As a profit driven criminal activity organised crime operates in an environment which is not limited to the underworld economy alone. Assessments of the threat posed by organised crime and strategic preventive actions to tackle this phenomenon require an understanding of the vulnerable spots in the legal economy that are or might be exploited by crime. This book is the outcome of a study known under the acronym MAVUS II Method for and Assessment of Vulnerability of Sectors II which addresses this issue. The study financed under the 2005 AGIS programme of the European Commission provides a vulnerability profile of the European pharmaceutical sector based on a new methodology to scan economic sectors for their vulnerability to organised crime.
