Rubbings Of Maya Sculpture:

Rubbings of Ancient Maya Sculpture by Joan W. Patten Carl D. Callaway, Joan W. Patten, 2012 Rubbings of Maya Sculpture Merle Greene Robertson, 1998-09-01 This packet of twelve CD ROM disks and printed instructions provides the first easy access to 2 000 of Merle Greene Robertson's rubbings of low relief sculpture from ninety Mesoamerican sites Many of the rubbings are irreplaceable records of monuments since destroyed by deterioration or looting and some have never before been published Access to the images carved on memorial Maya sculpture has always presented problems Many of the Classic Maya sites are difficult to get to and in those that can be visited easily the sculpture is often difficult to see Since nearly every trace of the original paint has eroded the viewer is dependent upon the sun or artificial light to produce contrasts between the background and the carved surfaces The rubbings preserved at the Latin American Library at Tulane University can be viewed by scholars only on special occasions because of their size and the difficulties of unwrapping and rewrapping them This easy to use compilation of high resolution scans makes it possible to enhance and manipulate images and print them out as needed The Viewer CD allows the user to interact with low resolution versions of the imagery and the extensive cataloging system **Merle Greene Robertson's Rubbings of Maya Sculpture** Merle Greene

Graham, 1972 **Maya Imagery, Architecture, and Activity** Maline D. Werness-Rude, Kaylee R. Spencer, 2015-05 Maya
Imagery Architecture and Activity privileges art historical perspectives in addressing the ways the ancient Maya organized
manipulated created interacted with and conceived of the world around them The Maya provide a particularly strong
example of the ways in which the built and imaged environment are intentionally oriented relative to political religious
economic and other spatial constructs In examining space the contributors of this volume demonstrate the core
interrelationships inherent in a wide variety of places and spaces both concrete and abstract They explore the links between
spatial order and cosmic order and the possibility that such connections have sociopolitical consequences This book will
prove useful not just to Mayanists but to art historians in other fields and scholars from a variety of disciplines including
anthropology archaeology geography and landscape architecture The Long Silence (2) Stephan Merk, 2016-04-22 In The
Long Silence first published 2011 Stephan Merk described the standing Maya Puuc architecture of a 100 square kilometer
wide area in Northern Campeche Mexico The Long Silence 2 presents the results of the architectural survey of an equally
large and almost untouched region immediately south and compares the results of both projects With additional
contributions by Nicholas Dunning and Eric Weaver Daniel Gra a Behrens Guido Krempel and Karl Herbert Mayer

Mesoamerican Mythology Kay Almere Read, Jason J. Gonzalez, 2002-06-13 Illustrated with scores of drawings and halftone photos this guidebook to the mythology of Mexico and Central America focuses mainly on Mexican Highland and Maya areas due to their importance in Mesoamerican history **Lifeways in the Northern Maya Lowlands** Jennifer P. Mathews, Bethany A. Morrison, 2006 The flat dry reaches of the northern Yucatán Peninsula have been largely ignored by archaeologists drawn to the more illustrious sites of the south This book is the first volume to focus entirely on the northern Maya lowlands presenting a broad cross section of current research projects in the region by both established and up and coming scholars To address the heretofore unrecognized importance of the northern lowlands in Maya prehistory the contributors cover key topics relevant to Maya studies the environmental and historical significance of the region the archaeology of both large and small sites the development of agriculture resource management ancient politics and long distance interaction among sites As a volume in the series Native Peoples of the Americas it adds a human dimension to archaeological findings by incorporating modern ethnographic data By exploring various social and political levels of Maya society through a broad expanse of time Lifeways in the Northern Maya Lowlands not only reconstructs a little known past it also suggests the broad implications of archaeology for related studies of tourism household economies and ethno archaeology It is a benchmark work that pointedly demonstrates the need for researchers in both north and south to ignore modern geographic boundaries in their search for new ideas to further their understanding of the ancient Maya **War Owl Falling** Markus Eberl, 2017-11-21 An archaeological exploration of the role of creativity and invention in the ancient Maya civilization Drawing on archaeological findings from the Maya lowlands War Owl Falling shows how innovation and creativity led to social change in ancient societies Markus Eberl discusses the ways eighth century Maya and Maya commoners in

particular reinvented objects and signs that were associated with nobility including scepters ceramic vessels ballgame equipment and the symbol of the owl These innovations he argues reflect assertions of independence and a redistribution of power that contributed to the Maya collapse in the Late Classic period Eberl emphasizes that decision making the ability to imagine alternate worlds and to act on that vision plays a large role in changing social structure over time Contextualizing these decisions in his Garden of Forking Paths model Eberl shows how innovators were those individuals who imagined an array of possible futures and negotiated power to reach desirable outcomes He dissects the social underpinning of Maya creativity by illustrating their situated method of learning via observation and imitation stressing that societal constraints or opportunities dictated whether members ideas were realized Pinpointing where and when Maya inventions emerged how individuals adopted them and why War Owl Falling connects technological and social change in a novel way A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase **Social Sciences** Lawrence Boudon, Katherine D. The one source that sets reference collections on Latin American studies apart from all other geographic areas of the world The Handbook has provided scholars interested in Latin America with a bibliographical source of a quality unavailable to scholars in most other branches of area studies Latin American Research Review Beginning with volume 41 1979 the University of Texas Press became the publisher of the Handbook of Latin American Studies the most comprehensive annual bibliography in the field Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines the Handbook alternates from year to year between social sciences and humanities The Handbook annotates works on Mexico Central America the Caribbean and the Guianas Spanish South America and Brazil as well as materials covering Latin America as a whole Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research under way in specialized areas The Handbook of Latin American Studies is the oldest continuing reference work in the field Lawrence Boudon of the Library of Congress Hispanic Division has been the editor since 2001 and Katherine D McCann has been assistant editor since 2000 The subject categories for Volume 59 are as follows Anthropology Economics Geography Government and Politics International Relations Sociology Electronic Resources for the Social Sciences **The Sculpture of Yaxchilan** Peter Mathews, 1988

The Art of Urbanism William Leonard Fash, Leonardo López Luján, 2009 The Art of Urbanism explores how the royal courts of powerful Mesoamerican centers represented their kingdoms in architectural iconographic and cosmological terms Through an investigation of the ecological contexts and environmental opportunities of urban centers the contributors consider how ancient Mesoamerican cities defined themselves and reflected upon their physical and metaphysical place via their built environment Themes in the volume include the ways in which a kingdom's public monuments were fashioned to reflect geographic space patron gods and mythology and how the Olmec Maya Mexica Zapotecs and others sought to center their world through architectural monuments and public art This collection of papers addresses how communities

leveraged their environment and built upon their cultural and historical roots as well as the ways that the performance of calendrical rituals and other public events tied individuals and communities to both urban centers and hinterlands Twenty three scholars from archaeology anthropology art history and religious studies contribute new data and new perspectives to the understanding of ancient Mesoamericans e tm own view of their spectacular urban and ritual centers **Katunob** ,1990
