Reform And Revolution In Communist Systems:

Reform and Revolution in Communist Systems Gary K. Bertsch, 1991 **From Reform to Revolution** Minxin PEI, Minxin Pei, 2009-06-30 This is the first comprehensive effort to compare the recent political experiences of the Union of Soviet Socialist Republics and the People's Republic of China by tracing their overlapping and diverging paths of regime change The Capitalist Transformation of State Socialism David Lane, 2013-11-20 David Lane outlines succinctly yet comprehensively the development and transformation of state socialism While focussing on Russia and the countries of Eastern Europe he also engages in a discussion of the Chinese path In response to the changing social structure and external demands he outlines different scenarios of reform He contends that European state socialism did not collapse but was consciously dismantled He brings out the West's decisive support of the reform process and Gorbachev's significant role in tipping the balance of political forces in favour of an emergent ascendant class In the post socialist period he details developments in the economy and politics He distinguishes different political and economic trajectories of countries of the former USSR the New Member States of the European Union and China and he notes the attempts to promote further change through coloured revolutions The book provides a detailed account not only of the unequal impact of transformation on social inequality which has given rise to a privileged business and political class but also how far the changes have fulfilled the promise of democracy promotion wealth creation and human development Finally in the context of globalisation the author considers possible future political and economic developments for Russia and China Throughout the author a leading expert in the field brings to bear his deep knowledge of socialist countries draws on his research on the former Soviet Union and visits to nearly all the former state socialist countries including China From Reform to Revolution Minxin Pei, 1994 The author concludes with provocative statements about regime transition from communism He rejects the idealistic notion that democratization can by itself remove the structural obstacles to economic transformation and he sees high economic and political costs as unavoidable in transition from communism along either the Soviet or the Chinese path Globalization against Democracy Guoguang Wu, 2017-04-27 This book explores how global capitalism has reconfigured state market relations and how interactions among capital labor and consumption threaten democracy It is for specialists in political economy political science economics sociology international relations and development studies and for supplemental use on undergraduate and graduate courses on globalization capitalism development and democracy **The Political Economy of Asian Transition from Communism** Sujian Guo, 2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between

politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work *Adaptation And Transformation In Communist And Post-communist Systems* Sabrina Petra Ramet, 2019-03-04 This book tackles different aspects of the adaptive and transformative process in communist and post communist systems in Eastern Europe offering competing models which locate the explanatory variable in different places and account for the unfolding of change in different ways **Communism in Transition** Amos Yoder, 2024-04-12 Communism in Transition 1993 examines the mainstays of Communist ideology and goes on to look at the collapse of Communism in the Soviet Union and in Eastern Europe It also analyses Asian and Latin American Communist systems and their challenges to the non Communist world and concludes by evaluating the democratic revolutions in the former Soviet Union and in Eastern Europe their possible effect on other Communist states why the revolutions surprised Western pundits and the implications of these events for world peace *Germany and the World since 1815* Thomas Adam, 2024-09-26 This textbook provides a history of modern Germany locating the country's social cultural and political developments within their proper global and transnational context The author argues that most developments in German culture society and politics throughout the nineteenth and twentieth centuries were caused by wider global and transnational trends A history of the German people rather than the German state the book focusses on non state and non government actors intercultural transfers and applies the approach of thick description to analysing the creation of German culture society and identity from the era of the Napoleonic wars right up to the present post unification Germany This includes an examination of German migrants journeys to their new homes in the Americas and thus the creation of a global German diaspora with cultural and social networks beyond its home country's borders The book further focusses on the transfers that connected German society and culture with those of other countries for instance chapters cover the transfer of football from England to Germany the transfer of the Christmas holiday tradition from Germany to other countries and the development of eugenics in Germany within its global context Dismantling Communism Gilbert Rozman, Seizaburō Satō, Gerald Segal, 1992 The chapters which constitute this volume were presented at two international workshops held at the Woodrow Wilson Center in Washington D C in October 1990 and January 1991
