The Nordic Languages Oskar Bandle, Lennart Elmevik, Gun Widmark, 2002 Annotation This handbook is conceived as a comprehensive history of the North Germanic languages from the oldest times up to the present day Whereas most of the traditional presentations of Nordic language history are confined to individual languages and often concentrate on purely linguistic data the present work covers the history of all Nordic languages in its totality embedded in a broad cultural historical context The Nordic languages are described both individually and in their mutual dependence as well as in relation to the neighboring non Nordic languages The handbook is not tied to a particular methodology but keeps in principle to a pronounced methodological pluralism encompassing all aspects of actual methodology Moreover it combines diachronic with synchronic systematic aspects longitudinal sections with cross sections periods such as Old Norse transition from Old Norse to Early Modern Nordic Early Modern Nordic 1550 1800 and so on The description of Nordic language history is built upon a comprehensive collection of linguistic data it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries The organization of the handbook combines a central part on the detailed chronological developments and some chapters of a more general character chapters on theory and methodology in the beginning and on overlapping spatio temporal topics in the end

Prose Styles Huntington Brown, 1966 *Prose Styles* was first published in 1966 How can one distinguish in any text between features answering to the timeless function of its type and those accountable to passing tendencies of periods fashions schools and individual writers This study is addressed to that general question and while it is not a writer's manual in any sense it should prove enlightening and helpful to anyone with a genuine interest in style The author identifies with concreteness as to detail and illustration the styles of five broad types of non metrical communication in spoken or written discourse that have been conspicuous in the culture or life of the western world from remote times He names these styles the deliberative the expository the tumbling the prophetic and the indenture In discussing each he explains how each set of features is the virtually inevitable articulation of the purpose of a type of transaction the conditions of which have remained constant from age to age He demonstrates for example that there are striking elementary affinities between such otherwise dissimilar works as the Sermon on the Mount and Lamb's Dissertation upon Roast Pig or between Beowulf and a modern day newspaper sports column Dudley Fitts comments This is a popular book for the literate public no easy not superficial but clearly not recondite The book will be especially interesting to professional writers as well as to students and teachers of literature This is Volume 1 Minnesota Monographs in the Humanities of which Gerhard H Weiss is the series editor

Insistent Images Elżbieta Tabakowska, Christina Ljungberg, Olga Fischer, 2007-03-14 Insistent Images presents a

number of new departures dealing with iconicity on the conceptual and the structural levels On the level of structure the interface between different aspects of iconicity lexical meaning and grammar is discussed in reference to both spoken and signed languages Novel approaches to aural iconicity investigate a wide range of phenomena from phonological iconicity to the role of iconic features in discourse in the nineteenth century practice of reading aloud in the almost magic incantations of fin de siècle poetry and in Tolkien's invented languages Several papers examine the function of iconicity in visual and avant garde poetry where iconic features allow a reduction of means which paradoxically generates textual diversification and complexity A discussion of iconic text strategies shows how texts are comprehended through iconic holistic transfer from complex natural and action patterns Literature which integrates text image and physical space is another novel area of study as are the investigations into the iconic properties of film and of multimedia performance Film is intrinsically iconic while at the same time being like photography indexical in multimedia performance on the other hand iconicity functions intermedially by both integrating and reflecting processes of perception and conceptualization These last two new fields of inquiry further enhance this truly interdisciplinary volume's explorations of icons as insistent images Teaching Composition Gary Tate, 1987
