Proterozoic Crustal Evolution K.C. Condie, 1993-02-03 As a final product of the International Geological Correlation Program IGCP Project 217 this volume brings together significant advances in the understanding of Proterozoic crustal evolution This IGCP Project focussed on nine research objectives 1 Comparison of Archean and Proterozoic supracrustal assemblages to more fully understand differences between Archean and post Archean tectonic regimes 2 To more fully understand the geochemical differences between Archean and post Archean sediments and to evaluate the various factors that control sediment composition 3 From combined U Pb zircon and whole rock Sm Nd studies to see if the apparent 2.4 Ga continental crust generation gap is real 4 To employ new techniques in the dating of individual zircons to more fully understand Proterozoic tectonic history and the role of crustal reworking 5 From trace element ratios and Nd isotopic data from basalts to better understand Proterozoic mantle evolution 6 To encourage more detailed studies of the anorogenic granite anorthosite association to better understand its origin and significance in terms of crustal evolution 7 From combined Nd Pb and Sr isotopic data to more precisely estimate the amount of new continental crust formed during the Proterozoic 8 To encourage joint P T and geochronological studies of Proterozoic and high grade terranes to better understand Proterozoic orogenesis and 9 To try and understand why hydrothermal precious metal deposits are relatively rare in the Proterozoic compared to both the Archean and the Phanerozoic The book should be of interest to professionals in the geosciences especially geochemists petrologists and structural geologists and graduate students in the same fields **European**

activity particularly in previously under researched areas is reflected Chapters are arranged in approximate time order of the events described and new field data are set in their local tectonic context Speculation on models for the plate tectonic setting of Early Palaeozoic Wales is included with an examination of the necessary components Bibliographic Index ,1983
