Reflections On Political Identity:

Reflections on Political Identity Anne Norton, 1988 Norton powerfully defends the inevitability and value of those particular concrete traits and actions whereby men differentiate themselves from one another Ethics **Identity, Difference** William E. Connolly, 2002 **Identity, Narrative and Politics** Maureen Whitebrook, 2014-04-04 Identity Narrative and Politics argues that political theory has barely begun to develop a notion of narrative identity instead the book explores the sophisticated ideas which emerge from novels as alternative expressions of political understanding This title uses a broad international selection of Twentieth Century English language works by writers such as Nadine Gordimer and Thomas Pynchon The book considers each novel as a source of political ideas in terms of content structure form and technique The book assumes no prior knowledge of the literature discussed and will be fascinating reading for students of literature politics and cultural studies **Political Identity and the Metaphysics of Politics** Gabriele De Anna, Manuele Dozzi, 2023-05-05 The chapters in this volume clarify the notion of political identity by focusing on the metaphysics of politics By analysing the notion of political identity they provide the conceptual resources for a deeper understanding of the theoretical and practical debates on populism the crisis of sovereignty the feasibility of a world government and ethical religious and cultural pluralism What is a political community Any answer to this question lies at the intersection between three fields metaphysics philosophy of action and political philosophy The question concerns how and why a plurality of individuals becomes a political unity what principles or forces keep that unity together and what threats that unity can encounter In this volume the contributors investigate how different metanormative views affect the possible answers to this metaphysical question They explore the role that the individual identities of agents play in grounding common practices that underpin political life They investigate the individual identities of agents as the result of the interplay between natural and cultural factors Finally they observe the ways in which a political community as a collection of individuals who hang together in an attempt to reach common purposes demonstrate a certain metaphysical solidity Political Identity and the Metaphysics of Politics will appeal to researchers and advanced students working in metaphysics political philosophy political theory and philosophy of action *Identity, Rights and Constitutional Transformation* Patrick J. Hanafin, Melissa S Williams, 2018-12-21 First published in 1999 this book provides an analysis of the role of constitutional governance from an international and interdisciplinary perspective The range of disciplines represented in the collection of papers aims to open new perspectives on topics that are frequently left to the expert hands of political scientists and lawyers alone It reveals scope for the further study of historical cultural and rhetorical approaches in tandem with traditional approaches The blend of cross national experience and comparisons and the fertilisation of one discipline by another should appeal to a wide interdisciplinary audience Political Mourning Heather Pool, 2021-05-21 Political Mourning examines four case studies the Triangle Fire Emmett Till s murder the attacks of September 11th and the Black Lives Matter movement to shed light on moments when

everyday people died when their deaths were the basis of calls for political change and when such a change actually occurred

Reflections on Identity in Four African Cities S. B. Bekker, Anne Leildé, 2006 Identity has become the watchword of our times In sub Saharan Africa this certainly appears to be true and for particular reasons Africa is urbanising rapidly cross border migration streams are swelling and globalising influences sweep across the continent Africa is also facing up to the challenge of nurturing emergent democracies in which citizens often feel torn between older traditional and newer national loyalties Accordingly collective identities are deeply coloured by recent urban as well as international experience and are squarely located within identity politics where reconciliation is required between state nation building strategies and sub national affiliations They are also fundamentally shaped by the growing inequality and the poverty found on this continent These themes are explored by an international set of scholars in two South African and two Francophone cities The relative importance to urban residents of race class and ethnicity but also of work space and language are compared in these cities This volume also includes a chapter investigating the emergence of a continental African identity A recent report of the Office of the South African President claims that a strong national identity is emerging among its citizens and that race and ethnicity are waning whilst a class identity is in the ascendance The evidence and analyses within this volume serve to gauge the extent to which such claims ring true in what everyone knows is a much more complex and shifting terrain of shared meanings than can ever be captured by such generalisations
