Rural Analysis and Management Francisco J. Tapiador, 2007-09-28 This handbook possesses two virtues that are becoming increasingly difficult to find together The first one is providing a novel and original scheme to analyze the rural areas of the planet in the context of Earth sciences The handbook is so original in its plan that it actually defines what modern rural science is The scheme followed albeit new is rooted in a venerable geographical tradition and presents a sensible balance between the academic and the applied viewpoints This novel way of studying rural areas represents by itself a valuable contribution to this complex field The second virtue of the book is the ability of synthesizing the most important aspects of the issues tackled and there are many issues this book tackles from physical to human geography and from deontology to matrix algebra When writing a handbook in such a vast field as rural science it is indeed tempting to accumulate meaningless information assisted by the wealth of available online information On the other side the danger of forgetting essential aspects is always present None of these problems seems to have affected the making

of this book The pictures and tables always have a place the text never loses its coherence and no comment seems superfluous Also the ambitious scope of the book is seemingly effortlessly solved by a rational clear and logical scheme that dissects all the relevant issues up to the required point

Planning Canadian Regions, Second Edition Gerald Hodge, Heather M. Hall, Ira M. Robinson, 2017-01-05 Planning Canadian Regions was the first book to integrate the history contemporary practice and emergent issues of regional planning in Canada This much anticipated second edition brings the discussion up to date applying the same thorough analysis to illuminate the rapid changes now shaping our regional landscapes This new edition draws upon contemporary analyses projects and literature to address issues of spatial complexity now facing regional planners in Canada Special attention is paid to the regional planning dimensions of climate change adaptation and environmental sustainability across Canada the development inequities faced in peripheral resource regions the role that Aboriginal peoples must play in the planning of their regions and the distinctive planning needs of metropolitan regions across the country This book challenges planners educators and policy makers to engage with the latest thinking and strive for best practices in twenty first century regional planning

Geography And Development Arthur Morris, 2005-08-15 First published in 1998 Written in a highly accessible style this book examines economic development processes across the world The old certainties of what constitutes development and whether it is the same for all peoples no longer exist Goals once imposed by agencies like the World Bank are increasingly questioned and the spatial development planning characteristics of the 1960s and 70s is increasingly seen as an intrusion into free and competitive markets Indeed a question now being asked is should development be promoted at all This book examines these fundamental issues and presents and evaluates the different theoretical approaches to development Each country has its own tale to tell and by using valuable case study material the author shows how different policies have impacted on the geography of regions Processes of development in the newly industrialised countries NICs of South Korea and Singapore are examined as well as the flexible specialisation model characteristic of many Mediterranean countries and the post industrial service economies based on high technology The book argues convincingly that the fundamental spatial and temporal patterns of development in modern times are no longer the importance of physical resources but the complex human resources and the determination to work Anchored firmly in the needs of students this book will be widely welcomed by undergraduates taking courses in human geography and development studies

Urban Policy in the Time of Obama James DeFilippis, 2016-11-08 With his background as a community organizer and as a state legislator representing Chicago's South Side Barack Obama became America's most urban president since Teddy Roosevelt But what has been his record in dealing with the issues most impacting our metropolitan areas today Looking past the current administration what are the future prospects of the nation's cities and how have they been shaped by our policies in this century Seeking to answer these questions the contributors to *Urban Policy in the Time of Obama* explore a broad range of policy arenas that shape both directly and indirectly

metropolitan areas and urbanization processes This volume reveals the Obama administration s surprisingly limited impact on cities through direct policy initiatives such as Strong Cities Strong Communities Promise Neighborhoods and Choice Neighborhood Initiatives There has been greater impact with broader policies that shape urban life and governance including immigration reform education and health care Closing with Cedric Johnson s afterword illuminating the Black Lives Matter movement and what its broader social context says about city governance in our times Urban Policy in the Time of Obama finds that most of the dominant policies and policy regimes of recent years have fallen short of easing the ills of America s cities and calls for a more equitable and just urban policy regime Contributors Rachel G Bratt Tufts University Christine Thurlow Brenner University of Massachusetts Boston Karen Chapple University of California Berkeley James Fraser Vanderbilt University Edward G Goetz University of Minnesota Dan Immergluck Georgia Tech Amy T Khare University of Chicago Robert W Lake Rutgers University Pauline Lipman University of Illinois at Chicago Lorraine C Minniti Rutgers University Camden Kathe Newman Rutgers University Deirdre Oakley Georgia State Frances Fox Piven City University of New York Hilary Silver Brown University Janet Smith University of Illinois at Chicago Preston H Smith II Mount Holyoke College Todd Swanstrom University of Missouri St Louis Nik Theodore University of Illinois at Chicago J Phillip Thompson MIT

Postmodern Geographies Edward W. Soja, 1989 Written by one of America s foremost geographers Postmodern Geographies contests the tendency still dominant in most social science to reduce human geography to a reflective mirror or as Marx called it an unnecessary complication Beginning with a powerful critique of historicism and its constraining effects on the geographical imagination Edward Soja builds on the work of Foucault Berger Giddens Berman Jameson and above all Henri Lefebvre to argue for a historical and geographical materialism a radical rethinking of the dialectics of space time and social being Soja charts the respatialization of social theory from the still unfolding encounter between Western Marxism and modern geography through the current debates on the emergence of a postfordist regime of flexible accumulation The postmodern geography of Los Angeles exposed in a provocative pair of essays serves as a model in his account of the

contemporary struggle for control over the social production of space *Routledge Library Editions: Economic Geography*
 Various, 2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization **After Zero** Neyran Turan, Stephen Ramos, 2009 Design disciplines are challenged by the condition of the zero point Zero context cities from scratch and zero carbon developments all force designers to tackle fundamental questions regarding the strategic relevance and impact of a design intervention As much as the zero point presents na ve innocence and embodies contradictory notions it also creates a ground for doubt self critique and rejuvenation for architecture and urbanism As cities are built before they can even be imagined what do these projects suggest for the design disciplines Rather than reductive aestheticization or total rejection what are possible critical ways to reflect on this condition Beyond a possible focus on the ambitions of these projects it is important to see them as symptomatic of a much broader condition within contemporary architecture and urbanism Along with the challenges inherent in the zero point perhaps more meaningful are the provocations of the after the zero condition which clearly marks the need to seriously explore fundamental inquiries regarding form and context physical social political After Zero is an opportunity to imagine alternative futures and a revitalized project for the city Development from Within D. R. F. Taylor, Fiona Mackenzie, 2024-09-30 The decade of 1980s was one of crisis for Africa Neither African governments nor development agencies made a significant impact on the quality of life of rural people The enormous range of contexts in Africa social economic political cultural and environmental limits the value of the search for universal solutions to endemic problems First published in 1992 Development from Within examines an alternative framework arguing for flexibility and specificity The authors use case studies to explore the complex social relationships of power from the household to the state They argue for the knowledge and skill of African people and illustrate the diverse means by which men and women in rural Africa struggle to survive This book will be a beneficial read for students and researchers of African studies development studies economics and sociology *Planning the Twentieth-century American City* Mary Corbin Sies, Christopher Silver, 1996 Arguing that planning in practice is far more complicated than historians usually depict the authors examine closely the everyday social political economic ideological bureaucratic and environmental contexts in which planning has occurred In so doing they redefine the nature of planning practice expanding the range of actors and actions that we understand to have shaped urban development Protected Areas and the Regional Planning Imperative in North America James Gordon Nelson, Lucy M.
