## **Reinterpreting Property:**

**Reinterpreting Property** Margaret Jane Radin, 1993 This collection of essays by one of the country's leading property theorists revitalizes the liberal personality theory of property Departing from traditional libertarian and economic theories of property Margaret Jane Radin argues that the law should take into account nonmonetary personal value attached to property and that some things such as bodily integrity are so personal they should not be considered property at all Gathered here are pieces ranging from Radin's classic early essay on property and personhood to her recent works on governmental taking of private property Margaret Jane Radin is professor of law at Stanford University She is the author of over twenty five articles on legal and political theory

**The Making of Australian Property Law** A. R. Buck, 2006 In 1847 in one of the most important cases in Australian legal history the Chief Justice of NSW Sir Alfred Stephen handed down a decision that would have profound implications for both the development of Australian property law and the property rights of the Aboriginal peoples of Australia The case was *Attorney General v Brown* and in his decision Stephen CJ ruled that the laws of property in Australia were governed by feudal principles The shadow cast by *Attorney General v Brown* has been a long one stretching down to the decision in *Mabo* and beyond Judicial thinking and much legal scholarship continues to emphasise a connection between the feudal origins of the English law and the state of contemporary Australian property law thereby perpetuating a nostalgic view of Australian property law This book in contrast argues that the feudal imprint on property in Australia had been washed away by the early 1860s and that the decades of the early nineteenth century witnessed the making of a distinct Australian property law Egalitarianism rather than feudalism this book argues shaped the emergence of Australian property law This book situates legal development in its social and political context re evaluating the relationship between political ideas social values and law reform in early Australia

The Idea of Home in Law Lorna Fox O'Mahony, James A. Sweeney, 2016-03-03 *The Idea of Home in Law* Displacement and Dispossession explores an important set of legal and policy issues surrounding the concepts of home and homelessness taking a growing area of legal scholarship into the new arena of human rights and international law The collection considers the ideas concerning home both in the sense of the dwelling place as a special type of property and territorial claims to homeland which underpin many contemporary legal problems by examining a range of contexts where people are displaced

or dispossessed from their homes The essays focusing on dispossession consider themes ranging from mortgage and rent arrears in the UK to responses to the foreclosure crisis in the USA and from eviction for the purposes of economic development in South Africa to the exclusion of asylum seekers from the UK's social housing and welfare provision and within the framework of the European Convention on Human Rights The displacement theme meanwhile examines transnational home issues from the experiences of exiles and refugees in areas of conflict to the impact of the broader context of economic social and cultural rights on attempts to protect housing and home through international law At the heart of each essay the contributors experts from across the fields of law policy and housing rights examine the circumstances in which displacement and dispossession take place and reconsider how law and policy respond to such circumstances with a particular focus on the impact of loss of home for the human person At a time of particular and increasing concern about security of tenure and the role of law and policy in protecting people who are vulnerable to forced eviction *The Idea of Home in Law* presents a bold opportunity to raise questions about the rights and norms associated with housing and home and to generate new insights for scholarship and for national and international policy debates concerning displacement and dispossession

*Civic Republicanism and the Properties of Democracy* Erik J. Olsen, 2006-01-01 Taking the revival of civic republicanism as his point of departure Erik Olsen examines the relationship between property civic virtue and democracy in post socialist political thought Steering a course between the crass materialism that post socialists criticize and their own post materialist perspective Olsen outlines a theory of democratic stakeholding in which citizens have rights of inhabitation in their commonwealth

**Conceptualising Home** Lorna Fox O'Mahony, 2006-12-01 It is difficult to overstate the everyday importance of home in law Home provides the backdrop for our lives and is often the scene or the subject of legal disputes In addition in recent decades there has been growing academic interest in the meaning of home which has prompted empirical studies and theoretical exploration in a wide range of disciplines Yet while the authenticity of home as a social psychological cultural and emotional phenomenon has been recognised in other disciplines it has not penetrated the legal domain where the proposition that home can encapsulate meanings beyond the physical structure of the house or the capital value it represents continues to present conceptual difficulties This book focuses on the competing interests of creditors who lend money against the security of the property and the occupiers who dwell in the property in the context of possession actions By mapping the concept of home as it has evolved in other disciplines against existing legal frameworks *Conceptualising Home* examines the possibilities for developing a coherent concept of home in law

