ABSTRACT

Problematic social media use (PSMU) is a societal problem, which impacts adolescents' well-being. Fear of missing out (FoMO) has been suggested as a core risk factor predicting both PSMU and adolescents' well-being. However, longitudinal research on the directionality of these relationships is scarce. The present study aims to fill this knowledge gap by testing the bidirectional relationships between FoMO, PSMU and adolescents' life satisfaction in the total sample, as well as for girls and boys separately. This study used four-waves annual longitudinal data collected from 2015 to 2019 among Dutch adolescents aged 11–15 years ($n = 1439$, $M_{age} = 12.5 \pm 0.60$, 45.9% girls). We applied random intercept cross-lagged panel model(s) to separate within-person level effects from between-person level effects. On the within-person level, findings suggested a unidirectional relationship whereby FoMO increased PSMU during mid-adolescence, but not vice versa. Moreover, low life satisfaction predicted an increase in FoMO during early adolescence. These findings underline that FoMO can be considered a risk factor of PSMU, and that low life satisfaction may be a risk factor for developing FoMO. These insights should be considered in intervention programs developed to effectively prevent unhealthy internet use in adolescents.

1. Introduction

Social media platforms such as Facebook, Instagram, and Snapchat have become an integral aspect of adolescents' daily lives worldwide (Okeke et al., 2019). However, concerns have been raised by families and schools when adolescents use social media problematically. Problematic social media use (PSMU) can be defined as uncontrollable, addictive-like social media use that persists over a longer period of time (van den Eijnden et al., 2016). This behavior always comes at the expense of important life domains for adolescents (Banyai et al., 2017; Paakkari et al., 2021; Shannon et al., 2022). There is a growing body of empirical evidence indicating that adolescents who have developed PSMU subsequently report lower levels of well-being (Boer, Stevens, Finkenauer, de Loore, & van den Eijnden, 2021; Chang et al., 2022; Li et al., 2018; Marente et al., 2021; Raudsepp, 2019; van den Eijnden et al., 2021), for instance life satisfaction (Boer, Stevens, Finkenauer, & van den Eijnden,

2021; Marente et al., 2021; van den Eijnden et al., 2018).

Meanwhile, scholars have suggested that fear of missing out (FoMO) may be a core risk factor that is associated with both higher levels of PSMU (Poniraventi et al., 2023; Gul et al., 2023; Çelik et al., 2022) and lower levels of life satisfaction among adolescents (Demir, 2021; Çelik et al., 2022). Yet, there is a scarcity of empirical studies investigating the interrelationships between FoMO, PSMU, and life satisfaction. The Differential Susceptibility to Media Effects Model (DSMM; Valkenburg & Peter, 2013) provides a comprehensive theoretical framework elucidating that media use factors predict media response states (i.e., state variables originating from media use), which in turn predict media effects (i.e., cognitive, emotional, attitudinal, and behavioral effects of media on individuals), whereby it is assumed that preexisting individual and social context factors may predict media use, but may also influence the relationships between media use and media response states/media effects. When applying the DSMM, PSMU can be considered a media use

Relationships Discovering The Missing Links:

The Missing Link Edward Dyson, 2019-12-17 Edward Dyson's *The Missing Link* intricately weaves the narrative of scientific exploration and human curiosity through a blend of rich vivid prose and a contemplative exploration of themes surrounding evolution and the interconnectedness of all life. Set against the backdrop of the early 20th century, Dyson employs a modernist literary style creatively oscillating between philosophical musing and gripping storytelling, engaging with the contemporary debates of his time regarding natural selection and the origins of humanity. The book expertly navigates the tension between science and religion, creating a textured dialogue that resonates deeply with readers both then and now. Edward Dyson, an acclaimed Australian author known for his focus on the struggle between tradition and modernity, experienced firsthand the impact of the burgeoning scientific discourse surrounding Darwinism. His diverse background as a poet and journalist provided him with unique insights into both the literary form and the pressing social questions of his era, which manifest in the thematic depth of *The Missing Link*. Dyson's work often reflects his commitment to social justice and public enlightenment, adding layers of significance to his exploration of human origins. For readers intrigued by the convergence of science and literature, *The Missing Link* presents an essential reading experience. Dyson's nuanced examination of evolutionary theory, set against a rich narrative landscape, invites discussion on the fundamental questions of existence. This novel is not just for those who revel in scientific debate but for anyone who appreciates a well-crafted story rich in moral and intellectual inquiry.

Missing Link Jeffery Donaldson, 2015-04-01 We look for missing links in the sciences and humanities but the essential missing link metaphor is always in front of us. In *Missing Link*, Jeffery Donaldson unites literary criticism and evolutionary and cognitive science to show how metaphor has been with us since the beginning of time as a seed in the nature of things. With examples from centuries of poets, critics, philosophers, and scientists, he details how metaphor is a chemistry, an exchange of energies forming and dissolving, and an openness in the spaces between things. He considers the ways in which DNA learns how to liken things that have been how mutation makes errors and then tries them on and how evolution is hypothesis, nature's way of thinking more. The mind is a matrix of relations; neural synapses cascade into ever-changing pathways and patterns. Metaphor is the substance of things hoped for, the evidence of things not seen. It is the unbroken thread between matter and spirit. Whether offering analysis of a turn of phrase or chemical reaction, *Missing Link* presents a vision of literature that is also a vision of the cosmos and vice versa. It enters the debate between evolution and religion and challenges scientists, literary theorists, and religious advocates to rethink the relations between their disciplines.

Dad The Missing Link Darryl Husband, 2012-06-11 Broken generations are nothing new. Many of us are the healed product of broken parenting. Dysfunctional families are not a new phenomenon; just a new word to describe an old issue. Perched on the periphery of our ideals as believers, has always been the pain of brokenness, dysfunction, and the God that calls chaos into order. Between these pages, you will hear the pains of broken people and the plans and possibilities of a
