**Human Services Integration**

Michael J Austin, 2014-01-02 Addressing the multiple meanings of service integration Human Services Integration analyzes how motivations and expectations for social service integration differ significantly among different players in the service system In a period of major budget cutbacks and welfare reform however it is important that service providers collaborate to reduce or eliminate boundaries between categorically defined and provided services This book tells you about the efforts being made to provide existing services more efficiently while avoiding duplication and waste As you will quickly see developing consensus for service integration efforts at the administrative community and staff levels will result in the ability to set achievable goals and objectives and secure cooperation at all levels Human Services Integration covers practice principles for managing organizational and community change and offers strategies for organizing human service agencies and overcoming fragmented service integration in communities with complex problems and needs To also help you identify specific service intergration activities that are relevant in the context of unique communities it discusses specifications for conducting a self assessment of progress at the local level toward social service integration goals Georgia s Family Connection a statewide human services initiative interweaving formal and informal systems of care in a community centered approach to service integration a children s initiative collaborative social science theory pertinent to service integration gathering support from elected officials such as boards of supervisors city leaders and local elected boards Human Services Integration will help you understand why service integration cannot be defined by a particular service model or outcome Its insight will also help you understand why involving service users and community members in the design and delivery of services is fundamental to developing an integrated service system that is culturally competent empowering and responsive to its neighborhood and community context

*Community Practice* David A. Hardcastle, 2011-02-18 For almost two decades Community Practice has been a definitive text for social workers community practitioners and students eager to help individuals contribute to and use community resources or work to change oppressive community structures In this third edition a wealth of new charts and cases spotlight the linkages between theoretical orientations and practical skills with an enhanced emphasis on the inherently political nature of social work and community practice Boxes examples and exercises illustrate the range of skills and strategies available to savvy community practitioners in the 21st century including networking marketing and staging political advocacy and leveraging information and communication technologies Other features include New material on community practice ethics critical practice skills community assessment and assets inventory and mapping social problem analysis and applying community practice skills to casework practice Consideration of post 9 11 community challenges Discussion on the changing ethnic composition of America and what this means for practitioners An exploration of a vastly changed political landscape following

**Assessing Outcomes in Child and Family Services** Anthony N. Maluccio,2017-11-30 In this collective portrait editors and authors do not attempt to draw systematic country by country comparisons Given the magnitude of the issues they believed that it would be inappropriate to paint with too broad a stroke What they have accomplished however is to codify and identify what the participants repeatedly noted in regard to issues and difficulties inherent in conducting outcome evaluation These include varying definitions of outcome complexities in measuring outcomes of particular interventions with different groups of consumers and documenting the effectiveness of the intervention the tendency to focus on evaluation of process more than outcome the challenge of involving practitioners in the evaluation task in part because its value is unclear to them or perceived as distant or untrustworthy the typical inadequacy of resources available for systematic evaluation and the need to inject rigor into the design and execution of evaluation projects The authors demonstrate strong conviction about sharing research expertise across national boundaries learning through each other how to cope with organizational impediments to cross national collaboration and strengthening the interaction between practice and research Their contributions suggest that there is wide interest in pursuing cross national collaboration In recent years largely in response to demands by their funding sources for accountability assessment of performance and cost effectiveness researchers in human services have been devoting increased attention to outcome evaluation Limited attention however has been given to the findings of evaluation studies conducted in different countries The present volume has been organized and edited to address the task of learning from outcome research across the world Its goal an extension of a major goal of the human services in any one country is to improve life chances of vulnerable children and youth

Family Group Conferencing Gale Burford, 2017-09-04 Family Group Conferencing indicates a large scale shift in assumptions about the way child welfare services are planned and delivered away from models that emphasize pathology and toward those seeking an ecological understanding of the families and social networks involved The contributors also present a wealth of information on related approaches such as community conferences circles and wraparound services The British Journal of Social Work noted that there are issues relating to both process and outcome This book offers some answers that are intelligent and passionate

