Literature and the Writer, 2016-08-09 Literature and the Writer was first conceived with the hope the essays would shed light on several dimensions of the authorial craft It was the hope of the editor that the selected essays would examine not only writers' choice of vocabulary but also their deliberate selection of grammatical constructions and word order and their seamless weaving together of plots and imagery Moreover the analyses would also draw attention to how the writing process impacts the development of characters and the formulation of thematic strands in fiction Thus a wide variety of authors are deliberately selected to give the text depth writers of popular fiction as well as modern classics are included and contrasts are established between traditional writers and those who prefer to follow experimental trends Modernists are set against postmodernists absurdist vs realists minority ethnicities vs majority cultures and dominant genders appear in contrast to subordinated ones Clearly the major tenet of the collection is that the writing profession provides an unending dilemma that deserves to be explored in more detail as readers try to determine how authorial voices confuse while simultaneously elucidating their audience how texts are constructed by authors and yet deconstructed by the very words they choose to include how silence functions as inaudible yet audible discourse and how authorial self concept shapes not only itself but is also echoed in the fictional characters writers who appear in the texts

Counihan,Steven L.

Kaplan,2003-09-02 This volume examines among other things the significance of food centered activities to gender relations and the construction of gendered identities across cultures It considers how each gender s relationship to food may facilitate mutual respect or produce gender hierarchy This relationship is considered through two central questions How does control of food production distribution and consumption contribute to men s and women s power and social position and How does food symbolically connote maleness and femaleness and establish the social value of men and women Other issues discussed include men s and women s attitudes towards their bodies and the legitimacy of their appetites **Kirkus Reviews** ,1987

Anorexia Emma White,2018-06-18 Widely popularized images of unobtainable and damaging feminine ideals can be a cause of profound disjunction between women and their bodies A consequence of this dissonance is an embodied performance of these ideals with the potential development of disordered eating practices such as anorexia nervosa This book develops a spirituality of anorexia by suggesting that these eating disorders are physical symptoms of the general repression of feminine nature in our culture Furthermore it puts forward Goddess feminism as a framework for a healing therapeutic model to
