Psychanalyse L'homme Et Ses Destins:

Phenomenology and Lacan on Schizophrenia Alphonse de Waelhens, Wilfried Ver Eecke, 2001 In Phenomenology and Lacan on Schizophrenia Alphonse De Waelhens provides a clear summary of Lacan's theory of schizophrenia as Lacan derived it from his commentary of Freud's study of the Memoirs of Schreber De Waelhens also shows how Lacan's understanding of the schizophrenic as having a defective relation to language can also explain four other characteristics of schizophrenic behavior the fragmented body image lack of realistic evaluation of the world so called bisexuality and confusion of birth and death Third De Waelhens gives a Hegelian interpretation of the pre Oedipal experience of the child He makes use of Freud's study on his grand child using a bobbin and later the words fort da away here to demonstrate that a transitional object allows the child to take distance from its attachment to the mother so that it can start to separate itself from the mother Taking distance is according to De Waelhens introducing the Hegelian negative which is the birth of the subject Fourth De Waelhens gives a dialectic reading of the history of German and French psychiatry He shows the epistemological contradictions in the work of some of the great nineteenth century psychiatrists relying too exclusively on a biological model of schizophrenia In his contribution to this volume Wilfried Ver Eecke draws several lessons from evaluating the literature on schizophrenia He argues that epistemologically neither a biological nor a psychological method of reasoning can capture all the factors that can play a role in the creation of schizophrenia He relies heavily but not exclusively on the Finnish studies of Tienari Myrman and Wahlberg and their colleagues to provide statistical evidence that non biological factors also play an important role in causing schizophrenia He relies heavily but again not exclusively on the study by Karon and VandenBos to demonstrate statistically the efficiency of psychodynamically inspired therapy of schizophrenics Ver Eecke also addresses an apparent inconsistency in De Waelhens presentation of Lacan's theory of schizophrenia Where De Waelhens seemed to argue at one time that the mother figure was the crucial figure to explain schizophrenia leading to a defective relation to the body and at another time that it was the role of the father which was crucial leading to a defective relation to language and the symbolic there Ver Eecke argues that the defective function of each influences the function of the other He then draws a conclusion for the therapy of schizophrenics to be helpful a therapist will have to address both deficiencies The problem for treating schizophrenics is that correcting an unconscious deficiency to the body a deficiency in the imaginary requires a totally different kind of intervention than an attempt to correct a symbolic deficiency a deficiency in the paternal function A correction of the imaginary requires a kind of maternal mirroring a correction of the symbolic requires making a distinction or a prohibition stick One further difficulty arises Psychotherapy uses language in its treatment However language in schizophrenics is deficient We can therefore expect that language will be inefficient This is so unless the therapist uses language first to make a repair at the imaginary level and only thereafter makes an attempt to make a correction in the symbolic In analyzing successful therapeutic techniques reported by several therapists Ver Eecke discovers

that all of them first try to repair the imaginary before they attempt to make corrections to the symbolic **The Truthful and the Good** J.J. Drummond, J.G. Hart, 2013-12-11 This volume was occasioned by the desire of its contributors to honor Robert Sokolowski on his sixtieth birthday The desire first took form on the streets of an American metropolis when several of us while attending a philosophy conference were bemoaning the lack of passion for doing philosophy as we all conceived it In this expression of our discontent we all had a common exemplar in mind someone for whom the passion for the truthful and the good is embodied in every sentence of his rich writings Felicitously this very thinker was someone whom we can regard as manifesting in his person and life these same properties which his writings exhibit and pursue as luminous ideals As a result John Brough John Drummond and I came up with the idea that we hold our own conference and do philosophy as we envisage it and at the same time honor its foremost exemplary practitioner whose sixtieth birthday was the following year Immediately the idea took wings among the handful of us and the dreariness of that philosophy congress receded The first task of thinking of possible speakers was easy The issue of the venue for our symposium what I like to call the Sokofest had to be decided as well as the details of its realization **Sigmund Freud and Oskar Pfister on Religion** Carlos

