Relatedness Essays In Metaphysics And Theology:

Relatedness Harold H. Oliver, 1984 *Metaphysics, Theology, and Self* Harold H. Oliver, 2006 Professor Oliver's essays propose a system of relational philosophy and theology extending his monograph *A Relational Metaphysic* along new lines. Themes developed include the following on the issue of truth in scientific and religious discourse as seen from the claim of their complementarity: the problem of Western substantialism as answered by a proposed non and antisubstantialist theory of selfhood as an alternative to the Western ego; certain hermeneutical themes and several themes introducing new facets of relational thought.

The Entangled God Kirk Wegter-McNelly, 2012-03-12 In *The Entangled God* Kirk Wegter McNelly addresses the age-old theological question of how God is present to the world by constructing a novel scientifically informed account of the God-world relation. Drawing on recent scientific and philosophical work in quantum entanglement, Wegter McNelly develops the metaphor of divine entanglement to ground the relationality and freedom of physical process in the power of God's relational being. *The Entangled God* makes a three-fold contribution to contemporary theological and religious discourse. First, it calls attention to the convergence of recent theology around the idea of relationality. Second, it introduces theological and religious readers to the fascinating story of quantum entanglement. Third, it offers a robust, plerotic alternative to kenotic accounts of God's suffering presence in the world. Above all, this book takes us beyond the view of theology and science as adversaries and demonstrates the value of constructively relating these two important areas of intellectual investigation.

Whitehead's Philosophy Janusz A. Polanowski, Donald W. Sherburne, 2012-02-01 This volume explores the range of Alfred North Whitehead's philosophy and his relevance to contemporary philosophical traditions. While philosophers and theologians with only a passing acquaintance with Whitehead might think that his philosophy is unconnected to our Western philosophical tradition, the contributors prove that nothing could be further from the truth. The most respected scholars in the field—George Allan, Lisa Bellantoni, John B. Cobb Jr., Frederick Ferr, David L. Hall, William S. Hamrick, Robert Cummings Neville, Janusz A. Polanowski, Patrick Shade, and Donald W. Sherburne—illustrate points of connection between Whitehead's ideas to the following: Descartes, the so-called Father of Modern Philosophy; classical American thought; several contemporary American thinkers including Richard Rorty and Alasdair MacIntyre; aspects of European philosophy; and current reflections upon the environment and technology.

The Cosmic Breath Amos Yong, 2012-05-10 The interjection of pneumatology in both theologies of interreligious dialogue and in the theology and science conversation comes together in this volume. The resulting Christianity-Buddhism science dialogue opens up to new pneumatological perspectives on philosophical cosmology and anthropology in interdisciplinary and global context.

God after Metaphysics John Panteleimon Manoussakis, 2007-05-23 While philosophy believes it is impossible to have an experience of God without the senses, theology claims that such an experience is possible, though potentially idolatrous. In this engagingly creative book, John Panteleimon Manoussakis ends the impasse by proposing an aesthetic allowing for a sensuous

experience of God that is not subordinated to imposed categories or concepts Manoussakis draws upon the theological traditions of the Eastern Church including patristic and liturgical resources to build a theological aesthetic founded on the inverted gaze of icons the augmented language of hymns and the reciprocity of touch Manoussakis explores how a relational interpretation of being develops a fuller and more meaningful view of the phenomenology of religious experience beyond metaphysics and onto theology

Science, Religion, and the Human Experience James D. Proctor, 2005-04-21 The relationship between science and religion is generally depicted in one of two ways In one view they are locked in an inevitable eternal conflict in which one must choose a side In the other they are separate spheres in which the truth claims of one have little bearing on the other This collection of provocative essays by leading thinkers offers a new way of looking at this problematic relationship The authors begin from the premise that both science and religion operate in yet seek to reach beyond specific historical political ideological and psychological contexts How may we understand science and religion as arising from yet somehow transcending human experience Among the scholars who explore this question are Bruno Latour Hilary Putnam Jeffrey Burton Russell Daniel Matt Michael Ruse Ronald Numbers Pascal Boyer and Alan Wallace The volume

is divided into four sections The first takes a fresh look at the relationship between science and religion in broad terms as spheres of knowledge or belief realms of experience and sources of authority The other three sections take on topics that have been focal points of conflict between science and religion the nature of the cosmos the origin of life and the workings of the mind Ultimately the authors argue by seeing science and religion as irrevocably tied to human experience we can move beyond simple either/or definitions of reality and arrive at a more rich and complex view of both science and religion

