Provincial England W. G. Hoskins, 1968 *Provincial England* William G. Hoskins, 1965 **British Economic and Social History** R. C. Richardson, William Henry Chaloner, 1996 *Famine, Disease and the Social Order in Early Modern Society* John Walter, Roger Schofield, Andrew B. Appleby, 1991-04-26 An examination of the complex interrelationships among past demographic social and economic structures demonstrates how the impact of hunger and disease can enhance the exploration of early modern society **Lordship and Community** Cord Oestmann, 1994 The everyday lives of ordinary villagers their attitudes and responses to their physical and spiritual surroundings are brought into close focus the impact of matters ranging from ecclesiastical reform to basic matters such as birth and death are revealed at all levels of village society in particular the relationship of the Lestrangle family to the village and its inhabitants *Rural Society and Economic Change in County Durham* A. T. Brown, 2015 In the middle of the fifteenth century the economy of north east England was beset by crises population was low production was stagnant and many landowners faced penury By the end of the sixteenth century however the precocious development of the coal industry and high levels of inflation provided opportunities for investment and profit in the Durham countryside This book examines the development of agrarian capitalism estate management tenure and the land market social mobility the gentrification of merchant wealth and the emergence of the yeomanry during this period in the region It looks at such questions as how the coal industry was affected by the fifteenth century recession and the effects its rapid expansion had upon landed society reassesses debates on the rise of the gentry and the crisis of the aristocracy and considers how the wholesale economic changes of this period affected the social structure of late medieval and early modern England Although this period is often seen as a transitional era this book argues that it needs to be studied as one long agrarian cycle showing the degree to which patterns of landholding fixed during the fifteenth century recession affected the distribution of profits between different types of lords and tenants in the sixteenth and early seventeenth century A T Brown is an Addison Wheeler Fellow at Durham University [The Emergence of International Business, 1200-1800: Enterprise and empire](#) Theodore K. Rabb, 1999 Presents a history of commerce covering such topics as colonial expansion credit and banking and the development of trading companies *The Transformation of a Peasant Economy* John Goodacre, 2017-07-28 The market town has been dismissed as an incompletely formed urban community in fact it was the primary urban unit in pre industrial England This study places the market town at the centre of the transformation of early modern England both catalysing changes in agriculture and experiencing in a distinctive fashion the urbanisation that was to occur a century or more later in the great industrial and commercial centres of Europe In the two centuries after 1500 the rural economy changed from a pattern of subsistence to improved farming The first great enclosures took place during this time but the economic base for this revolution was the growth of local trading centred on markets and local communications networks This redistribution of produce provisions and information was the motor of

specialisation and hence modernisation The strength of this study is in its detailed research into this process in one representative locality and the sensitive extrapolation of local experiences on to the national and European scale By integrating in one book the themes of rural transformation and early urbanisation this account of one typical midland market town demonstrates the continuing vigour of the discipline of local history *Indian Journal of Economics* ,1964

Goldstone,2016-12-19 What can the great crises of the past teach us about contemporary revolutions Jack Goldstone shows the important role of population changes youth bulges urbanization elite divisions and fiscal crises in creating major political crises Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns triggered when inflexible political economic and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state elite relations Examining the great revolutions of Europe the English and French Revolutions and the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia but led to different outcomes In this 25th anniversary edition Goldstone reflects on the history of revolutions in the last twenty five years from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State In a new introduction he re examines his pioneering look at the role of population changes such as rising youth cohorts urbanization shifting elite mobility as continuing causal factors of revolutions and rebellions The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East Asia and Africa