Domínguez-Morano, 2023-07-24 Sigmund Freud and Oskar Pfister on Religion examines the dialogue between psychoanalysis and religion through the encounters of two men the unfaithful Jew who founded psychoanalysis and a pastor of profound religious faith and proven psychoanalytic conviction Carlos Domínguez Morano analyses the original encounters between Freud and Pfister and their respective positions noting the incidences, impasses and progress of their discussions The complex interactions between psychoanalysis and religion over time are considered and Domínguez Morano assesses the fundamental parameters of each perspective with reference to Catholicism The book explores the relationship between psychoanalysis and religion as a rich ongoing and unending dialogue and sheds new light on the origins of psychoanalysis Sigmund Freud and Oskar Pfister on Religion will be of great interest to academics and scholars of psychoanalytic studies religion the history of psychology and the history of ideas **Phenomenology of Life. Meeting the Challenges of the Present-Day World** Anna-Teresa Tymieniecka, 2006-03-30

Philosophy has been always received or bypassed for its resonance or aloofness with the spirit of the time Should not philosophy phenomenology of life be expected to do more to ascertain its validity Should it not pass the pragmatic test that is to respond directly to the life concerns of its time What is the role of the philosopher and philosophy today Due to the ever advancing scientific technological social and cultural changes that are shaping human life and the life world in transformation we are desperately seeking a measure to estimate life's unfolding a compass to stir the course between Scylla and Charibdis to maintain humanhood and creative insight for laying the cornerstones for the unforeseeable unfolding of life dynamisms It is this challenge which philosophy phenomenology of life meets with underlying ontopoietic unraveling of the hidden logos concatenations of beingness in becoming The present collection of essays offers contributions to answer this challenge by focusing upon measure sharing in

life intersubjectivity and communication societal equilibrium education and more It will be of great interest to those working in the fields of Phenomenology Philosophy History of Philosophy and Contemporary Philosophy **Marine Hydrothermal Systems and the Origin of Life** SCOR Working Group 91,1992-11-30 Research of the origins of life in connection with a marine environment started at the end of the seventies when the black smokers in the Pacific were discovered and the Red Sea deep hydrothermal brines were found to be a fruitful environment for abiotic synthesis of life precursors For a while this research was categorised under the heading chemistry but in less than a decade the topic became fully integrated into the science of oceanography The Scientific Committee on Oceanographic Research SCOR initiated Working Group 91 Chemical Evolution and Origin of Life in Marine Hydrothermal Systems This volume contains the final report of this working group

Paternity as Function Vassilis Saroglou,2021-09-13 Faced with the contemporary proliferation of a religion of emotional communities and the multiplication of gurus spiritual directors and masters the psychologist of religion should question the impact of the paternal function on the structuring of religious experience This question is examined here within the context of ancient monasticism and on the basis of ascetic sources mainly the Ladder of John Climacus 7th c as well as by means of the analysis of rituals such as baptism and monastic profession The author demonstrates that the spiritual father refers to paternity as function and that this function is both structural and structuring with respect to religious experience It is also examined how this crossroads concept of fatherhood is linked to other psychic realities such as the maternal dimension of religious desire and the role of the community the relations between the real the imaginary and the symbolic the paternal uncertainty the articulation of the mystical desire with the Law and the control of sexuality This study shows the importance of this function for bringing together structure and development in the religious experience and indicates the risks of this paternity for a religious pathology **The New Husserl** Donn Welton,2003-08-21 The essays in this volume provide an alternative approach to Husserl by examining his work and his method as a whole and by probing issues old and new that occupied him during this exceptionally productive period **Truth and Singularity** Rudi Visker,2013-12-01 THE PART OF THE SUBJECT At the origin of these essays an increasing weariness produced by all those attempts to oppose what came to be known as Foucault's post structuralism to phenomenology as if the two were incompatible and as if one could only proceed with thought after having chosen sides And an equal reluctance to join those who pretended they could carry on as they had before since quite obviously there were no sides to choose Foucault being but the latest example of a relativism that one could easily ignore since it had like all relativism already refuted itself by daring to speak And finally behind that weariness and that reluctance a suspicion that what these two reactions to Foucault had in common was a refusal to go toward the things themselves and thus a refusal to approach the texts that we refer to by that proper name as we would approach other phenomena not as the body object of a thought that we would have to locate as coming either before or after phenomenology but as a series of statements that appear to us in a certain way and whose appearing reveals to us something
