Conway,2008-12-08 Honorable Mention 2008 ASLI Choice Awards Atmospheric Science Librarians International This book offers an informed and revealing account of NASA s involvement in the scientific understanding of the Earth s atmosphere Since the nineteenth century scientists have attempted to understand the complex processes of the Earth s atmosphere and the weather created within it This effort has evolved with the

Twenty Years of Ozone Decline Christos Zerefos, G. Contopoulos, Gregory Skalkas, 2009-05-24 Homer speaks of lightning bolts after which a grim reek of sulphur bursts forth and the air was lled with reeking brimstone Homer 3000 BC The odour was not actually the smell of sulphur dioxide associated with burning sulphur but rather was the rst recorded detection of the presence of another strong odour that of ozone O_3 in Earth's atmosphere These molecules were formed by the passage of 3 lightning through the air created by splitting the abundant molecular oxygen O_2 molecules into two followed by the addition of each of the free O atoms to another O to form the triatomic product In fact most of the ozone molecules present O_3 in the atmosphere at any time have been made by this same two step splitti plus combination process although the initiating cause usually begins with very energetic solar ultraviolet UV radiation rather than lightning Many thousands of years later the modern history of ozone began with its synthesis in the laboratory of H F Schonbein in 1840 Nolte 1999 although the positive con rmation of its three oxygen atom chemical formula came along sometime later Scientific interest in high altitude stratospheric ozone dates back to 1881 when Hartley measured the spectrum of ozone in the laboratory and found that its ability to absorb UV light extended only to 293nm at the long wavelength end Hartley 1881a

Societal Impact of Spaceflight Steven J. Dick, Roger D. Launius, 2007 Since the dawn of spaceflight advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life Assertions abound about the impact of spaceflight on society and its relationship to the larger contours of human existence Fifty years after the Space Age began it is time to examine the effects of spaceflight on society in a historically rigorous way Has the Space Age indeed had a significant effect on society If so what are those influences What do we mean by an impact on society And what parts of society Conversely has society had any effect on spaceflight What would be different had there been no Space Age The purpose of this volume is to examine these and related questions through scholarly research making use especially of the tools of the historian and the broader social sciences and humanities Herein a stellar array of scholars does just that and arrives at sometimes surprising conclusions