Social Policy for Children and Families Jeffrey M. Jensen, 2006 Winnner of the SRA Social Policy Award for Best Edited Volume 2006 2008 Jensen Fraser and their impressive contributors have provided us with something all too rare in the child family services literature a truly integrative volume They argue cogently for a cross systems perspective an orientation to developmental risk protective factors and a strategic process for identifying most favorable targets for intervention The summaries of different service domains and the editor s emphasis on crafting the proper policy context for the integration of evidence based practices make this volume a must read for seasoned policy makers as well as beginning practitioners This book will be an important resource for all involved in the kind of creative science based innovation so desperately needed in the child family services field James K Whittaker University of Washington What a book A must read for those who provide services to at risk children and their families Jensen and Fraser call attention to the profession s blatant unwillingness to systematically draw upon existing research and translate it to policy to advance the design of programs that remediate and prevent mental and physical health problems among the nation s youth The application of the public health framework to programs and policies adds value to the usual suspects of perspectives frameworks drawn upon by the social work profession This book is very consistent with the ideas expressed in related professional and social science literatures as well as that of federal and private funding sources The authors boldly call for the triangulation of relevant theories and models of risk and resilience and make a major contribution to social work research by advocating for the translation of empirical evidence into practical application Paula Allen Meares University of Michigan School of Social Work We now know more than ever about why some children and adolescents develop social and health problems such as sexually transmitted diseases drug use and delinquency However this knowledge is not yet systematically applied to policy or program design resulting in poorly integrated and often duplicative services for children and families Social Policy for Children and Families A Risk and Resilience Perspective uses a unique framework to help students understand effective public policy development Authors Jeffrey M Jensen and Mark W Fraser argue that a

public health framework rooted in ecological theory and based on principles of risk protection and resilience is essential for the successful design of social policy This book applies the authors conceptual model across the substantive areas of social policy including child welfare education mental health health developmental disabilities substance use and juvenile justice Key Features Applies a risk and resilience model to help readers understand and develop effective public policies for children youth and families Offers recommendations for ways to advance a public health framework in policy design implementation and evaluation Includes case studies discussion questions and web based resources to prompt critical thinking and future research Social Policy for Children and Families is designed for undergraduate and graduate students studying social welfare policy in the field of Social Work It can also be used in a variety of Political Science Public Policy and Sociology courses

**HIV, AIDS, and the Law** Donald Dickson,2017-09-04 Although morbidity among HIV AIDS victims has decreased the rate of new infections has remained steady for several years substantially increasing the likelihood that this epidemic will continue and expand as a concern for social workers and their clientele both of whom will need to be kept informed of the complex laws governing the milieu and the consequences of the disease This is certainly the case with its spread throughout Asia and Africa In this new work the author draws upon statutes and court decisions from across the United States to provide a comprehensive and current picture of the many facets of HIV AIDS law including health policy confidentiality privacy bioethics the workplace and criminal law and corrections The volume of legal medical social science and popular literature pertaining to HIV AIDS that has been published over the past two decades is staggering Hence any addition to this collection needs some justification What Dickson offers is different from what has preceded Rather than one more contribution to the extensive legal or social science literature this book attempts to integrate the perspectives from two fields law and social work The hope is that this will give social workers practitioners and teachers a better understanding of one of the major issues that may face them in their work with patients and clients every day To date although there is extensive HIV and AIDS related literature in social work and the social sciences it is primarily focused on social work practice issues Where law has been introduced in these works it often is narrow in focus and given the rapid changes in the field no longer up to date This book does not purport to discuss all legal issues in all jurisdictions relating to HIV AIDS but rather to choose selectively those that have particular relevance for social work and social policy The author has placed reliance on those published medical works cited with approval in the legal and Handbook for Working with Children and Youth Michael Ungar,2005-05-11 To study resilience one should adopt a fundamental humility about oneself and one s culture and society and simultaneously a

