Regionalism In Europe Geometries And Strategies After 2000:

Regionalism in Europe Jürgen von Hagen, Mika Widgren, 2012-12-06 Over the past 40 years the European Union has been a great force of attraction for new members At the same time it has entered a host of bilateral and multilateral regional agreements with non member countries The result of these developments is a rather unique form of regionalism in Europe consisting of deep integration within the European Union and a network of sometimes overlapping arrangements involving the Union Regionalism in Europe Geometries and Strategies After 2000 brings together a collection of studies of the nature and the implications of this unique regionalism in Europe written by a group of renowned economists from various countries The issues discussed in this book range from theoretical and institutional aspects to empirical studies of the EU's regional policy the regional implications of European Monetary Union and empirical studies of the trade and welfare effects of regional arrangements between the EU and other countries

Preferential Trade Agreements Kyle W. Bagwell, Petros C. Mavroidis, 2011-03-07 This volume assembles a stellar group of scholars and experts to examine preferential trade agreements PTAs a topic that has time and again attracted the interest of analysts It presents a discussion of the evolving economic analysis regarding PTAs and the various dysfunctions that continually place them among the priority items for re negotiation by the WTO The book explores recent empirical research that casts doubt on the old trade diversion school and debates why the WTO should deal with PTAs and if PTAs belong under the mandate of the WTO as we now know it

Basic Legal Instruments for the Liberalisation of Trade Federico Ortino, 2004-01-30 The interpretation and application of the rules of international and regional trade is becoming an increasingly specialised field This study provides an in depth analysis of the core legal concepts characterising the two most prominent and successful efforts in the regulation of international trade to date Adopting a comparative method it analyses the basic legal instruments employed by the EU and the WTO for the purpose of liberalising trade in goods among their respective Members To this end this study offers a fresh look at the principles underlying the basic rules of international trade law including the prohibition of border measures the principle of non discrimination on grounds of nationality and the principle of reasonableness

Integration, Growth, and Cohesion in an Enlarged European Union John Bradley, George G. Petrakos, Julia Traistaru, 2005-12-28 This book contributes fresh theoretical and empirical evidence on patterns of regional production structures specialization regional disparities convergence and divergence processes and evaluation of cohesion policies in both current and future European Union EU member states in the context of increased integration These subjects are addressed in both individual and cross country analyses using innovative methodologies The book is an essential reading for a large audience including researchers and policy makers working in the fields of economic integration transition economics and regional development The thirteen contributions brought together in this book are the result of recent research undertaken in the framework of a larger project initiated and coordinated by the Center for European Integration Studies ZEI of the University of Bonn on determinants of

regional specialization growth and convergence in the context of European integration A number of these papers were presented to a conference on European integration regional convergence location of industrial activity and labour market adjustment initiated by the Center for European Integration Studies of the University of Bonn and organized jointly with the Center for European Studies of the University Alexandru Ioan Cuza of Iasi Romania We gratefully acknowledge the financial support from the European Commission Framework Programme and the Center for European Integration Studies of the University of Bonn

Environmental Integration in the EU's External Relations Gracia Marín Durán, Elisa Morgera, 2012-03-16 The book examines the integration of environmental protection requirements into EU external relations focusing on unilateral bilateral and inter regional instruments which have been less explored than the multilateral dimension of EU environmental policy The book also explores for the first time the complex interplay and mutual influences between EU environmental integration initiatives and environmental multilateralism On the one hand it identifies the legal and other instruments used by the EU to support the implementation of multilateral environmental agreements in third countries particularly developing ones On the other hand it singles out the legal and other tools employed by the EU as a means to build partnerships with third countries in order to influence ongoing multilateral negotiations concerning the environment and sustainable development or to contribute to the development of new international environmental norms in the absence of such multilateral negotiations Ultimately the book traces the significant evolution of the various tools deployed by the EU to integrate environmental concerns in its external relations with a view to identifying emerging challenges and future directions

Global Economic Prospects 2005, 2004 This annual publication analyses the global and national dimensions of the investment climate for developing countries in terms of the policy and institutional environment This edition examines the growth of regional trade agreements which have risen eight fold in two decades with currently as much as 40 percent of global trade taking place among countries that have some form of reciprocal regional trade agreement Issues discussed include regional trading trends effects of regional agreements on trade creation trade facilitation and services investment intellectual property rights and labour mobility whether the proliferation of agreements poses risks for multilateral trading system and if so options for managing them The report finds that agreements leading to open regionalism that is deeper integration of trade as a result of low external tariffs increased services competition and efforts to reduce cross border and customs delays costs are effective as part of a larger trade strategy to promote growth Although regional agreements can prove beneficial to member countries they can have adverse effects on excluded countries and the lowering of border barriers around the world is crucial to minimising these effects The completion of the Doha Development Agenda by all WTO countries will reduce the risk of trade diversion associated with regional agreements and will decrease trade losses of countries excluded from agreements

Patents and Global Administrative Law David Tilt, 2025-07-18 The book applies values and concepts from Global Administrative Law GAL to international patent law demonstrating how limiting

technocratic and overly economic language can be Highlighting the administrative foundations of patent law the book argues that in its international form it can be analysed using the same principles of participation transparency and accountability found in national administrative law At the heart of the book is a simple question What does international patent law look like when we approach it through the lens of these values What is being left out when patent law is described predominantly in terms of its technical legal provisions or economic impact The book presents three interrelated contexts EU patent law bilateral trade agreements and the multilateral space Modern patent law is increasingly discussed in terms of national competitiveness or economic potential which reveals only a narrow understanding of how patent law evolves and functions The vocabulary of administrative law provides a fresh way of recasting reframing and re describing the dynamics of international patent law in a way that is more accessible to those outside of a traditional patent scholarship audience A fundamental objective of the book is to challenge the tendency towards technocratic isolation in patent law The book uses accessible vocabulary and represents a new way of conceptualising and understanding how patent law develops on a global scale The book will be of interest to researchers in the field of patent law international law and administrative law

The European Union's Mediterranean Policy: Model or Muddle? K. Knio, 2013-11-15 By analysing case studies through the lens of new constructivist Institutional perspective this book sheds new light on the failure of EU policies in the Mediterranean It suggests that these failures are the result of problems at the very heart of EU policy making which clearly privilege economic concerns over social concerns

The World Economy, Global Trade Policy 2004 David Greenaway, 2009-02-04 This volume is the eleventh in an annual series in which Top economists provide a concise and accessible evaluation of major developments in trade and trade policy Examines key issues pertinent to the multinational trading system as well as regional trade arrangements and policy developments at the national level Provides up to date assessments of the World Trade Organization's current Trade Policy Reviews

Political Economy of Transition and Development Nauro F. Campos, Jan Fidrmuc, 2003-11-30 Political Economy of Transition and Development collects the proceedings of an international conference that brought the leading thinkers in this field to the Center for European Integration Studies of the University of Bonn in May 2002 The contributions analyze the various interactions between institutions policy choices economic developments and political outcomes in transition and developing countries The first five chapters give a relatively broad assessment of the various reform paths and outcomes in the transition and developing countries The remaining eight chapters proceed to analyze important aspects of transition such as voting behavior political regime choice corruption social capital growth and inequality and EU enlargement The resulting volume thus combines a bird's eye perspective with a relatively narrow focus on selected key issues pertaining to the ongoing transition process in Central and Eastern Europe

WTO Negotiations and Agricultural Trade Liberalization Eugenio Díaz-Bonilla, Søren Elkjær Frandsen, Sherman Robinson, 2006-01-01 Based on original research by the Food and Resource Economic Institute in

Denmark and the International Food Policy Research Institute in Washington DC this book addresses the controversial issue of the effects of developed countries agricultural policies on developing countries Written from the perspective of developing countries it addresses the main issues raised by developing countries governments politicians farmers organizations NGO s trade specialists and development specialists It focuses on the key issues of food security poverty regional agreements multifunctionality in agriculture and the trade of genetically modified products as an input to policy reform within the World Trade Organization trade negotiations From the Athenian Tetradrachm to the Euro Gérassimos Notaras,2017-11-28 With the introduction of the euro much recent attention has been focused on the role of currencies and their national and international significance Whilst much has been made of the euro s achievements in harmonising Europe s financial dealings it is often forgotten that it is by no means the first pan national currency to enter circulation Indeed as the various contributions to this volume make plain the euro can in many ways be regarded as a step back to the future that is a further international currency in a long historical tradition that includes the Athenian tetradrachm the Spanish peso and the French franc Covering a timespan of some two and a half millennia the contributions within this volume fall within four broad chronological sections the first comprising three contributions that consider aspects of the European experience from classical antiquity until the high middle ages The discussion then leaps forward chronologically to the modern age given a focus by three contributions devoted to nineteenth century European developments These in turn are set within a wider spatial perspective by two essays that review first the classical gold standard primarily in terms of peripheral economies experience and second the Bretton Woods system Fourth and lastly the euro s origins and birth are explored in three further contributions By taking such a long term view of supra national currencies this volume provides a unique perspective not only to the introduction and development of the euro and its predecessors but also on the broader question of the relationship between trade and common currencies *Fiscal Federalism in Unitary States* Per Molander,2012-12-06 Decentralism of political power to regions and local government occurs worldwide in response to demands from the periphery Such devolution of power raises a number of problems political financial and legal By gathering together important papers from a series of workshops sponsored by the SNS Constitutional Project and the Center for European Integration Studies this volume presents a number of these problems from a truly interdisciplinary perspective The authors believe that fiscal federalism while originating in formally federal states is relevant also to the analysis of state local relationships in unitary states with some degree of regional or local authority Among the topics they cover are the division of responsibilities and powers of taxation bailouts systems of equalization and state grants as well as problems related to democracy and citizens rights While the book s primary focus is Nordic its international perspective is enhanced by contributions from Europe Canada and the U S *Managing Conflict in Facility Siting* Sidney Hayden Lesbirel,Daigee Shaw,2005-01-01 The book addresses a growing policy problem confronting all democratic nations By exploring the lessons to be learned from

international siting experiences it will prove invaluable reading for academics policymakers government agencies NGOs and other societal interests involved in environmental and siting issues **BOOK JACKET** **From the Athenian Tetradrachm to the Euro** P. L. Cottrell, Gerasimos Notaras, Gabriel Tortella Casares, With the introduction of the euro much recent attention has been focused on the role of currencies and their national and international significance Covering a time span of some two and a half millennia the contributions within this volume consider aspects of the European experience from classical antiquity until the beginning of the twenty first century **Annual World Bank Conference on Development Economics 2003** World Bank, Boris Pleskovi?, Nicholas Stern, 2003 This annual conference is a global gathering of the world s leading scholars and development practitioners Among the attendees are participants from developing countries universities think tanks NGOs and international financial institutions These papers concentrate on issues like trade and poverty Africa s future rural or industrial development education and empowerment and investment climate and productivity **Policies Facilitating Firm Adjustment to Globalization** Bernard M. Hoekman, 2004 Abstract Hoekman and Javorcik focus on policies facilitating firm adjustment to globalization They briefly review the effects of trade and investment liberalization on firms focusing on within industry effects They postulate that governments role in supporting the process is to 1 ensure that firms face right incentives to adjust and 2 intervene in areas where market failures are present Their main message is that while many policies could be adopted to address market failures they need to be carefully designed and implemented in a stable macroeconomic environment An institutional infrastructure that supports the functioning of modern markets is most important Proactive support policies of whatever stripe should be subject to cost benefit analysis based on the existence of an identified market failure and monitored for performance and cost effectiveness Transparency and accountability are critical in ensuring that interventions accomplish their intended objectives rather than being vehicles for rent seeking This paper a product of the Trade Team Development Research Group is part of a larger effort in the group to examine the effects of globalization on developing countries World Bank web site Services Trade and Growth Aaditya Mattoo, *Liberalizing Trade in Services* Bernard M. Hoekman, 2006 Abstract Since the mid 1980s a substantial amount of research has been undertaken on trade in services Much of this is inspired by the World Trade Organization or regional trade agreements especially the European Union but an increasing number of papers focus on the impacts of services sector liberalization This paper surveys the literature focusing on contributions that investigate the determinants of international trade and investment in services the potential gains from greater trade and liberalization and efforts to cooperate to achieve such liberalization through trade agreements It concludes that there is increasing evidence that services liberalization is an important source of potential welfare gains but relatively little research has been done that can inform the design of international cooperation both trade agreements and development assistance so as to more effectively promote development objectives **Research Handbook in International Economic Law** Andrew T. Guzm³4n, A. O. Sykes, 2008-01-01 This major new work consists of

carefully commissioned original and incisive contributions from leading scholars in the field of international economic law
Covering a full range of topics the Handbook provides an accessible treatment of the law in each area as well as a thoughtful
synthesis and discussion of related public policy issues from a broadly social science perspective
