book predominantly focuses on trade regionalism. However, other areas of integration which have impacts on the trade regionalism are also examined like social and political integrations etc. The book takes off from the premise that trade regionalism under SAARC has failed and has been marred by political and security concerns among its member nations. It has failed to achieve its objective on all the three counts which are promoting peace, development and economic cooperation. However, with the developing countries as members, SAARC has great potential for trade integration. Certain structural, normative and organisational alteration along with favourable ideation can still make SAARC achieve its full potential. The book also deals with the comparative analysis of SAARC regional integration with the regional integration under European Union and ASEAN. Regarding comparative regionalism, the discussion has been confined only to the EU and ASEAN. The EU has been chosen because it is comparatively established as one of the most successful regional organisations in the contemporary world. Whereas ASEAN has been chosen because of its similarity to the SAARC's economy, society and political structure. The analysis presented in the book is from the perspectives of international law and international relations theories and practice. This book thus is of particular relevance to the students, researchers, academicians, policymakers and practitioners of international trade law, international relations and South Asian studies. *Regionalism in South Asia* Kishore C.

Dash, 2008-02-19. The dramatic surge in regional integration schemes over the past two decades has been one of the most important developments in world politics. This book examines regionalism in South Asia, exploring the linkages between institutional structures, government capabilities and domestic actors' preferences to explain the dynamics of regional cooperation.

Re-imagining Border Studies in South Asia Dhananjay Tripathi, 2020-12-24. This book presents a radical rethinking of Border Studies. Framing the discipline beyond conventional topics of spatiality and territoriality, it presents a distinctly South Asian perspective: a post-colonial and post-partition region where most borders were drawn with political motives, ignoring the socio-cultural realities of the region and economic necessities of the people. The authors argue that while securing borders is an essential function of the state in this interconnected world, crossing borders and border cooperation is also necessary. The book examines contemporaneous and topical themes like disputes of identity and nationhood, the impact of social media on Border Studies, trans-border cooperation, water sharing between countries and resolution of border problems in the age of liberalisation and globalisation. It also suggests ways of enhancing cross-border economic cooperation and connectivity and reviews security issues from a new perspective. Well supplemented with case studies, the book will serve as an indispensable text for scholars and researchers of Border Studies, military and strategic studies, international relations, geopolitics and South Asian studies. It will also be of great interest to think tanks and government agencies, especially those dealing with foreign relations. **Accessions List, South Asia** Library of Congress.

Political Economic Perspectives of China's Belt and Road Initiative Christian Ploberger, 2019-07-30 The book begins with an overview on China's Belt and Road Initiative highlighting its complex character as a domestic and international development strategy and offering an up to date evaluation of it In response to this complexity the book attempts to highlight the Belt and Road Initiative's double character and how it will address primary domestic development challenges that the Chinese government is facing by adding an international focus to a domestic development strategy This in turn supports the understanding of China's political economic policy and strategy formulation by reminding that supporting China's domestic development is still the primary task of its government Even as the domestic aspect of the Belt and Road Initiative is highlighted its regional and international relevance cannot be ignored either The Belt and Road Initiative will support a continuation of the persisting debate about the impact that China's rise generates and to what extent China can be characterised as a satisfied status quo power or a dissatisfied revisionist power In this context the book draws attention to the various impacts that the Belt and Road Initiative generates in different regional settings However the book also identifies some of the limitations that China's Belt and Road Initiative encounters despite the seemingly convincing economic goals it offers and explains why a few of the countries like India are resisting the lure Regionalism and Regional Security in South Asia Zahid Shahab Ahmed, 2016-04-08 Zahid Shahab Ahmed evaluates the progress of the South Asian Association for Regional Cooperation SAARC This study goes beyond economic integration to present a detailed appraisal of cooperation under the overarching themes of economic cooperation environmental security human welfare and cooperation in security matters According to the author SAARC is making progress in addressing the myriad of issues on its agenda The transition from agreements to actions and frequent interactions among the member states has boosted confidence The progress of SAARC is more evident in the less controversial areas of human security such as poverty alleviation health and safety human resources development and higher education Notwithstanding enthusiastic commitments reflected in agreements and action plans there is a gulf between rhetoric and implementation most notably in sensitive areas relating to traditional security In the light of the findings of this study the author proposes that greater cooperation in common human security areas has a potential to pave the way for a cooperation on issues of a contentious nature particularly terrorism India's Spatial Imaginations of South Asia Shibashis Chatterjee, 2018-12-14 Since India attained independence its foreign policy discourse has imagined its South Asian neighbourhood through the politics of realism This imagination explicates state interest in South Asia by establishing it as a space of sovereign territoriality Even today India's foreign and security policies are primarily shaped by geopolitical centrism and remain unaffected by economic prosperity and community concerns As a part of the Oxford International Relations in South Asia series this volume examines alternative conceptions of South Asian space in terms of geo economics and community and justifies why they have been unable to replace its dominant understanding irrespective of the political regime This volume probes reasons behind the relevance of differentiated cartography of
