Proven Portals:

Encyclopedia of Portal Technologies and Applications Tatnall, Arthur, 2007-04-30 Informatique **Knowledge at Work** Robert Defillippi, Michael Arthur, Valerie Lindsay, 2009-02-04 This book's unique perspective stems from its knowledge diamond framework to examine how individuals, communities, organizations, and host industries reciprocally influence each other in the course of knowledge work. This highly topical book focuses on work-based projects as a focus for organizational learning. Establishes the link between individual, community, organization, and industry learning. Suggests that organizations need to recognize and understand this link if they are to capitalize on project-based learning. Incorporates material on project-based learning in virtual communities. Refers to different examples such as the film industry, the software industry, and the boat building industry. Includes end-of-chapter questions provoking reflection and discussion. *Intranets for Info Pros* Mary Lee Kennedy, Jane Dysart, 2007 The intranet is among the primary landscapes in which information-based work occurs yet many info pros continue to view it with equal parts skepticism and dread. In *Intranets for Info Pros* editors Mary Lee Kennedy and Jane Dysart and their 10 expert contributors provide support and encouragement to the information professional responsible for implementing or contributing to an intranet. Chapters demonstrate the intranet's strategic value, describe important trends and best practices, and equip info pros to make a key contribution to their organization's intranet success. Corporate Portals Empowered with XML and Web Services Anura Guruge, 2002-11-21 Following the humbling of the dot-coms, it is well implemented corporate portals that are ushering in a new and prosperous era of e-business. *Corporate Portals Empowered with XML and Web Services* provides decision makers with a clear and concise explanation of what portals are all about, why you really need a portal strategy, how you go about implementing one, and the issues you have to encounter and surmount. Guruge shows how you can successfully use XML and web services to empower your portals for collaboration, knowledge management, CRM, ERP, and supply chain management. Extensive examples of corporate portals illustrate the viability of the technology. Architectural and network diagrams show detailed portal implementations. Comprehensive references to guides, solutions, products, and terminology leverage living outside resources. **Digital Libraries: International Collaboration and Cross-Fertilization** Zhaoneng Chen, Hsinchun Chen, Qihao Miao, Yuxi Fu, Edward Fox, Ee-peng Lim, 2004-11-29 The International Conference on Asian Digital Libraries (ICADL) is an annual international forum that provides opportunities for librarians, researchers, and experts to exchange their research results, innovative ideas, service experiences, and state-of-the-art developments in the field of digital libraries. Building on the success of the first six ICADL conferences, the 7th ICADL conference, hosted by the Shanghai Jiao Tong University and the Shanghai Library in Shanghai, China, aimed to further strengthen the academic collaboration and strategic alliance in the Asia-Pacific Region in the development of digital libraries. The theme of ICADL 2004 was Digital Library International Collaboration and Cross-fertilization, with its focus on technology, services, management, and localization. The conference began with an opening

ceremony and the conference program featured 9 keynote speeches and 5 invited speeches by local and international experts. During the 3 day program 40 research paper presentations were given in 3 parallel sessions. The conference also included 6 tutorials and an exhibition. The conference received 359 submissions comprising 248 full papers and 111 short papers. Each paper was carefully reviewed by the Program Committee members. Finally 44 full papers, 15 short papers and 37 poster papers were selected. On behalf of the Organizing and Program Committees of ICADL 2004 we would like to express our appreciation to all authors and attendees for participating in the conference. We also thank the sponsors, Program Committee members, supporting organizations and helpers for making the conference a success. Without their efforts the conference would not have been possible.

Web Services Anura Guruge, 2004-04-08. This is a soup to nuts reference guide on all aspects of Web Services where Web Services is a fast emerging set of Internet specific middleware technology to further promote the growth of all aspects of e business via standardization, collaboration and franchising. This book is best characterized as an executive brief for IT and senior management rather than a nuts and bolts technical guide for portal implementers. Think of it as the Cliffs Notes on Web Services. Given this audience the book consistently focuses on business needs, value propositions, ROI, proven solutions and actual examples of current implementations. Each chapter also ends with a 10 item Q & A section that consolidates and summarizes the information discussed in the chapter. The book is illustrated with detailed technical diagrams, includes lots of arresting subtitles and contains many bullet lists and tables to facilitate and encourage productive skimming. Decision makers, the intended readership for this book, gain increasing comfort and confidence as they get into the book that they are getting to see all facets of the issues on a consistent basis and that they will not be blind-sided at meetings by people asking difficult questions. At the end of each chapter Guruge summarizes and reinforces key points, allowing the reader to skim through the topics for crucial information. The book also leverages living outside resources and ensures that the readership always has ready and consistent access to any and all terms, definitions and concepts they might not be familiar with. Debate style presentation focusing repeatedly on pros and cons, e.g. NET vs Java open vs proprietary and buy vs build. Author's trademark detailed architectural and network diagrams of portal implementations. Q & A section at end of each chapter.
