Handbook of Latin American Health Psychology Alfonso Urzúa, Yarimar Rosa-Rodríguez, 2025-07-26 This handbook presents a comprehensive overview of a tradition of psychological research and practice little known in the English speaking world the Latin American school of health psychology Even though health psychology as a field of research and practice was born in Latin America with the creation of the National Group of Health Psychology within the Cuban Ministry of Public Health in 1969 this genesis is seldom acknowledged in the international literature And even less is known on an international level about the original contributions that Latin American health psychologists have made and still make to the development of the discipline This volume aims to fill this gap by presenting to the international community a comprehensive account of the particular trajectory of health psychology in Latin America and the original contributions made by a field of research and practice that has always tried to integrate a socio culturally sensitive approach to develop studies and interventions in health promotion and disease prevention This is done by bringing together chapters written by leading experts from the region that explain the specific social political and cultural contexts in which health psychology developed in Latin America present the original theoretical and methodological approaches developed by Latin American health psychologists and provide an overview of current research done in the region about the contribution of psychology to the management of various health conditions The Handbook of Latin American Health Psychology will be of interest to researchers practitioners and students interested in the internationalization and cross cultural generalizability of health psychology as a tool for building a truly global and culturally sensitive discipline Some chapters of this handbook were originally written in Spanish and translated into English with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

Psicología de la salud en la infancia y adolescencia Ana Isabel Rosa Alcázar, Pablo J. Olivares Olivares, José Olivares Rodríguez, 2012-09-11. El objetivo de este manual escrito por especialistas con amplia experiencia en los distintos campos es presentar una muestra de los problemas de salud que más frecuentemente tratan los psicólogos en la población infantil y juvenil en su modalidad de caso clínico o intervención individual. Pese a que en la actualidad contamos ya con excelentes manuales de psicología de la salud que abordan aspectos descriptivos y teóricos, no poseemos todavía ninguno dedicado a la evaluación y tratamiento del caso clínico en esta población. Esta es la laguna que pretende cubrir este manual de casos prácticos mostrando cómo se interviene paso a paso en este tipo de problemas. El libro consta de catorce capítulos divididos en dos grandes apartados. En el primero de ellos se presentan algunos de los elementos claves de la intervención en problemas de salud destacando la educación para la salud, la adherencia al tratamiento y los aspectos éticos en la intervención con niños y adolescentes enfermos. El segundo apartado recoge diferentes intervenciones de N-1 llevadas a cabo con niños y adolescentes que padecen problemas relevantes en el estado de su salud. Los terapeutas nos informan con detalle sobre cómo prevenir la obesidad, evaluar y tratar el sobrepeso, el asma, el ceder las lumbalgias, las cefaleas, los problemas dermatológicos, estomacales, el síndrome de la boca ardiente, la adicción al tabaco, la marihuana y la cocaína en una población tan sensible y a veces tan compleja. Todos siguen una estructura similar comenzando con el planteamiento o descripción general del problema para pasar a la resolución del caso clínico en todos sus momentos: evaluación, diagnóstico, tratamiento, presentación de resultados y discusión de estos.
