose science was suffused with his own experiences values and subjective interpretations Todes s story of this powerful personality and extraordinary man is based upon interviews with surviving coworkers and family members along with never before analyzed taped interviews from the 1960s and 1970s examination of hundreds of scientific works by Pavlov and his coworkers and close analysis of materials from some twenty five archives The materials range from the records of his student years at Riazan Seminary to the transcripts of the Communist Party cells in his labs and from his scientific manuscripts and notebooks to his political speeches they include revealing love letters to his future wife and correspondence with hundreds of scholars artists and Communist Party leaders and memoirs by many coworkers his daughter his wife and his lover The product of more than twenty years of research this is the first scholarly biography of the physiologist to be published in any language

Communication Competence Annegret F. Hannawa, Brian H. Spitzberg, 2015-10-16 Almost everything that matters to humans is derived from and through communication Just because people communicate every day however does not mean that they are communicating competently In fact evidence indicates that there is a substantial need for better interpersonal skills among a significant proportion of the populace Furthermore dark side experiences in everyday life abound and features of modern society pose new challenges that make the concept of communication competence increasingly complex The Handbook of Communication Competence brings together scholars from across the globe to examine these various facets of communication competence including its history its essential components and its applications in interpersonal group institutional and societal contexts The book provides a state of the art review for scholars and graduate students as well as practitioners in counseling developmental health care educational intercultural and human resource management contexts illustrating that communication competence is vital to health relationships and all collective human endeavors *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1965 **Current Catalog** National Library of
