En rouge les choix de XS avec les relations argumentations suivantes :

- h et notre univers manifesté par un « quelque chose » d'observable plutôt que rien
- Avec le « quelque chose » A s'est orientée pour des niveaux croissants
- La matière pour laquelle le temps thermodynamique croissant est acquis comme un identifiant fondamental par les scientifiques
- la vie et son sur-accordage sur la force résultante de la rotation, dans un sens unique, de la terre porteuse (que XS va relier au positionnement lévogyre de toutes les protéines naturelles)
- Avec la pensée conscience plusieurs capacités sont acquises : monter les niveaux croissant de la nature mais surtout de les descendre avec le référent force de gravité, reliées à la prise en référence de L espace.

Pour XS l'évolution est caractérisée par des **déboguages** successifs, concept très intéressant que je ne vais pas développer ici..

Mon propos n'est pas de faire l'examen critique des argumentations de XS en posant des questions
