Verdon,2024-08-08 Anthropology's original aim that of Maine and Morgan in the second half of the nineteenth century was to explain social variability. Behind that variability anthropologists searched for regularities that a theory would explain. It was thus both comparative and positivist, aiming to be scientific. The first theory to emerge was evolutionism. It was soon followed by functionalism, structuralism, and all the other isms that came after. In the final analysis, unlike scientific theories, all these theories did not supplant one another but merely agglutinated. The original project of a comparative and positivist anthropology thus completely failed, and the new gurus explain it by the very nature of anthropology's subject: human beings in society, which they claim are not amenable to scientific discourse. In this first of two books, Professor Michel Verdon rejects this defeatist explanation. To him, the failure does not stem from anthropology's objects but from the knowing subject. The explanation lies in the process of knowing: it is epistemological, and he finds the ultimate reason in the cosmology that underlies all theories and that no one has hitherto explored. This enables him completely to upturn the traditional wisdom: it is this implicit cosmology that radically hinders any conceptual rigour in the study of social organization, since it defines groups in a way that makes them ontologically variable. In the light of this unique diagnosis, he can define a new language, which he labels operational, that yields rigorous comparisons leading to refutable and rectifiable theories. In a second book that will soon follow, he applies this language to a number of ethnographies and draws from them astonishing conclusions about societies traditionally studied by anthropology. *Dictionary of Concepts in Cultural Anthropology* Robert H.

Winthrop,1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near-contemporary societies. Inherently pluralistic, it offers a framework in which the distinctive perspectives of each cultural world can be appreciated. Robert Winthrop's dictionary describes the major concepts that have shaped the discipline, both historically and theoretically. It sets modern anthropology in its proper context within the broader intellectual tradition. Eighty entries review the key concepts: culture, race, nature, symbolism, adaptation, the primitive, etc., that have established the fundamental problems and issues, guided research, and served as the focus for debate in key areas of the discipline. The entries, which range from 2,000 to 6,000 words in length, are both thorough in treatment and contemporary in relevance. Some entries are primarily of historical significance, while others describe recent developments. Each entry contains an annotated bibliography and a guide to additional reading on the subject. While this is not primarily a technical lexicon, many terms have been glossed and explained. Designed to be useful to students of anthropology, this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth. *The Social Anthropology of Radcliffe-Brown*

Adam Kuper,2013-11-05 This is the first collection of Radcliffe-Brown's work chosen to represent his books as well as his essays. It includes some classic pieces and also one or two lesser-known items. Radcliffe-Brown was a pioneer who established structural-sociological anthropology in the face of the entrenched traditions of ethnology and social evolutionism. First published in 1977. *Patterns of Discovery in the Social Sciences* Paul Diesing,2017-07-05 Social scientists are often vexed

because their work does not satisfy the criteria of scientific methodology developed by philosophers of science and logicians who use the natural sciences as their model In this study Paul Diesing defines science not by reference to these arbitrary norms delineated by those outside the field but in terms of norms implicit in what social scientists actually do in their everyday work
