Robert R. Redfield

Nuke Pb 1988:

New Nukes Praful Bidwai, Achin Vanaik, 2000 Nuclear tests in India and Pakistan brought the threat of nuclear war back to the world's centre stage. The tests and nuclear moves have raised regional tension, increased poverty in already impoverished nations and could possibly have fuelled an arms race which goes beyond the borders of the two countries. This text examines the causes and consequences of India and Pakistani nuclear tests. The book provides a framework for understanding the global context of these tests and looks at approaches for nuclear abolition in Asia and the West.

US Strategic and Defensive Missile Systems 1950-2004 Mark Berhow, 2012-09-20 For 40 years following the end of World War II the Western democratic governments and the Eastern Bloc Communist powers were locked in the ideological political and economic struggle of the Cold War. The United States and the Soviet Union developed missile systems capable of delivering conventional and nuclear explosives against enemy massed bomber formations in the air and of delivering retaliatory nuclear payloads against ground targets located on distant continents. The missile systems played both a defensive role and a potential offensive role which was parlayed to the public as deterrence against attack by the rival bloc. This illustrated guide provides a detailed overview of the fixed launch site strategic missile systems of the United States.
