Regionalism Business Interests And Public Policy

Douglas J. Forsyth, Daniel Verdier

Regionalism Business Interests And Public Policy:

The Political Construction of Business Interests Cathie Jo Martin, Duane Swank, 2012-03-30 The Political Construction of Business Interests recounts employers struggles to define their collective social identities at turning points in capitalist development

Organized Business Interests in Changing Environments J. Grote, A. Lang, V. Schneider, 2008-11-03 A book on the path dependent and path creating structures and attitudes of business interest associations in a world of Europeanization and internationalization of markets It includes empirical data on relational information used for network analytic purposes drawn from hundreds of interviews with CEOs Handbook of Business Interest Associations, Firm Size and Governance Franz Traxler, Gerhard Huemer, 2007-05-07

This Handbook presents a theory of Business Interest Associations and fifteen empirical country by country case studies in the EU The book is organized into three main parts Part I develops a theory of business associations which centres on firm size as the key explanatory variable Part II consists of country studies covering the EU 15 which are written along strictly comparable lines of analysis Part III contains the cross nationally comparative analysis The book will make essential reading for researchers working in organization studies industrial relations industrial sociology and political science as well as practitioners in related fields Regionalism, Business Interests and Public Policy William Donald Coleman, Henry J Jacek, 1989-12

This book explores and assesses the importance of the relationship between regional protest movements and the territorial organization of business interests Drawing on comparative research into business interest associations in nine countries in Europe and North America the authors show that regional differentiation is an important feature of systems of business associations in all countries This book includes case studies of countries where such movements are an important phenomenon Spain Switzerland France Belgium Canada and the UK It also includes contrasting studies from West Germany and the USA where regional movements have not been a prominent feature of national political life **Remaking the Union** Howard Elcock, Dr Michael Keating, 2013-01-11

This volume addresses the issues arising from the recent devolution referenda by exploring the historical development of the proposals the importance of national and regional identities the changing policies of the political parties and the approaches of business and other major groups towards devolution It also looks at the impact on electoral reform coming from the proposal that proportional representation be used to elect the regional assemblies and how the new assemblies are to be financed Finally the book discusses the implications of a devolved British state where different countries and regions achieve different levels of autonomy at different paces **Breakdown and Change of Private Interest Governments** Claudius Wagemann, 2014-06-23

Examines how Private Interest Governments have changed as a form of public sector economic regulation The Effectiveness of EU Business Associations J. Greenwood, 2016-01-23 This is a unique collection of papers which brings together those who work in and with EU business associations at the very highest level with many of the leading academic authors on associations over the past two decades It examines the factors that influence the effectiveness

of EU business associations and the prospects for associations and their members to influence these It is designed to appeal both to analysts of debates about interest groups collective action and European integration and to those who work in and with EU business associations

The Government and Politics of Ontario Graham White,1997-01-01 This textbook is the standard authority on the government and politics of Ontario Extensively revised and updated to reflect the early Harris era this edition also features a new section on change and continuity in the Ontario political system

Regions in Europe Patrick Le Gales,Christian Lequesne,2006-02-27 Regions in Europe explores the state of regional politics in an increasingly integrated Europe It argues that the predicted rise of increased political power at the regional level has failed to materialise and is fraught with paradox In doing so this study locates regions in relation to European integration globalisation the nation state local government and comparative and national perspectives Using case studies of the main players in Europe including Germany France UK Italy Spain the Netherlands Belgium the contributors show how and why European regions remain remarkably weak in European governance

The Origins of National Financial Systems Douglas J. Forsyth,Daniel Verdier,2003-08-29 This book poses a systematic challenge to Gerschenkron s 1950s thesis on universal banks With contributions from leading scholars including Ranald Michie and Jaime Reis it provides solid and intriguing arguments throughout

The Political Economy of Collective Skill Formation Marius R. Busemeyer,Christine Trampusch,2012 The book examines skill systems and vocational training in a number of coordinated market economies analysing historical origins and contemporary developments As well as case studies on Germany Austria Switzerland the Netherlands and Denmark it also contains comparative chapters exploring reactions to common challenges

Contemporary Capitalism J. Rogers Hollingsworth,Robert Boyer,1997 This book argues that there is no single best institutional arrangement for organizing modern societies Therefore the market should not be considered the ideal and universal arrangement for coordinating economic activity Instead the editors argue the economic institutions of capitalism exhibit a large variety of objectives and tools that complement each other and can not work in isolation The various chapters of the book ask what logics and functions institutions follow and why they emerge mature and persist in the forms they do

Transnational Financial Associations and the Governance of Global Finance Heather McKeen-Edwards,Tony Porter,2013-02-11 The role of business in global governance is now widely recognized but exploration of its role in global financial governance has been more haphazard than systematic This book provides the first comprehensive analysis of the role of transnational financial associations TFAs in the organization of global finance This book develops three theoretical themes of assemblage functionality and power as enrolment These themes challenge approaches that treat financial power as emanating from a single location or force Whilst existing approaches tend to treat TFAs as irrelevant or as merely transmitting power originating elsewhere this book argues that power must be created by painstakingly assembling actors networks and objects that are often quite autonomous and working at cross purposes to one another a process in which TFAs play a central role

