Reflections On Learning:

Reflection in Learning and Professional Development Jennifer A. Moon, 2013-09-05 Reflection is a technique for aiding and reinforcing learning used in education and professional development This volume offers practitioners and students guidance that cuts across theoretical approaches enabling them to understand and use reflection to enhance learning in practice

Beyond the Books Francis Russell Hart, 1989

Learning Critical Reflection Laura Béres, Jan Fook, 2019-08-13 Learning Critical Reflection documents the actual learning experiences of social work students and practitioners It explores how a more in depth understanding of the process of learning combined with an analysis of how to critically reflect will help improve the learning process The contributors are all professionals who have learnt in a formalised way how to critically reflect on their practice They speak in depth and with feeling about their experiences how downsides and upsides worked together to transform the way they understood themselves their professional identity and their practice Existing literature about critical reflection is reviewed identifying the details of learning and pulling no punches in recognising the difficulty and complexity of becoming transformed through this learning process The editors of this book also contribute their own reflections on learning how to teach critical reflection and include the findings of a research study conducted on students learning Edited by two experienced educators this book showcases the process of learning from the perspective of the learners in order that educators and students managers supervisors and frontline practitioners alike may make the most of opportunities to critically reflect in both educational and workplace settings It should be considered essential reading for social work students practitioners and educators

Reflections on Learning Tony Ghaye, Doug Dennis, 1996

Developing Reflective Practice J. John Loughran, 2002-11 This text presents a research study into the development of reflective practitioners in a pre service teacher education programme The teacher educator in the study modelled his own reflections on practice in the hope that it would help students to apply reflection to their own teaching The results of the author s research demonstrate that reflection on practice occurs in three distinct periods before anticipatory during contemporaneous and after retrospective a pedagogical experience The book concludes that when student teachers own learning situations both within their university coursework and their school experiences become the focus for their learning about teaching and learning their understanding of and practice in teaching is enhanced

Teaching and Learning through Reflective Practice Tony Ghaye, 2010-12-09 Now in its second edition Teaching and Learning through Reflective Practice is a practical guide to enable all those involved in educational activities to learn through the practices of reflection The book highlights the power that those responsible for teaching and learning have to appraise understand and positively transform their teaching Seeing the teacher as a reflective learner the book emphasises a strengths based approach in which positivity resilience optimism and high performance can help invigorate teaching enhance learning and allow the teacher to reach their full potential This approach busts the myth that reflection on problems and deficits is the only way to better performance The

approach of this new edition is an appreciative one At its heart is the exploration and illustration of four reflective questions What s working well What needs changing What are we learning Where do we go from here With examples drawn from UK primary teacher education the book reveals how appreciative reflective conversations can be initiated and sustained It also sets out a range of practical processes for amplifying success This book will be a must have for undergraduate and PGCE students on initial teacher training programmes It will also interest practising teachers teacher educators and those on continuing professional development courses

The Habit of Passionate Teaching: Reflections on Teaching For Learning Deborah Rickey, Randall Wisehart, 2024-04-10 Deborah Rickey and Randall Wisehart have spent more than 80 years in the field of education as teachers and administrators In The Habit of Passionate Teaching they share what they have learned from their students in middle school high school and teacher preparation programs The motivation for this book comes from the authors deeply held belief that it is crucial for teachers to share their knowledge about teaching their craft knowledge so that every generation of teachers can build on what has worked in the past Based on interviews with dozens of experienced teachers and with the addition of their own experience the authors describe and explore what teachers said about becoming effective and passionate teachers and how the practices became a habit The teachers whose voices are shared throughout the book have found success in teaching over a span of five ten even twenty and more years They have bucked the trend that has seen so many teachers leaving the profession after three years or fewer The authors sought to discover why these teachers chose to stay in the profession The emerging answer to the question is that these teachers learned and employed practices of passionate teachers and honed the practices until they became a habit a habit of passionate teaching The authors highlight the importance of practices that veteran teachers shared during interviews and focus group sessions One practice is reflecting Teachers reported the importance of reflecting before during and after teaching in order to help them focus on student learning Another practice is nurturing relationships Teachers shared that building positive relationships with their students was an essential practice The practice of engaging in an action research mindset was also listed as an important practice Teachers were clear that having a question or wondering about student learning was crucial Yet another practice is seeking the perspective of their own students in their journey to the habit of passionate teaching Seeking the student perspective was an essential element of their teaching practice Teachers shared how they sought and acted on the student perspective in both formal and informal ways Finally the practices of listening and questioning were described as being threaded throughout these teachers professional lives Listening was crucial in understanding the student perspective and helped create a classroom culture that led to teachers and students being partners in learning Questioning was described in a very specific way in the context of this book Teachers explained the importance of asking questions they did not know the answer to as an important way to emphasize that

answers lay in exploration not in the teacher's head. Learning and employing practices of passionate teachers is not an easy process. Teacher anecdotes and examples clearly demonstrated a commitment of these veteran teachers to being lifelong learners. The teachers whose words are shared throughout this book were clear that being a good teacher means always inquiring about what is working and what isn't and making the necessary adjustments. This book is built around stories and insights of teachers who have made a commitment to the habit of passionate teaching. This book includes important ideas that teachers reported were key to filling them with hope and helping them understand what it means to be a good teacher. In addition, the teachers and authors share specific strategies, practices, and protocols that can be adapted for elementary, secondary, and post-secondary classrooms. This book describes the craft knowledge of the authors and veteran teachers in hopes that other educators can build on the ideas and in the future share their own craft knowledge.
