Advanced Knowledge of the Mayan Civilization Rhandel Lopez, In the almost total isolation of the tropical lands of the Yucatán Peninsula the Maya developed a science based civilization more than 1 000 years before European explorers arrived Overlooking the emerald rainforest were their majestic skylines Architectural wonders with magnificent carvings adorned with hieroglyphic inscriptions these wonders were stunners This sophisticated urban center was the largest on Earth during the middle of the first millennium A D More than technologically stunning works of art and architecture the sprawling Maya city states were conceived to overwhelm observers with a sense

of wonder In addition to being centers of power these cities were incubators of science and technology places of learning and hubs of commercial activity that generated wealth for the kingdom After the demise of the Maya civilization these magnificent cities survived against all odds for more than a millennium Due to the innovative Maya technology employed during their construction the structures have remained intact despite environmental degradation the ravages of time natural disasters and the prying roots of the jungle These brilliant societies developed scientific advances and technological methods of discovery that were a millennium ahead of those produced by European sciences to preserve their cities It is even more impressive that these technological advances were created without the influence of outside cultures unlike in Europe Maya cities were designed and built on a grand scale with functional efficiency and artistic elegance Each city was a triumph of grace and power with its monumental palaces and temples There are no other styles of architecture like Mayan Unlike any different culture in Mesoamerica and any other world style of architecture its inventive design is alien and bizarre Where did this style originate Their art style also inspires their veneration of the cosmos and its impact on the Maya civilization s philosophy Ancient Egypt had fewer cities and pyramids than the Maya civilization which was among history s longest lived cultures More than 50 independent city states governed the Maya world spread out over 125 000 square miles **The**