The book explores these themes in chapters examining the roles of TFAs in interacting with public authorities constructing global financial markets and creating financial communities The authors additionally analyse the roles of TFAs in the European Union in the Global South and in promoting goals other than profitability including Islamic finance microfinancing savings banks and cooperatives Making a distinctive contribution to our understanding of global finance and global governance Transnational Financial Associations and the Governance of Global Finance is an important book for students and scholars of international political economy finance global governance and international relations Industrial Relations Around the World Miriam Rothman, Dennis R. Briscoe, Raoul C. Nacamura, 2017-11-07 No detailed description available for Industrial Relations Around the World Re-Forming Capitalism Wolfgang Streeck, 2010-03-04 Wolfgang Streeck has written extensively on comparative political economy and institutional theory In this book he addresses some of the key issues in this field the role of history in institutional analysis the dynamics of slow institutional change the limitations of rational design and economic functionalist explanations of institutional stability and the recurrent difficulties of restraining the effects of capitalism on social order In the classification of the Varieties of Capitalism school Germany has always been taken as the chief exemplar of a European coordinated market economy Streeck explores to what extent Germany actually conforms to this description His argument is supported by original empirical research on wage setting and wage structure the organization of business and labor in business associations and trade unions social policy public finance and corporate governance From this evidence Bringing Capitalism Back In traces the current liberalization of the postwar economy of democratic capitalism by means of an historically grounded approach to institutional change This is an important book in comparative political economy and key reading across the social sciences for academics researchers and advanced students of Political Economy Sociology comparative business systems **Homeownership, Renting and Society** Sebastian Kohl, 2017-04-07 On the eve of the financial crisis the USA was inhabited by almost 70 percent homeownership households in comparison to about 45 percent in Germany Homeownership Renting and Society presents new evidence showing that this homeownership gap already existed between American and German cities around 1900 Existing explanations based on culture government housing policy or typical socio economic factors have difficulties in accounting for these long term cross country differences Using historical case studies on Germany and the USA the book identifies three institutional domains on the supply side of the housing market urban land housing finance and construction that set countries on different housing trajectories and subsequently established differences that were hard to reverse in later periods Further chapters generalize the argument across other OECD Organisation for Economic Co operation and Development countries and extend the explanation to cover historical differences in homeownership ideology and horizontal property institutions This enlightening volume also puts forward path dependence theories in housing studies connects housing with vast urban history and political economy literature and offers comprehensive insights about the case of a tenant s country which contradicts the tendency

towards universal homeownership Providing an all new historic institutionalist explanation of the German American homeownership gap this title will be of interest to postgraduate students and scholars interested in fields including Housing Studies Sociology Urban History Political Economy Social Policy and Geography It may also be of interest to those working in housing field organizations and ministries **Varieties of Capitalism, Varieties of Approaches** D. Coates,2005-01-25

Though the emerging sub discipline of comparative political economy is now rich in studies of different advanced capitalisms it still lacks a systematic consideration of the organizing frameworks and methodologies underpinning those studies This definitive volume outlines the two great debates currently shaping the analysis of advanced capitalism It makes the case for a greater awareness of underlying theoretical issues in the design of empirical research and demonstrates the value of exploring the interconnections between competing intellectual approaches Pathways to Industrialization and Regional Development Allen J. Scott,Michael Storper,2005-09-27

The paradigm of mass production has given way to radically new forms of organizing industrial production based primarily on the need to foster continuous redesign of products and processes in the face of intensified competition This change which is designed to engender continuous adaptive learning in production systems requires considerable organizational flexibility The mass production systems constructed in the early post war period foundered in the face of new forms of competition which put a premium on learning and flexibility

Environment & Planning ,2004 **Cities in Contemporary Europe** Arnaldo Bagnasco,Patrick Le Galès,2000-05-11 European cities are at the centre of social political and economic changes in Western Europe This book proposes a new research agenda in urban sociology and politics applying primarily to European cities in particular those that together make up the urban structure of Europe a fabric of older cities of over 100 000 inhabitants regional capitals and smaller state capitals The contributors develop an analytical framework which views cities as local societies and as collective factors and site for modes of governance The three parts of the book examine the economics of cities the social structures and the modes and processes of governance Each chapter comprises a comparison across several countries and examines critically the book's central theoretical perspective This is not a book about the making of a Europe of cities but rather about how some cities can take advantage of their changing global and European environment

Regionalism Business Interests And Public Policy Book Review: Unveiling the Power of Words

In a global driven by information and connectivity, the ability of words has are more evident than ever. They have the ability to inspire, provoke, and ignite change.