**Modernism and Copyright** Paul K. Saint-Amour, 2011 How was modernism shaped from its beginning by intellectual property law What role did the law's imperial and transatlantic asymmetries play in modernism's dissemination How did various modernists exploit reform and avoid copyright And how is the study of modernism today being affected by expanding copyright regimes Modernism and Copyright is the first book to take up these questions A truly multi disciplinary study it brings together essays by scholars of literature theater cinema music and law as well as by practicing lawyers and caretakers of modernist literary estates Its contributors' methods are as diverse as the works they discuss Ezra Pound's copyright statute and Charlie Parker's bebop compositions feature here as do early Chaplin films *EverQuest* and the Madison Avenue memo As our portrait of modernism expands and fragments Modernism and Copyright locates works such as these on one of the few landscapes they all clearly share the uneven terrain of intellectual property law

*The Triumph of Venus* Jeanne Lorraine Schroeder, 2004-02-23 The theory of law and economics that dominates American jurisprudence today views the market as rational and individuals as driven by the desire to increase their wealth It is a view riddled with misconceptions as Jeanne Lorraine Schroeder demonstrates in this challenging work which looks at contemporary debates in legal theory through the lens of psychoanalysis and continental philosophy Through metaphors drawn from classical mythology and interpreted via Lacanian psychoanalysis and Hegelian philosophy Schroeder exposes the hidden and repressed erotics of the market Her work shows how the predominant economic analysis of markets and the standard romantic critique of markets are in fact mirror images reflecting the misconception that reason and passion are inalterably opposed

*Beyond the Carbon Economy* Don Zillman, Catherine Redgwell, Yinka Omorogbe, Lila K. Barrera-Hernández, 2008-03-06 The present energy economy with its heavy dependence on fossil fuels is not sustainable over the medium to long term for many interconnected reasons Climate change is now recognized as posing a serious threat Energy and resource decisions involving the carbon fuels therefore play a large role in this threat Fossil fuel reserves may also be running short and many of the major reserves are in politically unstable parts of the world Yet citizens in nations with rapidly developing economies aspire to the benefits of the modern energy economy China and India alone have 2.4 billion potential customers for cars industries and electrical services Even so more than half of the world's citizens still lack access to energy Decisions involving fossil fuels are therefore a significant part of the development equation This volume explains how the law can impede or advance

the shift to a world energy picture significantly different from that which exists today It first examines the factors that create the problems of the present carbon economy including environmental concerns and development goals It then provides international and regional legal perspectives examining public international law regional legal structures the responses of international legal bodies and the role of major international nongovernmental actors The book then moves on to explore sectoral perspectives including the variety of renewable energy sources new carbon fuels nuclear power demand controls and energy efficiency Finally the authors examine how particular States are could or should be adapting legally to the challenges of moving beyond the carbon economy *Law and Economics for Civil Law Systems* Mackaay, Ejan,2021-11-18

**The Complexity of Human Rights** Philip Alston,2024-02-08 This book provides the first systematic assessment from a human rights law perspective of the landmark contributions of the renowned legal anthropologist Sally Engle Merry What impact does over simplification have on human rights debates The understandable tendency to present them as a single universal and immutable concept ignores their complexity and by extension only serves to weaken them Merry and her colleagues transformed human rights thinking by highlighting the process of vernacularization which sees rights discourse as being unavoidably dependent upon translation and interpretation She also warned of the pitfalls of excessive reliance upon statistical and other indicators through the process of quantification Here the leading voices in the field assess the significance of these contributions
