Murray Thomas, 2007-01-30 To help readers gain a better understanding of conflicts over the proper role of religion in American public schools this book focuses on the seven major types of conflicts that have become particularly confrontational Thomas does not take sides rather he lays out the arguments their historical and cultural contexts and the groups that debate them and their goals Anyone wishing to gain a better understanding of the controversies surrounding religion in American schools will find here not just a review of the issues but a deeper consideration of the causes consequences and future of the debates Conflicts over the proper role of religion in schools and particularly in public schools supported by tax monies are frequently featured in news reports For example in the United States there currently are conflicts over the teaching of evolution inserting the word God in the pledge of allegiance conducting school holiday celebrations posting the biblical Ten Commandments in schools and praying at school functions People who are interested in such controversies often or perhaps usually fail to understand the historical backgrounds to the conflicts and therefore do not recognize the very complex factors that affect why the controversies become so heated To help readers gain a better understanding of such matters this book focuses on the seven major types of conflicts that have become particularly confrontational during the first decade of the twenty first century The cases on which the chapters focus concern issues that currently are being hotly debated in America Controversies are described in relation to their historical origins and the author shows how the history affects current understanding of the issues Thomas does not take sides in the arguments rather he lays out the arguments their historical and cultural contexts and the groups that debate them and their goals Anyone wishing to gain a better understanding of the controversies surrounding religion in American schools will be happy to find here not just a review of the issues but a deeper consideration of the causes consequences and future of the debates and the role of religion in our public schools To Build a Wall Gregg Ivers, 1995 To Build a Wall represents the first extensive study of the effect of Jewish interest groups on church state litigation Ivers carefully traces the evolution of the American Jewish Committee the American Jewish Congress and the ADL from benevolent social service agencies to powerful organized interest groups active on all fronts of American politics and public affairs He draws extensively upon original sources and archival materials from each organization personal interviews over a five year period as well as the personal files and papers of Leo Pfeffer the lead counsel or amicus curiae in nearly every establishment clause case from the late 1940s through the early eighties Ivers concludes that organized interests can and do have critical influence in the legal process but that organizational needs and external demands result in a more ad hoc less planned approach to law and litigation than much previous scholarship has suggested Ivers also argues that the ethnic economic and religious differences that led to the formation of competing Jewish organizations eighty years ago continue to drive a dynamic pluralism within the Jewish community manifest in part in divergent approaches to litigation
