Global Environmental History Ian G Simmons, 2008-03-05 Courses which deal with environmental history have long lacked a comprehensive overview I G

Simmons has made a significant contribution with a book that looks at the long term history of environment and humanity from 10 000 BC to AD 2000 This far reaching text considers the global picture and recognises the contributions of many disciplines including the natural sciences the social sciences and increasingly the humanities As a starting point this book takes the major phases of human technological evolution of the last 12 000 years and considers how these have affected the natural world It then considers the response to conditions such as climate change putting today s preoccupations into a long term perspective This is a book of history not prophecy and so makes no judgements on current anxieties The Protection and Conservation of Water Resources Hadrian F. Cook,1998-06-11 This book is about water in Britain It is about resources their conservation protection of water quality for human consumption and aquatic ecosystems Presently there is a struggle to reverse long term trends towards contaminated groundwater polluted rivers and dirty beaches While farmers have to contend with fertiliser controls and sewage undertakings improve treatment industry is now under the most stringent pollution control measures in history Amidst the dash for more dishwashers and washing machines and in a country which prides itself on its gardening we are told the climate is changing and this may put further pressure on resources Meanwhile recent dry winters have compounded long term over abstraction problems reducing river flows and resulting in drought orders Since 1989 there has been privatisation of water and sewage undertakings and the loss of what was once a public service to commercial providers This has proved controversial and anything from low reservoirs to highly paid water executives keeps water in the news year by year There have also been major changes in the environmental regulation of water with the creation of the National Rivers Authority and subsequently the Environment Agency and SEPA for Scotland There is now a relatively stable and regulated provision of water and sewerage services across England Scotland and Wales With the issues such as sustainable development demand management including leakage controls and environmental assessment driving water policy and planning there is a price to pay for investment and this has to be shifted towards the consumer This book explores all these aspects of Britain s water resources providing a comprehensive description of recent policy developments It is written for advanced students of environmental science and policy and for professionals in the water industry and regulatory bodies *Climate Adaptation Governance in Cities and Regions* Jörg Knieling,2016-05-11 Global climate change creates new challenges in particular for cities and regions As centres of human activity they are especially vulnerable to climate change impacts Adapting to a changing climate requires dealing with multiple uncertainties and complexity in order to allow proactive action Therefore cities and regions around the globe face the challenge of exploring flexible and innovative forms of governance which have to address specific local or regional vulnerabilities and build capacity to accommodate future change This raises questions about the roles of stakeholders the involvement of citizens the composition and use of formal and informal instruments as well as the implementation of different forms of organization and regulation at the local and regional level This book provides case studies from cities and regions all around

the world It analyses climate change adaptation from a perspective of organizing administering and implementing local and regional adaptation strategies and measures It looks into actors actor constellations institutions and networks of climate adaptation And it provides the reader with knowledge about good practices and experiences to be transferred for solving adaptation challenges in cities and regions around the globe **Managing Scotland's Environment** Charles Warren,2009 This text is designed for those studying Scotland s environment at undergraduate and graduate level and for those engaged in farming forestry conservation game sports and employment This edition also includes a chapter on energy and the environment Rivers of Europe Klement Tockner,Urs Uehlinger,Christopher T. Robinson,2009-01-31 Based on the bestselling book Rivers of North America this new guide stands as the only primary source of complete and comparative baseline data on the biological and hydrological characteristics of more than 180 of the highest profile rivers in Europe With numerous full color photographs and maps Rivers of Europe includes conservation information on current patterns of river use and the extent to which human society has exploited and impacted them Rivers of Europe provides the information ecologists and conservation managers need to better assess their management and meet the EU legislative good governance targets Coverage on more than 180 European rivers Summarizes biological ecological and biodiversity characteristics Provides conservation managers with information to resolve conflicts between recreational use of rivers their use as a water supply and the need to conserve natural habitats Data on river hydrology maximum minimum and average flow rates seasonal variation in water flow Numerous full color photographs Information on the underlying geology and its affect on river behaviour Water 21 ,1999 The Hydrology of the UK Mike Acreman,2012-11-12 The Hydrology of the UK assesses the changing hydrology of the UK focusing on key issues that affect the fundamental hydrological processes and have important implications for water resource management flood risk and environmental quality The book is divided into 3 sections Section 1 examines the causes of change to the hydrology of the UK including the impact of climate change land use and geomorphological change and dam construction Section 2 assesses the effects of these pressures on UK rivers groundwater lakes ponds reservoirs and wetlands looking at water quality degradation pollution and protection Section 3 examines the responses of government organisations responsible for planning and management of water including Environment Agencies British Hydrological Society and the growing urgency for a World Hydrology Initiative Change will continue to be a major feature of UK hydrology in the future This book provides an understanding of the changing hydrology of the UK and the international scene today and looks to the needs for the future *American Book Publishing Record* ,2002

The Environment Chris C. Park,2001 The second edition of this fully integrated introductory text for courses in environmental studies and physical geography builds on the resounding success of the first edition providing a comprehensive account of modern environmental issues and the physical and socio economic framework in which they are set It explains the principles and applications of the different parts of the Earth s system the lithosphere atmosphere

hydrosphere and the biosphere and explains the interrelationships within and between these systems It explores the present environmental crisis examines how the planet Earth fits into the wider universe and explores human environment interactions Perspectives on British Rural Planning Policy, 1994-97 Andrew W. Gilg, 2019-01-15 First published in 1999 this volume explores the issue of rural planning which has become a complex activity in which policies in one area have important ramifications in other policy areas It is thus very important for all those involved in rural planning affairs to remain not only up to date but to place recent developments in a longer perspective This new series aims to answer all these needs by providing an accurate and informed account of recent developments in North American British and European rural policy and critiques of policy implementation and its impacts from new material and from analyses of published research findings This second volume in the series covers the last few years of the John Major administration until the election of the Tony Blair government in May 1997 It is divided into six chapters overview of changes affecting all rural planning activities the environment town and country planning extensive land uses nature conservation and recreation and social land economic issues The next British volume will cover the entire period of the current government with successive volumes covering each new government as it unfolds **The British National Bibliography** Arthur James Wells, 2001 **Selected Water Resources Abstracts** , 1989
