Selected References in Elective Orthopaedics Anthony H.C. Ratliff, Roger M. Atkins, Deborah M. Eastwood, 2012-12-06 References to the reader are like insulin to the diabetic when needed they are indispensable but in excess they induce coma Moreover when references are simply shovelled into a text in great gobbets it is hard to resist the suspicion that the author has not read them all but has copied some from a previous author's list The story is told of one author who mischievously included in his list a bogus reference to an obscure foreign journal and gleefully noted its frequent appearance in future articles One of the joys of this present book is that the number of references to each topic is very small But these few have been selected with discretion and studied with care Each group of references is followed by a critical assessment written with balanced judgment and commendable brevity and how refreshing it is to find authors who read much but write little In fact these authors have followed the pattern of the sister work *Selected References in Orthopaedic Trauma* published in 1989