respect for the human strength of others The chapters in this book take these three cautions seriously and offer a convincing demonstration that resilience is indeed a many splendored thing James Garbarino Cornell University The Handbook For Working With Children and Youth Pathways To Resilience Across Cultures and Contexts examines lives lived well despite adversity Calling upon some of the most progressive thinkers in the field it presents a groundbreaking collection of original writing on the theories methods of study and interventions that promote resilience Unlike other works that have left largely unquestioned their own culture bound interpretations of the ways children and youth survive and thrive this volume explores the multiple paths children follow to health and well being in diverse national and international settings It demonstrates the connection between social and political health resources and addresses the more immediate concerns of how those who care for children create the physical emotional and spiritual environments in which resilience is nurtured Key Features Cross cultural Illustrates the rich variety of culturally embedded pathways by which children navigate toward health and well being Multidisciplinary Draws upon international experts utilizing both quantitative and qualitative studies from psychology social work psychiatry nursing education criminology child and youth care community health and family therapy Comprehensive Provides broad developmental perspectives on resilience from theory and research methods to interventions with individuals families and communities Connects theory to practice Clarifies the construct of resilience from the viewpoint of resilience researchers and practitioners in health related disciplines from different methodological paradigms within the social sciences and human services Academics graduate students and professionals studying or working in human service fields such as human development and family studies education social work child and youth care work developmental psychology applied developmental science child psychiatry nursing and family therapy will benefit from this Handbook In essence anyone who works with youth or is interested in the developmental issues related to children and youth in clinical residential or community settings will find Ungar s Handbook to be of great value *Handbook of Social Work with Groups* Charles D. Garvin, Lorraine M. Gutierrez, Maeda J. Galinsky, 2017-02-13 This comprehensive handbook presents major theories of social work practice with groups and explores contemporary issues in designing and evaluating interventions Students and practitioners gain an in depth view of the many ways that groups are used to help people address personal problems cope with disabilities strengthen families and communities resolve conflict achieve social change and more Offering authoritative coverage of theoretical practical and methodological concerns coupled with a clear focus on empowerment and diversity this is an outstanding text for group work and direct practice courses **Person-Environment Practice** Susan P. Kemp, James K. Whittaker, Elizabeth M. Tracy, 2024-11-01 Person Environment Practice addresses a core but long neglected dimension in social work and human services practice accurate environmental assessment and strategic environmental intervention Despite the centrality of person environment as a key construct in direct practice the domain of environmental assessment intervention has received relatively little systematic attention in the practice literature For a variety of reasons the core focus

of direct practice assessment and change strategies has centered more on person than environment This book seeks to redress that imbalance Ironically the relative lack of attention to environmentally oriented practice persists even as current demands of practice fall increasingly under the rubric of what we here call environmental intervention defined as both action in the environment and the process of transforming individual and collective perspectives through critical analysis of the impact of environmental conditions The authors argue that the ability to understand environment from the client's perspective and to function effectively in the environmental domain is central to many emergent areas of practice such as practice with extended families and personal networks practice from a strengths perspective and culturally competent practice In Person Environment Practice the authors offer a coherent critique and overview of environmental assessment and intervention congruent with the demands of both newly emerging and established interpersonal helping approaches within social work's domain Robert Halpern of the Erikson Institute for Advanced Studies in Child Development described the book as as clear thoughtful and subtle a discussion of how to consider the environment in interpersonal helping as I have seen in the literature and Anthony Maluccio of Boston College called the book a timely and exciting contribution with appreciation and respect for social work practices and qualities of inspiration as well as intellectual stimulation Susan P Kemp is assistant professor School of Social Work The University of Washington Seattle James K Whittaker is professor School of Social Work The University of Washington Seattle Elizabeth M Tracy is associate professor Mandel School of Applied Social Sciences Case Western Reserve University Cleveland Ohio

Handbook of Community-Based Clinical Practice Anita Lightburn,Phebe Sessions,2006 Bridges community practice and clinical practice by collecting 33 chapters from social workers psychologists and psychiatrists that outline and illustrate the state of the art Designed specifically for clinicians making the transition to community based work Provided by publisher

Child Mental Health John Y Powell,David Dosser,Dorothea Handron,Susan Mccammon,Sandra A. Spencer,2018-10-24 Use these system of care concepts to better serve children with serious emotional problems and their families Providing services to children with emotional problems and their families continues to be a major challenge for social workers family therapists child mental health advocates and psychologists in the new century This valuable book addresses that challenge detailing theory principles and application issues from the vantage points of both consumers and service providers System of care values and practices were developed to address these concerns and meet the needs of these children and families who tend to receive either no services at all or services that are far too restrictive at a large cost to the organization providing the services Child Mental Health Exploring Systems of Care in the New Millennium identifies salient issues and offers suggestions for addressing the complexities of providing services for these troubled families It also provides hope and encouragement for family members and professionals by identifying roles and practices that are effective in building collaborative community based services This book takes an incisive look at the benefits and difficulties of partnering between practitioners and families the need for and benefits of partnering between practitioners of

various disciplines within the system of care a working model of a wraparound process the hallmark of the system of care barriers that prevent effective wraparound services and what causes them the need to help social workers learn parent partnering skills the roles that families can play in the system of care the need for specialized training so that practitioners can learn to assess understand and integrate a family's spiritual beliefs into the system of care the development of an interdisciplinary collaborative practice course at East Carolina University experiential training and shared classroom experiences for students Child Mental Health Exploring Systems of Care in the New Millennium is a tool that will aid practitioners and consumers alike as they shift their point of view from the provider as expert paradigm to one of building partnerships
