Reflective Teaching of Geography 11-18 Graham Butt, 2002-10-11 THIS IS THE SERIES BLURB LIST ALL BOOKS TOGETHER Continuum Studies in Reflective Practice and Research is a new series of textbooks aimed at teaching students As with Andrew Pollard s books they use the idiom of reflective teaching In other words they avoids the two extreme views about learning to teach namely that it is best done simply through acquiring practical tricks of the trade without any theory or that it is best done applying sytematized objective theory The distinctive feature of relective teaching is that it encourages practitioners to develop by continually inter relating theory and research findings to their own practice situation and style These comprehensive textbooks provide an accessible guide to all those who are new to teaching in secondary schools Covering all aspects of job from planning through to teaching and assessment the authors provide constructive accessible and above all practical advice to help subject teachers become more effective in their work

Environmental and Geographical Education for Sustainability Zijian Li, Michael Williams, 2006 Geography environment sustainability culture and education standing alone or in any combination provide the ingredients for a variety of stews They are all difficult to define and they generate endless debates for theoreticians and practitioners about their meaning and significance The editors have divided the chapters that follow into two parts in an effort to unit these diverse disciplines Part 1 is concerned with cultural foundations and curriculum issues related to geographical and environmental education for sustainability Part 2 comprises a series of chapters presenting education for sustainability in the contexts of national cultures

International Handbook on Geographical Education Rod Gerber, 2013-03-09 I am very pleased to

have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

The False Promise of Global Learning Alex Standish, 2012-04-26 Provides an informed and impassioned critique of the movement for international and global education in schools

Geography, Education and the Future Graham Butt, 2011-03-17 Teaching Humanities & Social Sciences Rob Gilbert, Libby Tudball, Peter

Brett, 2019-10-17 Teaching Humanities and Social Sciences 7e prepares teachers to develop and implement programs in the humanities and social sciences learning area from F 10 It successfully blends theory with practical approaches to provide a basis for teaching that is engaging inquiry based and relevant to students lives Using Version 8 1 of the Australian Curriculum the text discusses the new structure of the humanities and social sciences learning area Chapters on history geography civics and citizenship and economics and business discuss the nature of these subjects and how to teach them to achieve the greatest benefit for students both as sub strands within the Year F 6 7 HASS subject and as distinct Year 7 10 subjects Throughout the book maintains its highly respected philosophical and practical orientation including a commitment to deep learning in a context of critical inquiry With the aid of this valuable text teachers can assist primary middle and secondary students to become active and informed citizens who contribute to a just democratic and sustainable future

Global Perspectives in the Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish s careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish s book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education

for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike Global Perspectives in the Geography Curriculum makes a significant contribution to the growing debate about the future direction of the discipline itself Debates in Geography Education Mark Jones, David Lambert, 2013-01-04 Debates in Geography Education encourages student and practising teachers to engage with and reflect on key issues concepts and debates in their specialist subject teaching It aims to enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding Expert editors and contributors provide a balance of experience and perspectives and offer international historical and policy contexts evidence informed classroom debates and a glimpse of the subject's expanding horizons Debates considered include what constitutes knowledge in geography constructing the curriculum how do we link assessment to making progress in geography the contribution of fieldwork and outdoor experiences technology and media how we use Geographical Information how geography contributes to global learning sustainable development and geography education The comprehensive rigorous coverage of these key issues together with carefully annotated selected further reading reflective questions and a range of specific web based resources will help support shape your own research and writing Debates in Geography Education is a source of knowledge experience and debate that will be essential reading for all students studying at Masters level practising teachers who want to develop a better understanding of the issues that shape their practice and Education Studies students considering in depth subject teaching
