in contrary to the Western cultures and monotheistic religions believe that there is life after death and before the present life there was a beforelife because they believe that it does not make sense that people suddenly appear from nowhere meaning not the biological body but the soul or the spirit First a definition of the different concepts of afterlife in different metaphysical models and of the term reincarnation from its semantic point of view and how it is defined in other religions will be given Furthermore Hinduism itself will be introduced as it is important to understand the essence of this religion to be able to understand the concept of reincarnation Additionally the concept of reincarnation will be described That includes the processes of birth death and rebirth Finally the arguments in favor and against the theory of reincarnation will be discussed The question about what happens after death is a philosophical one which has been worrying humanity for centuries By trying to categorize the different concepts regarding what happens after death three concepts varying among cultures and religions can be differentiated First there is the concept of denial which states that the existence of the individual ends with their death as it is widely believed in the Western world The second one is the concept of completion in many religions as for example in Christianity the human life is seen as a preparation for a life after somewhere else in a different state of existence like Heaven Hell Purgatory Limbus etc And the third concept is the concept of rebirth meaning that the mental part of the person may it be called the soul or the spirit is reborn many times in new bodies on earth **Karma, Reincarnation and Rebirth**
