*The Farm as Natural Habitat* Dana L. Jackson, Laura Jackson, 2002-04 The Farm as Natural Habitat is a vital new contribution to the debate about agriculture and its impacts on the land Arising from the conviction that the agricultural landscape as a whole could be restored to a healthy diversity the book challenges the notion that the dominant agricultural landscape bereft of its original vegetation and wildlife and despoiled by chemical runoff is inevitable if we are to feed ourselves Contributors bring together insights and practices from the fields of conservation biology sustainable agriculture and environmental restoration to link agriculture and biodiversity farming and nature in celebrating a unique alternative to conventional agriculture Rejecting the idea that ecological sacrifice zones are a necessary part of feeding a hungry world the book offers compelling examples of an alternative agriculture that can produce not only healthful food but fully functioning ecosystems and abundant populations of native species Contributors include Collin Bode George Boody Brian DeVore Arthur Tex Hawkins Buddy Huffaker Rhonda Janke Richard Jefferson Nick Jordan Cheryl Miller Heather Robertson Carol Shennan Judith Soule Beth Waterhouse and others The Farm as Natural Habitat is both hopeful and visionary grounded in real examples and guided by a commitment to healthy land and thriving communities It is the first book to offer a viable approach to addressing the challenges of protecting and restoring biodiversity on private agricultural land and is essential reading for anyone concerned with issues of land or biodiversity conservation farming and agriculture ecological restoration or the health of rural communities and landscapes