The Naturalists and the Supernatural William M. Shea, 1984

Planetary Loves Stephen D. Moore, Mayra Rivera, 2011 Postcolonial theology has recently emerged as a site of intense intellectual and political energy and has taken its place in the interdisciplinary field of postcolonial studies This volume is animated by the conviction that postcolonial theology is now ready for a second deeper phase of engagement with postcolonial theory one that moves beyond the general to the specific No critic has been more emblematic of the challenging and contested field of postcolonial theory than Gayatri Chakravorty Spivak In this volume the product of a theological colloquium in which Spivak herself participated theologians and biblical scholars engage with her thought in order to catalyze a diverse range of original theological and exegetical projects The volume opens with a topography of postcolonial theology and also includes other valuable introductory essays At the center of the collection are transcriptions of two extended public dialogues with Spivak on theology and religion in general A further dozen essays appropriate Spivak's work for theological and ethical reflection The volume is also significant for the larger field of postcolonial studies in that it is the first to focus centrally on Spivak's immensely suggestive and vital concept of planetarity

The Voice of the Earth Theodore Roszak, 2001-01-01 What is the bond between the human psyche and the living planet that nurtured us and all of life into existence What is the link between our own mental health and the health of the greater biosphere In this bold ambitious philosophical essay Publishers Weekly historian and cultural critic Roszak explores the relationships between psychology ecology and new scientific insights into systems in nature Drawing on our understanding of the evolutionary self organizing universe Roszak illuminates our rootedness in the greater web of life and explores the relationship between our own sanity

and the larger than human world The Voice of the Earth seeks to bridge the centuries old split between the psychological and the ecological with a paradigm which sees the needs of the planet and the needs of the person as a continuum The Earth s cry for rescue from the punishing weight of the industrial system we have created is our own cry for a scale and quality of life that will free us to become whole and healthy This second edition contains a new afterword by the author **"Being Down"** Ronnie Casella,2001-01-01 Research reveals the causes of violence in a high school including social inequality among students and the lack of prevention efforts by the staff and proposes reforms to alleviate this growing problem in all schools

Thérèse of Lisieux Ann Laforest,2000 Reading Th r se of Lisieux according to the signs of the times Sr Ann Laforest offers a fresh and unparalleled look at the witness and teaching of one of the Church s favourite saints Doing away with the false impression of Th r se s sugary piety Laforest reveals the profound nature of The Little Way as the Way to Love and liberation When placed in dialogue with contemporary mystics such as Dorothy Day and Oscar Romero it becomes ever clearer why Th r se is a Doctor of the Universal Church and an inspiration to us all **The Immanent Divine** John J. Thatamanil, While traditional Christian thought and spirituality have always affirmed the divine presence in human life Thatamanil argues we have much to learn from non dualistic Hindu thought especially that of the eighth century thinker Sankara and from the Christian panentheism of Paul Tillich Thatamanil compares their diagnoses and prognoses of the human predicament in light of their doctrine of God or Ultimate Reality What emerges is a new theology of God and human beings with a richer and more radical conception of divine immanence a reconceived divine transcendence and a keener sense of how the dynamic and active Spirit at work in us anchors real hope and deep joy Using key insights from Christian and Hindu thought Thatamanil vindicates comparative theology expands the vocabulary about the ineffable God and arrives at a new construal of the problems and prospects of the human condition *Circling the Elephant* John J. Thatamanil,2020-06-02 Christian theologians have for some decades affirmed that they have no monopoly on encounters with God or ultimate reality and that other religions also have access to religious truth and transformation If that is the case the time has come for Christians not only to learn about but also from their religious neighbors Circling the Elephant affirms that the best way to be truly open to the mystery of the infinite is to move away from defensive postures of religious isolationism and self sufficiency and to move in vulnerability and openness toward the mystery of the neighbor Employing the ancient Indian allegory of the elephant and blind folded men John J Thatamanil argues for the integration of three often separated theological projects theologies of religious diversity the work of accounting for why there are so many different understandings of the elephant comparative theology the venture of walking over to a different side of the elephant and constructive theology the endeavor of re describing the elephant in light of the other two tasks Circling the Elephant also offers an analysis of why we have fallen short in the past Interreligious learning has been obstructed by problematic ideas about religion and religions Thatamanil argues while also pointing out the troubling resonances between reified notions of religion and race He contests these

notions and offers a new theory of the religious that makes interreligious learning both possible and desirable Christians have much to learn from their religious neighbors even about such central features of Christian theology as Christ and the Trinity This book envisions religious diversity as a promise not a problem and proposes a new theology of religious diversity that opens the door to robust interreligious learning and Christian transformation through encountering the other
