**Oppian's Halieutica** Emily Kneebone,2020-10-08 Oppian s Halieutica is a dazzling five book Greek didactic poem about the sea and its wily chaotic inhabitants This book offers the first sustained reading of the poem as a didactic epic that meditates on the place of human beings within the cosmos at large and on the lessons we can learn from fish Using a combination of close reading and wider

interpretative lenses this book examines the literary texture and cultural relevance of the *Halieutica* by analysing its sophisticated refraction of earlier literary critical theories and hexameter traditions its commentary on human animal relations and its contribution to imperial Greek literary political and cultural debates The book demonstrates the importance and cultural centrality of this understudied Greek didactic epic it is written for students and scholars of imperial Greek literature and culture including the ancient novel ancient heroic and didactic epics and those interested in human animal relations in the ancient world

Primacy and Its Discontents Michael E. Brown, Owen R. Cote, Sean M. Lynn-Jones, Steven E. Miller, 2009-01-30 Experts consider whether American primacy will endure or if the future holds a multipolar world of several great powers The unprecedented military economic and political power of the United States has led some observers to declare that we live in a unipolar world in which America enjoys primacy or even hegemony At the same time public opinion polls abroad reveal high levels of anti Americanism and many foreign governments criticize U S policies *Primacy and Its Discontents* explores the sources of American primacy including the uses of U S military power and the likely duration of unipolarity It offers theoretical arguments for why the rest of the world will or will not align against the United States Several chapters argue that the United States is not immune to the long standing tendency of states to balance against power while others contend that wise U S policies the growing role of international institutions and the spread of liberal democracy can limit anti American balancing The final chapters debate whether countries are already engaging in soft balancing against the United States The contributors offer alternative prescriptions for U S foreign policy ranging from vigorous efforts to maintain American primacy to acceptance of a multipolar world of several great powers Contributors Gerard Alexander Stephen Brooks John G Ikenberry Christopher Layne Keir Lieber John Owen IV Robert Pape T V Paul Barry Posen Kenneth Waltz William Wohlforth

Advanced Social Psychology Eli J. Finkel, Roy F. Baumeister, 2019-03-15 Social psychology uses clever even ingenious research methods to explore the most essential questions of the human psyche Why do we help some people and harm others Why do we pay so much more attention to high powered people than they pay to us If humans evolved from great apes why are human selves so much more elaborate How does our attachment to our parents when we are infants influence the success or failure of our romantic relationships when we are adults Can behaving morally license us to behave immorally shortly afterward How do social relationships make us more versus less prone toward physical illness This volume an update to the original 2010 edition provides a graduate level introduction to social psychology The target audience consists of first year graduate students MA or PhD in social psychology and related disciplines marketing organizational behavior etc although it is also appropriate for upper level undergraduate courses The authors are world renowned leaders on their topic and they have written state of the art overviews of the discipline s major research domains The chapters are not only scientifically rigorous but also accessible and engaging They convey the joy excitement and promise of scientific investigations into human sociality

The End of Love Eva Illouz, 2021-09-15 Western culture has

endlessly represented the ways in which love miraculously erupts in people's lives the mythical moment in which one knows someone is destined for us the feverish waiting for a phone call or an email the thrill that runs down our spine at the mere thought of him or her Yet a culture that has so much to say about love is virtually silent on the no less mysterious moments when we avoid falling in love where we fall out of love when the one who kept us awake at night now leaves us indifferent or when we hurry away from those who excited us a few months or even a few hours before In *The End of Love* Eva Illouz documents the multifarious ways in which relationships end She argues that if modern love was once marked by the freedom to enter sexual and emotional bonds according to one's will and choice contemporary love has now become characterized by practices of non choice the freedom to withdraw from relationships Illouz dubs this process by which relationships fade evaporate dissolve and break down unloving While sociology has classically focused on the formation of social bonds *The End of Love* makes a powerful case for studying why and how social bonds collapse and dissolve Particularly striking is the role that capitalism plays in practices of non choice and unloving The unmaking of social bonds she argues is connected to contemporary capitalism which is characterized by practices of non commitment and non choice practices that enable the quick withdrawal from a transaction and the quick realignment of prices and the breaking of loyalties Unloving and non choice have in turn a profound impact on society and economics as they explain why people may be having fewer children increasingly living alone and having less sex *The End of Love* presents a profound and original analysis of the effects of capitalism and consumer culture on personal relationships and of what the dissolution of personal relationships means for capitalism

**Linguistics and Language Behavior Abstracts**, 1991      **Introducing Foreign Models for Development**  
Izumi Ohno, Kimiaki Jin, Kuniaki Amatsu, Junichi Mori, 2023-10-03 This open access book studies how foreign models of economic development can be effectively learned by and applied to today's latecomer countries Policy capacity and societal learning are increasingly stressed as pre conditions for successful catch up However how such learning should be initiated by individual societies with different features needs to be explained The book answers this pragmatic question from the perspective of Japan's past experience and its extensive development cooperation in Asia Africa and Latin America Since the late nineteenth century Japan has developed a unique philosophy and method for adopting advanced technologies and systems from the West the same philosophy and method govern its current cooperation with the developing world The key concepts are local learning and translative adaptation Local learning says that development requires the learner to adopt a proactive mindset and the goal of graduating from receiving aid Meanwhile translative adaptation requires foreign models be modified to fit local realities given the different structures of the home and foreign society The development process must be wholly owned by the domestic society in rejection of copy and paste acceptance These ideas not only informed Japan but are key to successful development for all The book also asks how this learning method should or should not be revised in the age of SDGs and digitalization Following the overview section that lays out the general principles the book offers many real cases

from Japan and other countries The concrete actions outlined in these cases with close attention to individual growth ingredients as opposed to general theories are crucial to successful policy making The book contains materials that are highly useful for national leaders and practitioners within developing countries as well as students of development studies
