

An aerial photograph of a dense, vibrant green rainforest. A light blue river winds through the forest, creating a series of meanders and small islands. The forest canopy is thick and uniform in color, with the river providing a sharp contrast in both color and texture.

Protecting Rain Forests:

Protecting Earth's Rain Forests Anne Welsbacher, 2015-08-01 From brilliantly colored birds and wild elephants to towering trees and exotic flowers rain forests are home to more than half of Earth's plants and animals. People living in rain forests depend on this vast array of life and Earth itself relies on the world's rain forests to keep our climate and atmosphere in balance. But rain forests around the world are under threat. Once rain forests covered nearly 14 percent of Earth but now they have shrunk to less than half that size. People around the globe are joining the quest to save rain forests. With engaging text and eye-catching images plus a special Going Green section this book tells you all about Earth's rain forests and what you can do to protect them. [Protecting Rain Forests](#) Moira Butterfield, 2006 Provides an overview of the world's precious rain forests and the unique creatures and plants that live there. Also examines current threats to the rain forests' survival and explains what is being done to protect them. [Protecting Rain Forest Animals](#) Lauren Kukla, 2017-01-01 Young readers will love learning about animals and their habitat with *Protecting Rain Forest Animals*. This book explores rain forests, the animals that live there like spiders and sloths, and conservationists like Jane Goodall that work to protect animals. Bright full-page photos of wildlife and easy-to-read text fill the pages of this fun title. Aligned to Common Core Standards and correlated to state standards. Applied to STEM Concepts of Learning Principles. Sandcastle is an imprint of Abdo Publishing, a division of ABDO. **The Conservation Atlas of Tropical Forests** N. Mark Collins, 1991-06-18 The first of a series designed to cover all tropical rain forests in the world. This is a visual portfolio of detailed maps of Asia accompanied by a text which seeks to analyze the extent and causes of deforestation and to point a way towards sustainable forest development. [The Tropical Rain Forest](#) Marius Jacobs, 2012-12-06 In recent years tropical forests have received more attention and have been the subject of greater environmental concern than any other kind of vegetation. There is an increasing public awareness of the importance of these forests not only as a diminishing source of countless products used by mankind nor for their effects on soil stabilization and climate but as unrivalled sources of what today we call biodiversity. Threats to the continued existence of the forests represent threats to tens of thousands of species of organisms both plants and animals. It is all the more surprising therefore that there have been no major scientific accounts published in recent years since the classic handbook by Paul W. Richards *The Tropical Rain Forest* in 1952. Some excellent popular accounts of tropical rain forests have been published including Paul Richard's *The Life of the Jungle* and Catherine Caulfield's *In the Rainforest and Jungles* edited by Edward Ayensu. There have been numerous often conflicting assessments of the rate of conversion of tropical forests to other uses and explanations of the underlying causes and in 1978 UNESCO/UNEP/FAO published a massive report *The Tropical Rain Forest* which although full of useful information is highly selective and does not fully survey the enormous diversity of the forests. **Tropical Rain Forest Habitats** Barbara Taylor, 2006-12-30 Describes various animals of the rain forest and where they live, discussing species, diets, hunting, defenses, and life cycles, and the structure of the ecosystem, and also explores

Tropical Rain Forest: A Wider Perspective F.B. Goldsmith, 2012-12-06

The international perspective for this book is the unprecedented level of concern over deforestation recognized by the meeting of world leaders at the 1992 Earth Summit in Rio de Janeiro and culminating in the appointment of the Intergovernmental Panel on Forests IPF under the auspices of the UN Commission on Sustainable Development The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources Since the conservation campaigns of the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities However while forest cover in some temperate countries is increasing irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest and the capability weakest While accepting the urgency of the situation and the need for greater coherence of action at a global level the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance
