book reports on cutting edge research into innovative system interfaces emphasizing both lifecycle development and human technology interaction especially in virtual augmented and mixed reality systems It describes advanced methodologies and

tools for evaluating and improving interface usability and discusses new models as well as case studies and good practices. The book addresses the human hardware and software factors in the process of developing interfaces for optimizing total system performance particularly innovative computing technologies for teams dealing with dynamic environments while minimizing total ownership costs. It also highlights the forces currently shaping the nature of computing and systems including the need for decreasing hardware costs, the importance of portability which translates to the modern tendency toward hardware miniaturization and technologies for reducing power requirements, the necessity of a better assimilation of computation in the environment and social concerns regarding access to computers and systems for people with special needs. The book which is based on the AHFE 2017 International Conference on Human Factors and System Interactions held on July 17-21, 2017 in Los Angeles, California, USA, offers a timely survey and practice-oriented guide for systems interface users and developers alike.

Oxford Desk Reference: Major Trauma Jason Smith, Ian Greaves, Keith Porter, 2010-11-11

The Oxford Desk Reference Major Trauma is the missing link between basic trauma management and advanced specialist care. Advanced Trauma Life Support courses have revolutionised trauma care in the last 3 decades but there is little advice for the key decision makers in trauma care once the primary and secondary surveys are complete. This volume is a practical and evidence-based desk reference giving a comprehensive walk through from the initial phases of injury through key decision making in the resuscitation room to surgical principles and rehabilitation. Including chapters on damage control, ballistic and blast injuries and bariatric trauma, this text covers all the main areas of trauma care necessary for the trauma specialist in the 21st Century. The Oxford Desk Reference emphasises practical help but also covers the evidence and science behind trauma management. It includes the most up-to-date guidance from national bodies making recommendations for trauma care using an international team of contributing authors. This book will become an essential tool for everyday use in the management of trauma.
