Reference And Consciousness:

Reference and Consciousness John Campbell,2002-06-06 Campbell investigates how consciousness of the world explains our ability to think about the world He illuminates problems about thought reference and experience by looking at the psychological mechanisms on which conscious attention depends *Logic and Time* K. Michalski,2001-11-30 The subject of this study is Husserl s theory of meaning as it appears in his writings from the Logical Investigations to the Crisis of the European Sciences The first chapter focuses on Husserl s critique of psychologism and the theory of meaning that stems from it The second chapter takes its departure from the question of Husserl s attitude towards the Cartesian tradition then presents the transcendental noematic theory of meaning represented by The Idea of Phenomenology Ideas and Cartesian Meditations The third chapter deals with Husserl s interpretation of time consciousness against the background of the development of the problem of time in modern philosophy Husserl often changed his views regarding the question of meaning I have tried to understand the reasons for these changes To do this I have occasionally disturbed the chronological order of his arguments in favour of a consideration of their logical development and coherence Throughout this study but especially in the digression on consciousness and speech and the Postscript I have also attempted to bring to the fore a tension in Husserl s thought between two interpretive strategies the first I call Cartesian the other non Cartesian or hermeneutical

Consciousness in Locke Shelley Weinberg,2016-01-07 Shelley Weinberg argues that the idea of consciousness as a form of non evaluative self awareness runs through and helps to solve some of the thorniest issues in Locke s philosophy in his philosophical psychology and in his theories of knowledge personal identity and moral agency Central to her account is that perceptions of ideas are complex mental states wherein consciousness is a constituent Such an interpretation answers charges of inconsistency in Locke s model of the mind and lends coherence to a puzzling aspect of Locke s theory of knowledge how we know individual things particular ideas ourselves and external objects when knowledge is defined as the perception of an agreement or relation of ideas In each case consciousness helps to forge the relation resulting in a structurally integrated account of our knowledge of particulars fully consistent with the general definition This model also explains how we achieve the unity of consciousness with past and future selves necessary for Locke s accounts of moral responsibility and moral motivation And with help from other of his metaphysical commitments consciousness so interpreted allows Locke s theory of personal identity to resist well known accusations of circularity failure of transitivity and insufficiency for his theological and moral concerns Although virtually every Locke scholar writes on at least some of these topics the model of consciousness set forth here provides for an analysis all of these issues as bound together by a common thread
