Rethinking America's Highways Robert W. Poole,2018-08-03 A transportation expert makes a provocative case for changing the nation s approach to highways offering bold innovative thinking on infrastructure Rick Geddes Cornell University Americans spend hours every day sitting in traffic And the roads they idle on are often rough and potholed with exits tunnels guardrails and bridges in terrible disrepair According to transportation expert Robert Poole this congestion and deterioration are outcomes of the way America manages its highways Our twentieth century model overly politicizes highway investment decisions short changing maintenance and often investing in projects whose costs exceed their benefits In Rethinking America s Highways Poole examines how our current model of state owned highways came about and why it is failing to satisfy its customers He argues for a new model that treats highways themselves as public utilities like electricity telephones and water supply If highways were provided commercially Poole argues people would pay for highways based on how much they used and the companies would issue revenue bonds to invest in facilities people were willing to pay for Arguing for highway investments to be motivated by economic rather than political factors this book makes a carefully reasoned and well documented case for a new approach to highways      North American Odyssey Craig E. **For All Eyes Only** Bunny Herschensohn, 2020-09-11 FOR ALL EYES ONLY This book is a compilation of spontaneous political blogs written during the Obama Presidential period It is through these blogs there appears to be a remarkable unparalleled similarity between the differential political turbulence we face today and the systemic agenda that was aggressively pursuant during the Obama years However in no way do these blogs expose specific revelations on the previous Administration s wrongdoings being reported today by professional investigative lawmakers This book s blogs simply reflect my personal observations on issues in the past that normalized radical life changing reforms to our system forever through subtle pretext but devious intent

**Prophetic Poetry** Ronald L. Faust, 2010-01-01 This poetry becomes an agent of transformation in offering a new direction for our lives It provokes a little holy agitation by tossing poems like pebbles into placid pools of water to cause some waves Such poetry gives us prophetic alerts to pay attention to things that matter like peace not war like economic and immigrant justice like an earthy passion for life more than death This book of poems describes a link between poets and peacemakers Maybe peacemakers are like insurgent poets Irrelevant dissident disregarding the status quo Imagining a vision of a world that gets along This poetry too dangerous for right wing religion will offer a resource for church activists and for taking the next step of courage It will be a companion for marching to a different drummer and hearing the still voice of God amplified through ordinary occasions

**A Critical History of the New American Studies, 1970-1990** Günter H. Lenz, 2016-12-06 Starting in 2005 Gunter H Lenz began preparing a book length exploration of the transformation of the field of American Studies in the crucial years between 1970

and 1990 As a commentator on contributor to and participant in the intellectual and institutional changes in his field Lenz was well situated to offer a comprehensive and balanced interpretation of that seminal era Building on essays he wrote while these changes were ongoing he shows how the revolution in theory the emergence of postmodern socioeconomic conditions the increasing globalization of everyday life and postcolonial responses to continuing and new forms of colonial domination had transformed American Studies as a discipline focused on the distinctive qualities of the United States to a field encompassing the many different Americas in the Western Hemisphere as well as how this complex region influenced and was interpreted by the rest of the world In tracking the shift of American Studies from its exceptionalist bias to its unmanageable global responsibilities Lenz shows the crucial roles played by the 1930s Left in the U S the Frankfurt School in Germany and elsewhere between 1930 and 1960 Continental post structuralism neo Marxism and post colonialism Lenz s friends and colleagues now his editors present here his final backward glance at a critical period in American Studies and the birth of the Transnational

Standing on the Premises of God Fritz Detwiler, 1999-12 The Christian Right is arguably the most significant social movement in the United States today In recent years these religious conservatives have loudly protested a public education system they believe no longer represents their interests or values Educators often dismiss critiques based on religious values as irrational or flimsy failing to appreciate the coherence of these criticisms from the Christian Right s own perspective While the Christian Right has become ever more sophisticated in its lobbying and powerful in its influence educators and parents find themselves lacking the background knowledge necessary to respond effectively to its efforts Standing on the Premises of God speaks directly to this dilemma explaining current incarnations of the Christian Right its leadership its intellectual and theological foundations and its tactics so that those interested in the debates over education will be better prepared to engage them constructively Taking the novel approach of framing the Christian Right as a revitalization movement Detwiler shows how it seeks to effect cultural transformation in order to bring public education and our society more generally in line with its worldview His theoretical model provides insights into why

education is so pivotal to the Christian Right and also assesses the religious viability of the Christian Right as a social movement      *Connecticut Miscellany* Wilson H.
