International Handbook of Educational Leadership and Administration Kenneth A. Leithwood,Judith Chapman,P. Corson,P. Hallinger,Ann Hart,2012-12-06 EDITORS This introduction to the International Handbook of Educational Leadership and Administration describes some of the motivation for developing the book and several assumptions on which is based much of the work represented in its 31 chapters A synopsis of the contents of those chapters is also provided SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail After all there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years Such a view is captured for example in Bennis observation that Of all the hazy and confounding areas in social psychology leadership theory undoubtedly contends for top nomination Probably more has been written and less is

known about leadership than any other topic in the behavioural sciences 1959 page 259 We do not find this state of affairs discouraging nor entirely accurate and of course it did not prevent Bennis from proceeding either One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory a theory which applies to all or most domains of organized human activity This aspiration inevitably produces decontextualized and therefore abstract categories of practice Howard Gardner's 1995 depiction of leadership as story telling is a case in point

**The Primary School in Changing Times** Tony Townsend, 2002-09-11 Following substantial changes throughout the Australian education system primary schools are no longer in the protected position of having a regulated flow of clients a pre determined curriculum and marginal levels of staff development Recent moves have brought new or increased responsibilities for all schools in areas such as curriculum and policy development staff development monitoring and assessment the use of new technologies resource allocation This book seeks to review the impact of this change on Australian primary schools on the people who are involved with them and the issues they face Primary education is being re structured throughout the world and therefore these issues are of great interest and relevance to educators worldwide

[Losing America's Schools](#) Nancy E. Bailey, 2016-06-14 [Losing America's Schools](#) The Fight to Reclaim Public Education is a call to save one of the last great democratic institutions in America Corporatization charter schools misleading claims of skill gaps the loss of Separation of Church and State deprofessionalization and the over use of technology all threaten the existence of the schools that belong to all Americans This book addresses the problems surrounding those issues and is a tribute to the groups and individuals who are fighting draconian reforms in order to save our public schools It is the sequel to [Misguided Education Reform Debating the Impact on Students](#)

**Knowledge and Power in the Global Economy** David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today's economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society

will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices      Political Agendas for Education Joel Spring,2014-03-26 The Fifth Edition of Joel Spring s ongoing documentation and analysis of political agendas for education reflects the major political issues in education since 2008 This edition focuses on the education sections of the 2012 Republican Democratic Green and Libertarian Party platforms Taking a fresh look at the social and political forces educational research and ideologies shaping the educational agendas of these political parties and a comparative approach the book stimulates reflection and discussion New coverage in the Fifth Edition includes The political coup called Race to the Top Common Core State Standards and national testing based on the Standards Explosion of online instruction Debates about teacher evaluations and merit pay Growing for profit education industry New agenda for American Education Constitutional amendment long life and happiness environmental education Political Agendas for Education is essential reading for courses dealing with the politics of education foundations of education educational leadership and curriculum studies and for educational scholars professionals policymakers and all those concerned with the politics of education in the U S and its consequences for schools and society      *Revisiting Professional Learning Communities at Work*® Richard DuFour,Rebecca DuFour,2009-11-01 This 10th anniversary sequel to the authors best selling book Professional Learning Communities at Work™ Best Practices for Enhancing Student Achievement merges research practice and passion The most extensive practical and authoritative PLC resource to date it goes further than ever before into best practices for deep implementation explores the commitment consensus issue and celebrates successes of educators who are making the journey
