Conference, 1989 *Nursing Diagnosis and Care Planning* Barbara J. Taptich, Patricia W. Iyer, Donna Bernocchi-Losey, 1989 The 2nd Edition organized according to NANDA's Human Response Categories framework provides a quick reference for identifying nursing diagnoses. The definition, defining characteristic, and related factors are provided for diagnostic categories. The 2nd Edition also includes care planning guides for high frequency medical diagnoses and a unique section on differentiating similar diagnoses.

Nursing Diagnosis Lynda Juall Carpenito-Moyet, 2006 Revised to incorporate the latest NANDA approved nursing diagnoses, the Eleventh Edition of this classic text offers definitive guidance on key elements of nursing diagnosis and its application to clinical practice. Section 1 thoroughly explains the role of nursing diagnosis in the nursing process and in care planning. Section 2 is a comprehensive A to Z guide to current nursing diagnoses. Section 3 focuses on collaborative problems. This edition lists associated NIC Nursing Interventions Classifications and NOC Nursing Outcomes Classifications for every NANDA diagnosis. New diagnoses added and modified in accordance with the latest NANDA meeting are in an appendix for easy access. *Classification of Nursing Diagnoses*, 1994 **Nursing Interventions for Infants, Children, and Families**

Martha Craft-Rosenberg, Janice Denehy, 2000-09-12 The purpose of *Nursing Interventions with Infants Children and Families* is to systematically describe nursing interventions used by nurses who serve this population. The book covers interventions for infants and children as clients as well as the family as a client. Topics include interventions on prevention as well as interventions for children and families experiencing health problems. Each chapter examines the theoretical and research literature support for the intervention and links to appropriate nursing diagnoses and outcomes. However, the focus of the chapter is on specific activities nurses can select to implement the intervention. A case study is presented to illustrate how the intervention is used in nursing practice. Implications for further research are presented with the goal of advancing nursing science by stimulating further study of nursing interventions.
