Nursing At The End Of Life:

Nursing Care at the End of Life Joyce V Zerwekh, 2005-12-28 *Nursing Care at the End of Life* Palliative Care for Patients and Families explores the deep issues of caring for the dying and suffering. The book is based on the Hospice Family Caregiving Model previously published by the author and focuses on the practice implications of care for the dying. The book is written in a clear and user friendly style and is ideal for undergraduate nursing students learning about dying, suffering and caring for individuals and their families.

Palliative Nursing Shaun Kinghorn, Sandra Gaines, 2007-11-14 This title is directed primarily towards health care professionals outside of the United States. Content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally, particularly the UK NICE guidance on Supportive and palliative care for people with cancer and the Care of the Dying Pathway. It reflects the rapid development of palliative nursing as an emerging specialty. It helps in the process of defining palliative nursing and how it interfaces with other disciplines within the specialty. The text is divided into three sections and comprehensively yet sensitively covers all aspects of palliative nursing. Key themes covered include pain control, symptom control, loss and grief and handling loss. A strong emphasis is placed on the integration of theory and practice and evidence based care. Reconciliation of the theory and practice is achieved by the use of case studies. It addresses malignant and non malignant palliative care. Research and extensive literature support each chapter. Content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally, particularly the UK NICE guidance on Supportive and palliative care for people with cancer and the Care of the Dying Pathway. Three new chapters on Sexuality, Care of the Dying Pathway, Changing roles of the nurse in palliative care. New appendix on North American drug names/equivalents for the international market.

Palliative Care Nursing Marianne Matzo, Deborah Witt Sherman, 2006 Annotation Offering a blend of holistic and humanistic caring coupled with aggressive management of pain and symptoms associated with advanced disease, this resource is organized around 15 competencies in palliative care developed by the American Association of Colleges of Nursing, with each chapter outlining specific skills needed to achieve each competency.

Nursing Care at the End of Life Ginny Wacker Guido, 2010 *Nursing Care at the End of Life* by Ginny Wacker Guido incorporates many of the chapter features in *High Acuity Nursing* 5th ed by Kathleen Dorman Wagner. Using this format, the author presents material ranging from the legal and ethical aspects that affect care to the clinical issues nurses face when dealing with acute illness, pain and dying to communication and family dynamics. Case studies give readers an opportunity to process and apply the chapter material. The role of the nurse is highlighted throughout the book and each chapter is followed by NCLEX style review questions. This is a perfect reference for anyone studying to become a nurse or a nurse needing a professional resource for career success.
