Public Space Matthew Carmona, Claudio de Magalhães, Leo

Hammond, 2008-06-03 In both the UK and the US there is a sense of dissatisfaction and pessimism about the state of urban environments particularly with the quality of everyday public spaces Explanations for this have emphasized the poor quality of design that characterizes many new public spaces spaces that are dominated by parking roads infrastructure introspective buildings a lack of enclosure and a poor sense of place and which in different ways for different groups are too often exclusionary Yet many well designed public spaces have also experienced decline and neglect as the services and activities upon which the continuing quality of those spaces have been subject to the same constraints and pressures for change as public services in general These issues touch upon the daily management of public space that is the coordination of the many different activities that constantly define and redefine the characteristics and quality of public space This book draws on three empirical projects to examine the questions of public space management on an international stage They are set within a context of theoretical debates about public space its history contemporary patterns of use and changing nature in western society and about the new management approaches that are increasingly being adopted

The Palgrave Handbook of Bottom-Up Urbanism Mahyar Arefi, Conrad Kickert, 2018-06-27 Who shapes our cities In an age of increasing urban pluralism globalization and immigration decreasing public budgets and an ongoing crisis of authority among designers and planners the urban environment is shaped by a number of non traditional stakeholders The book surveys the kaleidoscope of views on the agency of urbanism providing an overview of the various scholarly debates and territories that pertain to bottom up efforts such as everyday urbanism DIY urbanism guerilla urbanism tactical urbanism and lean urbanism Uniquely this book seeks connections between the various movements by curating a range of views on the past present and future of bottom up urbanism The contributors also connect the recent trend of bottom up efforts in the West with urban informality in the Global South drawing parallels and finding contrast between social and institutional structures across the globe The book appeals to urbanists in the widest sense of the word those who shape study and improve our urban spaces

City Rules

Emily Talen, 2012-06-22 City Rules offers a challenge to students and professionals in urban planning design and policy to change the rules of city building using regulations to reinvigorate rather than stifle our communities Emily Talen demonstrates that regulations are a primary detriment to the creation of a desirable urban form While many contemporary codes encourage sprawl and even urban blight that hasn't always been the case and it shouldn't be in the future Talen provides a visually rich history showing how certain eras used rules to produce beautiful walkable and sustainable

communities while others created just the opposite She makes complex regulations understandable demystifying city rules like zoning and illustrating how written codes translate into real world consequences Most importantly Talen proposes changes to these rules that will actually enhance communities freedom to develop unique spaces **Design Governance** Matthew Carmona, Claudio De Magalhães, Lucy Natarajan, 2016-12-19 Design Governance focuses on how we design the built environment where most of us live work and play and the role of government in that process To do so it draws on the experience of the Commission for Architecture and the Built Environment CABI a decade long globally unique experiment in the governance of design This book theorises design governance as an arm and aspiration of the state tells the story of CABI warts and all and what came before and after unpacks CABI s informal toolbox its methods and processes of design governance and reflects on the effectiveness and legitimacy of design as a tool of modern day government The result is a new set of concepts through which to understand the governance of design as a distinct and important sub field of urban design

Cities as Multiple Landscapes Christina Antenhofer, Günter Bischof, Robert L. Dupont, Ulrich Leitner, 2016-10-13 Im Zentrum dieses Buches stehen Geschichte Materialität Mikrolandschaften und Atmosphären der Partnerstädte Innsbruck und New Orleans Dabei stellen sich die Autorinnen und Autoren auf das Konzept der multiplen Landschaften The Informal American City Vinit Mukhija, Anastasia Loukaitou-Sideris, 2014-05-16 An examination of informal urban activities including street vending garage sales and unpermitted housing that explores their complexity and addresses related planning and regulatory issues Every day in American cities street vendors spread out their wares on sidewalks food trucks serve lunch from the curb and homeowners hold sales in their front yards examples of the wide range of informal activities that take place largely beyond the reach of government regulation This book examines the informal revolution in American urban life exploring a proliferating phenomenon often associated with developing countries rather than industrialized ones and often dismissed by planners and policy makers as marginal or even criminal The case studies and analysis in The Informal City challenge this narrow conception of informal urbanism The chapters look at informal urbanism across the country empirically and theoretically in cities that include Los Angeles Sacramento Seattle Portland Phoenix Kansas City Atlantic City and New York City They cover activities that range from unpermitted in law apartments and ad hoc support for homeless citizens to urban agriculture street vending and day labor The contributors consider the nature and underlying logic of these activities argue for a spatial understanding of informality and its varied settings and discuss regulatory planning and community responses Contributors Jacob Avery Ginny Browne Matt Covert Margaret Crawford Will Dominie Renia Ehrenfeucht Jeffrey Hou Nabil Kamel Gregg Kettles Anastasia Loukaitou Sideris Kate Mayerson Alfonso Morales Vinit Mukhija Michael Rios Donald Shoup Abel Valenzuela Jr Mark Vallianatos Peter M Ward **Questioning Architectural Judgment** Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment particularly in the realm of architectural techniques and the codes that regulate it The struggle to define sustainability and thus judge architecture through

such lenses is but one dimension of the contemporary problem of judgment. By providing the reader with an inherently interdisciplinary study of a particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline. By situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded. The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book.

