Crime Control and Everyday Life in the Victorian City David Churchill, 2017-12-29 The history of modern crime control is usually presented as a narrative of how the state wrested control over the governance of crime from the civilian public Most accounts trace the decline of a participatory discretionary culture of crime control in the early modern era and its replacement by a centralized bureaucratic system of responding to offending The formation of the new professional police forces in the nineteenth century is central to this narrative henceforth it is claimed the priorities of criminal justice were to be set by the state as ordinary people lost what authority they had once exercised over dealing with offenders This book challenges this established view and presents a fundamental reinterpretation of changes to crime control in the age of the new police It breaks new ground by providing a highly detailed empirical analysis of everyday crime control in Victorian provincial cities revealing the tremendous activity which ordinary people displayed in responding to crime alongside a rich survey of police organization and policing in practice With unique conceptual clarity it seeks to reorient modern criminal justice history away from its established preoccupation with state systems of policing and punishment and move towards a more nuanced analysis of the governance of crime More widely the book provides a unique and valuable vantage point from which to rethink the role of civil society and the state in modern governance the nature of agency and authority in Victorian England and the historical antecedents of pluralized modes of crime control which characterize contemporary society

Crime, Courts and Community in Mid-Victorian Wales Rachael Jones, 2018-05-15 Focuses on the key feature of women's experience in an area often overlooked by crime historians but that is becoming more popular with the modern attention paid to women's history The book is written in an accessible way which will be appealing to undergraduates and postgraduates The focus on Wales the Welsh and Welsh language and immigration will contribute to contemporary investigations

London's Shadows Drew D. Gray, 2010-07-01 In 1888 London was the capital of the most powerful empire the world had ever known and the largest city in Europe In the west a new city was growing populated by the middle classes the epitome of Victorian values Across the city the situation was very different The East End of London had long been considered a nether world a dark and dangerous region outside the symbolic walls of the original City Using the Whitechapel murders of Jack the Ripper as a focal point this book explores prostitution poverty revolutionary politics immigration the
