Protecting A Sacred Gift Water And Social Change In Mexico:

Protecting a Sacred Gift Scott Whiteford, Roberto Melville, 2002 *Protecting a Sacred Gift* makes a strong case that culture gender place politics and history shape Mexico's water resources policy management strategies and ultimately its physical and cultural landscapes This edited volume presents diverse disciplinary approaches anthropology development studies geography history political science sociology and women's studies all of which converge on theoretical and substantive interest in equity public participation and power associated with water Indeed the editors make the bold claim that water resources management must go far beyond technological innovation and economic efficiency to include visions of fairness in access protection of the least privileged engagement of stakeholders in all phases of distribution and maintenance and a view of development that is sustainable

Reseña de "Protecting a Sacred Gift: Water and Social Change in Mexico" de Scott Whiteford Y Roberto Melville (eds.) Pablo Alberto Torres Lima, 2005

Water Policy in Mexico Hilda R. Guerrero García Rojas, 2018-05-23 Mexico is currently facing severe problems with water availability wastage and contamination The most contaminated and over exploited water resources are concentrated in the most populated areas of the country where water is scarcer and its quality makes it unsuitable for a variety of uses including human consumption At the same time it is indisputable that water quality is a determining factor in public health and ecosystems The significant growth in population and industry results in a high demand for water along with contaminating discharges few of which are treated and the impact upon the ecosystems is evident This book addresses all these topics in a single volume taking into account the challenges presented by the economic institutional and environmental considerations in Mexico's water policy framework

Neoliberalism and Commodity Production in Mexico Thomas Weaver, James B. Greenberg, William L. Alexander, Anne Browning-Aiken, 2012-06-15 *Neoliberalism and Commodity Production in Mexico* details the impact of neoliberal practice on the production and exchange of basic resources in working class communities in Mexico Using anthropological investigations and a market driven approach contributors explain how uneven policies have undermined constitutional protections and working class interests since the Mexican Revolution of 1910 Detailed ethnographic fieldwork shows how foreign investment privatization deregulation and elimination of welfare benefits have

devastated national industries and natural resources and threatened agriculture driving the campesinos and working class deeper into poverty Focusing on specific commodity chains and the changes to production and marketing under neoliberalism the contributors highlight the detrimental impacts of policies by telling the stories of those most affected by these changes They detail the complex interplay of local and global forces from the politically mediated systems of demand found at the local level to the increasingly powerful municipal and state governments and the global trade and banking institutions Sharing a common theoretical perspective and method throughout the chapters *Neoliberalism and Commodity Production in Mexico* is a multi sited ethnography that makes a significant contribution to studies of neoliberal ideology in practice

Contemporary Water Governance in the Global South Leila M. Harris, Jacqueline A. Goldin, Christopher Sneddon, 2015-03-24 The litany of alarming observations about water use and misuse is now familiar over a billion people without access to safe drinking water almost every major river dammed and diverted increasing conflicts over the delivery of water in urban areas continuing threats to water quality from agricultural inputs and industrial wastes and the increasing variability of climate including threats of severe droughts and flooding across locales and regions These issues present tremendous challenges for water governance This book focuses on three major concepts and approaches that have gained currency in policy and governance circles both globally and regionally scarcity and crisis marketization and privatization and participation It provides a historical and contextual overview of each of these ideas as they have emerged in global and regional policy and governance circles and pairs these with in depth case studies that examine manifestations and contestations of water governance internationally The book interrogates ideas of water crisis and scarcity in the context of bio physical political social and environmental landscapes to better understand how ideas and practices linked to scarcity and crisis take hold and become entrenched in policy and practice The book also investigates ideas of marketization and privatization increasingly prominent features of water governance throughout the global South with particular attention to the varied implementation and effects of these governance practices The final section of the volume analyzes participatory water governance querying the disconnects between global discourses and local realities particularly as they intersect with the other themes of interest to the volume Promoting a view of changing water governance that links across these themes and in relation to contemporary realities the book is invaluable for students researchers advocates and policy makers interested in water governance challenges facing the developing world

Water and Politics Veronica Herrera, 2023-11-29 Most of the world s population lives

in cities in developing countries where access to basic public services such as water electricity and health clinics is either inadequate or sorely missing Water and Politics shows how politicians benefit politically from manipulating public service provision for electoral gain In many young democracies politicians exchange water service for votes or political support rewarding allies or punishing political enemies Surprisingly the political problem of water provision has become more pronounced as water service represents a valuable political currency in resource scarce environments Water and Politics finds that middle class and industrial elites play an important role in generating pressure for public service reforms
