Dimitri Gutas, 2014-05-22 Through close study of Avicenna's statements and major works Dimitri Gutas traces Avicenna's own sense of his place in the Aristotelian tradition and the history of philosophy in Islam and provides an introduction to reading his philosophical works by delineating the approach most consistent with Avicenna's intention and purpose in philosophy The second edition of this foundational work which has quickened fruitful research into the philosopher in the last quarter century is completely revised and updated and adds a new final chapter summarizing Avicenna's philosophical project It is also enlarged with the addition of a new appendix which offers a critical inventory of Avicenna's authentic works updating the work of Mahdavi 1954 with additional information on all manuscripts and important editions and translations Its usefulness enhanced the book provides primary orientation to Avicenna's philosophy and works and constitutes an indispensable research tool for their study Winner of the I R Iran World Award for the Book of the Year 2014 *Averroes and Averroism in Medieval Jewish Thought*, 2024-03-25

The Andalusian Muslim philosopher Averroes 1126-1198 is known for his authoritative commentaries on Aristotle and for his challenging ideas about the relationship between philosophy and religion and the place of religion in society Among Jewish authors he found many admirers and just as many harsh critics This volume brings together for the first time essays investigating Averroes's complex reception in different philosophical topics and among several Jewish authors with special attention to its relation to the reception of Maimonides Pablo Dreizik Professor of Philosophy at the University in Buenos Aires has featured this volume in a radio presentation on Radio Sefarad which represents the voice of the Federation of Jewish Communities of Spain The presentation is available here for all interested Radio Sefarad **Islamic Philosophy, Science, Culture, and Religion** Felicitas Opwis, David Reisman, 2011-12-09 This collection of essays covers the classical heritage and Islamic culture classical Arabic science and philosophy and Muslim religious sciences showing continuation of Greek and Persian thought as well as original Muslim contributions to the sciences

philosophy religion and culture of Islam Power and Possibility in Early Arabic Philosophy Nicholas Allan Aubin, 2023-12-31 The world is a finite body and therefore has finite power John Philoponus is remembered for using this Aristotelian premise to break ranks with Aristotle and argue that the world is not everlasting This investigation reconsiders Philoponus's arguments from finite power and then explores the aftermath of this line of thinking in the works of three lesser known Arabic intellectuals active in the generation before Avicenna d 1037 Ab l ayr Ibn Suw r d after 1017 Ab al asan al mir d 992 and Ab Sahl al Mas d after 1025 Each engaged with this dictum in unique and novel ways and in so doing anticipated a number of central features of Avicenna's writings The history of this argument is of crucial importance for understanding the evolution of natural philosophy and metaphysics in this formative period away from tedious and simplistic arguments about creation and towards a more robust modal ontology based on intrinsic and extrinsic necessity The Medieval Hebrew Encyclopedias of Science and Philosophy S. Harvey, 2013-06-29 In January 1998 leading scholars from Europe the United States and Israel in the fields of medieval encyclopedias Arabic Latin and Hebrew and medieval Jewish philosophy and science gathered together at Bar Ilan University in Ramat Gan Israel for an international conference on medieval Hebrew encyclopedias of science and philosophy The primary purpose of the conference was to explore and define the structure sources nature and characteristics of the medieval Hebrew encyclopedias of science and philosophy This book the first to devote itself to the medieval Hebrew encyclopedias of science and philosophy contains revised versions of the papers that were prepared for this conference This volume also includes an annotated translation of Moritz Steinschneider's groundbreaking discussion of this subject in his *Die hebraeischen bersetzungen* The Medieval Hebrew Encyclopedias of Science and Philosophy will be of particular interest to students of medieval philosophy and science Jewish intellectual history the history of ideas and pre modern Western encyclopedias The Arabic, Hebrew and Latin Reception of Avicenna's Physics and Cosmology Dag Nikolaus Hasse, Amos Bertolacci, 2018-10-22 Avicenna Ibn S n greatly influenced later medieval thinking about the earth and the cosmos not only in his own civilization but also in Hebrew and Latin cultures The studies presented in this volume discuss the reception of prominent theories by Avicenna from the early 11th century onwards by thinkers like Averroes Fahraddin ar Razi Samuel ibn Tibbon or Albertus Magnus Among the topics which receive particular attention are the definition and existence of motion and time Other important topics are covered too such as Avicenna's theories of vacuum causality elements substantial change minerals floods and mountains It emerges among other things that Avicenna inherited to the discussion an acute sense for the epistemological status of natural science and for the mental and concrete existence of its objects The volume also addresses the philological and historical circumstances of the textual tradition and sheds light on the translators Dominicus Gundisalvi Avendauth and Alfred of Sareshel in particular The articles of this volume are presented by scholars who convened in 2013 to discuss their research on the influence of Avicenna's physics and cosmology in the Villa Vigoni Italy New Perspectives on Aristotle's De Caelo Alan C. Bowen, Christian

Wildberg,2009 This volume is the first collection of scholarly articles in any modern language devoted to Aristotle's De caelo. It grew out of series of workshops held at Princeton, Cambridge and Paris in the late 1990's. Since Aristotle's De caelo had a major influence on cosmological thinking until the time of Galileo and Kepler and helped to shape the way in which Western civilization imagined its natural environment and place at the center of the universe, familiarity with the main doctrines of the De caelo is a prerequisite for an understanding of much of the thought and culture of antiquity and the Middle Ages.

Bibliography of Islamic Philosophy Hans Daiber,2006-12-31 Since the publication of the author's BIBLIOGRAPHY OF ISLAMIC PHILOSOPHY in 1999 more than 3000 new books and articles in the field of Islamic philosophy, its Greek sources and its aftermath in European philosophy appeared and illustrate the increasing interest of the Islamic and the Western world. Philosophical thought as part of the Islamic culture became a medium in the dialogue between cultures and a tool for reflexion and methodology which are indispensable for creativity and human behaviour. This supplement covers all new publications as far as they were available and could be included in the extensive index on authors, texts, translations and commentaries and philosophical terms and concepts.
