Redefining Linguistics:

Redefining Linguistics (RLE Linguistics A: General Linguistics) Hayley G. Davis, Talbot J. Taylor, 2014-02-03 The academic discipline of linguistics is at a critical stage of development Whatever consensus there may have been fifteen or even ten years ago is fast disappearing A process of redefinition is underway and it is the aim of this volume to contribute to that process explain why a redefinition is needed and how it should proceed In the case of linguistics the subject is also the subject matter Many linguists have ignored the problem of definition simply regarding linguistics as the science of language itself What though is language itself Is it a language ie English Swahili Or language in a more general sense The primary goal of a redefinition of linguistics should be to demonstrate that language is not an objective matter Linguistics is and should be the study of whatever is linguistically pertinent A linguistics redefined would look at how we interpret and construct our day to day communication acts what views of language are shared by and opposed by societies and the source and roles that these views play in our living and learning experience These papers argue the case for such a redefinition more explicitly than has ever been done before in modern linguistic theory Such a redefined perspective precisely because it is a perspective subject to outside influence and in constant dialogue with the perspective of the other human sciences must be endlessly redefined

Pablé, 2024-03-27 This book is a collective volume bringing together scholars who share an interest in linguistics from an integrational point of view and in developing new directions for future scholarship Integrational linguistics invites us to rethink the theoretical and methodological premises of general linguistics by drawing on a different conception of the sign and by recognizing the creativity that human communication requires Some chapters are concerned with concepts like the sign contextualization activity and integration Although being core concepts developed by the founder of integrational linguistics Roy Harris they have arguably remained underdeveloped in Harris writings and thus call for further clarification and investigation Other chapters are concerned with the notions of the self and the social experience and interaction with questions about individual agency and will and human sociality and social organization which all occupy a central position in integrational theory Finally remaining chapters focus on how scriptism and the language myth have influenced our way of

thinking about communication in a broad sense This edited collection will be of interest to a multidisciplinary readership comprising those engaged in study teaching and research in the humanities and social sciences including anthropology the arts education linguistics literary studies philosophy psychology and semiotics *Models of the Human in Twentieth-Century Linguistic Theories* Feifei Zhou,2020-03-17 This book provides a refreshingly new perspective for investigating linguistic texts which foregrounds models of the human It presents a close reading of major linguistic theories in the twentieth century with a focus on three main themes linguistic system and the individual speaker social order and linguistic creativity The examination of these three fundamental themes concerning language and human nature on the one hand provides a fine textured exposition on the implicit and explicit models of human nature endorsed by major theorists on the other it reveals the methodological dilemmas faced by linguistics In light of the fact that the importance of considering posthumanist ideas is increasingly being underscored today both within and outside linguistics this focus on the human makes the book highly topical **Linguistic Counter-Standardization** Neriko Musha Doerr,2024-10-21 Language standardization is problematic because it imposes the dominant group s linguistic variety as the only correct one and promotes the idea of unit thinking i e seeing the world as consisting of bounded internally homogeneous units This volume examines intentional practices to subvert such processes of language standardization what we call counter standardization practices in language education and other contexts By suggesting alternative classroom pedagogies language reclamation processes for indigenous populations and discourses about mis pronunciation this volume explores more liberatory approaches the post unit thinking of language **Linguistics for Intercultural Education** Fred Dervin,Anthony J. Liddicoat,2013-04-24 The issue of intercultural learning has been tackled amongst others in the fields of education language education and applied linguistics In spite of the extensive literature on the subject there is still much which needs to be done to address the ways in which linguistics itself can contribute to intercultural education The 8 chapters by internationally renowned scholars highlight different ways of using it both in the classroom and in researching intercultural education The following approaches are covered Critical Discourse Analysis nonciation Conversation Analysis and Pragmatics The introduction to the volume also offers a useful and comprehensive survey of the debates around the polysemic notion of the intercultural The book will appeal to an international readership of students scholars and professionals across a wide range of disciplines interested in making intercultural education more effective