Bathroom Battlegrounds Alexander K. Davis, 2020-01-28 Today's debates about transgender inclusion and public restrooms may seem unmistakably contemporary but they have a surprisingly long and storied history in the United States one that concerns more than mere potty politics. Alexander K. Davis takes readers behind the scenes of two hundred years worth of conflicts over the existence separation and equity of gendered public restrooms documenting at each step how bathrooms have been entangled with bigger cultural matters the importance of the public good the reach of institutional inclusion the nature of gender difference and above all the myriad privileges of social status. Chronicling the debut of nineteenth century comfort stations twentieth century mandates requiring equal but separate men's and women's rooms and twenty first century uproar over laws like North Carolina's bathroom bill Davis reveals how public restrooms are far from marginal or unimportant social spaces. Instead they are and always have been consequential sites in which ideology institutions and inequality collide.

Quality-of-Life Community Indicators for Parks, Recreation and Tourism Management Megha Budruk, Rhonda Phillips, 2010-11-25 While community quality of life indicators are gaining much needed attention in both scholarly work and practice their application in the areas of parks recreation and tourism management are not as well known. The applicability of indicator systems for natural resource and natural resource area management within the parks and recreation arena is very high including urban parks and recreation programs and their influence on quality of life. Tourism is also an area that needs much more work in terms of assessing impacts as well as developing indicators for gauging progress in the long term. All three areas are an integrated discipline and most programs throughout the developed world are housed jointly. There are several researchers across the globe who are conducting innovative work in these areas. The editors feel that a volume on the topic will spur additional interests as well as serve to lead the research efforts.

Topics and Methods for Urban and Landscape Design Roberta Ingaramo, Angioletta Voghera, 2017-03-27 This book combines urban planning and architectural tools in an attempt to overcome the limitations of sectoral measures. In this perspective it offers a forum for the debate of different approaches used by schools of planning and architecture. It explores strategies by drawing from the potential contributions of cognitive models for decisions the role of utopian thinking and retrofitting actions and their interconnectedness the role of cultural legacy for urban and landscape design the design perspectives about public spaces and the role of architecture design and urban and regional planning for landscape quality.

The book also discusses on design as a process of decision making that operates as an act of empathy that aligns with human and ecological values emotional physical and socio cultural Each planning and design act has different possible effects able to help making clear strategic and local actions contributing to community empowerment and to landscape and local governance Design activity along the river and multiple experiences design processes urban fringe design agri urban models river parks UNESCO sites River Contracts greenbelts and ecological networks through reflection on design roles helping to understand the design process and its results at different scales Roberta Ingaramo architect PhD is Assistant Professor in Architectural and Urban Design Department of Architecture and Design DAD Polytechnic University of Turin Italy Master in Conservation of Historic Towns and Buildings Katholieke Universiteit Belgium roberta.ingaramo@polito.it Angioletta Voghera architect PhD is Associate Professor of Urban and Regional Planning Inter university Department of Urban and Regional Studies and Planning DIST Polytechnic University of Turin Italy angioletta.voghera@polito.it

Understanding Cities Alexander Cuthbert, 2011-06-06 Understanding Cities is richly textured complex and challenging It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design Using spatial political economy as his most important reference point Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau's concept of heterology thinking about thinking and on the framework of his previous books Designing Cities and The Form of Cities Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts Overall the trilogy allows a new field of urban design to emerge Pre existing and new knowledge are integrated across all three volumes of which Understanding Cities is the culminating text

Environmental Regulations and Housing Costs Arthur C. Nelson, John Randolph, James M. McElfish, Joseph M. Schilling, Jonathan Logan, LLC Newport Partners, 2012-06-22 Many communities across the nation still lack affordable housing And many officials continue to claim that affordable housing is an oxymoron Building inexpensively is impossible they say because there are too many regulations Required environmental impact statements and habitat protection laws they contend drive up the costs of construction But is this actually true In a comprehensive study of the question the authors of this eye opening book separate fact from myth With admirable clarity they describe the policy debate from its beginning review the economic theory trace the evolution of development regulation and summarize the major research on the topic In addition they offer their own research accompanied by a case study of two strikingly different Washington D C suburbs They also include results of focus groups conducted in Dallas Denver and Tucson The authors find that environmental regulatory costs as a share of total costs and processes are about the same now as they were thirty years ago even though there are far more regulations

today They find too that environmental regulations may actually create benefits that could improve the value of housing Although they conclude that regulations do not appear to drive up housing costs more now than in the past they do offer recommendations of ways in which the processes associated with regulations including review procedures could be improved and could result in cost savings Intended primarily for professionals who are involved in or impacted by regulations from public officials planners and engineers to housing developers and community activists this book will provide useful insights and data to anyone who wants to know if and how American housing can actually be made affordable
