Soumyabrata Mondal* Saheli Kumar and Anand Prasad Mishra*****

Abstract : *Regional disparity is the outcome of imbalanced regional development that varies from region to region depending on socio-cultural, economic, demographic and infrastructural characteristics. The problem of regional disparities is found not only in India rather it is a global problem. Research on regional disparity is essential for addressing the lacuna in the planning process of development. The present study examines the inter block regional disparities in the level of rural development on the basis of 35 developmental indicators in Hugli District of West Bengal. The study is based on secondary data obtained from District Census Handbook (2011), District Statistical Handbook (2014), District Human Development Report (2011) etc. In order to delineate inter block developmental disparities various statistical methods- Dimension index (Di), Kendall's ranking co-efficient method, Composite Index (Ci), Standard Score (Z score) etc. have been used. Besides to assess the interrelationship among the selected variables with each other Correlation Matrix has been applied. The study reveals that wide disparities in the level of socio-economic, agricultural and infrastructural development exist among different blocks.*

Key Words: *Regional Disparity, Regional Development, Dimension Index, Correlation Matrix, Hooghly District.*
